Largest Fixed Star

The Naval observatory says that Alpha Scorpii (Antares) is the largest fixed star of which we have reasonably accurate measurements. Its diameter is about 400,000,000 miles. In volume it is 100,000,000 times as large as the sun and 125,000,000,000 times as large as the earth. Its distance is probably 35 light years. This distance is 20,000,000 times as great as that of the sun from the earth.

Old Castles in Africa

There are some 36 medieval castles along the coast of West Africa, that of St. George at the town of Elmina being considered the oldest and greatest. The Portuguese are said to have begun it ten years before the discovery of America, the stone for the foundations being brought from Portugal. Its double fosse was hewn out of solid rock.
