MANY PET MEASURES THROWN IN HOPPER

CONTINUED FROM PAGE ONE

The state industrial board and possibly the public service commission, is sent back to circuit judges, that the salaries should be increased.

Another popular measure is the one which would give each county council the power to set salaries of county officials, and also the authority to determine whether the county should have several officials like attendance officer, county agricultural agent and others.

The Ways and Means committee of the House has been actually striving to reach some sort of an agreement toward a program, but so far there is no set program.

House Democrats are planning to hold a caucus the first of the week and Senate Democrats already have had a meeting and plan more in the near future.

House leaders, Walter Myers, Delph McKesson and Earl Crawford, are now making efforts to poll their membership to ascertain just how many Democrats will stand by the party's program if one is agreed on.

The House adjourned Friday afternoon, but only a handful of the members left Indianapolis. Most of the members agree that the session will go the full 40 days, but others are holding on to the belief that the business can be disposed of in about 30 days.

Both the House and Senate are air cooled, but because of the large attendance of spectators, the cooling systems have failed to give any relief from the heat of the past week.

It is estimated that more than 250 bills will be introduced in the two houses during the next ten days.

Western Relics in Museum

Las Animas, Colo.—(U.P.)—Scores of relics of the old west have been gathered here and placed in the new Kit Carson Museum. The museum has been named for the famous Indian scout who once lived in this region. It has been located in an old house where he lived.

New High Speed Device Ready

St. Louis, Mo.—(U.P.)—A device for high speed engines, which it is claimed will prevent piston slap, grinding of cylinder walls, loss of compression and oil pumping, has been developed by a St. Louis inventor.
