Producers of Change

Among the forces which produce change are running water, freezing water, the moisture of the air, the gases of the atmosphere, heat and the winds.

NOTICE

My cider mill will start Thursday, August 30th and will operate every Tuesday and Thursday thereafter.

Get Your Dollar's Worth

GRANDMOTHER reads the latest market prices—"Lands sakes alive!" she exclaims, "why, when I was young we didn't have to pay half so much." Yes, in "the good old days" milk sold at five cents a quart, potatoes at forty cents a bushel, sugar twenty-five pounds for a dollar, and so on. And, in "the good old days" a laborer was paid a dollar a day or possibly a dollar and a quarter. But who wants to go back to "the good old days"? Not you—not me.

Prices are higher now, but wages are higher too. You pay more, but the goods you buy are of better material, they are better made, they last longer. Even footstuffs are better. Inspection and extra care insure their quality.

The dollar can still buy a dollar's worth. Read the advertising in the newspapers and you will find that they will help your dollars go a long way. Advertising tells you where you can get full value for your money. The young housewife of today shops even more intelligently than "grandma," for the advertisements are her guides, they make her a competent judge of values.

Merchandise must be good or it couldn't be advertised. Read the advertisements and get your dollar's worth.
