Paris (UP)—Princess Charles, Count Jacques de la Rochefoucauld, Count de Saint-Germain, and a host of other smart bachelors who always are to be seen at the best parties, the new night clubs, and who last summer organized a memorable party at their own, the famous White Ball, have a very unusual Christmas present each one of them a tie of one of her own smart materials. Now the gentlemen all are excited and interested in seeing the young women about who own the blouse or frock of the same material to match their ties.

Miss Schiaparelli may have more than she realized at first for it's like finding the right for the Cinderella slipper—either half of a torn valentine!

The St. Vincent de Paul Society met Wednesday afternoon at 8 o'clock in the Knights of Columbus Hall. The hostesses will be Mesdames M. F. Harris, Alva Harris and Charles Vogelewe. Members of the organization asked to take note of the change in meeting.

-lagging appetite

There is a reasonable way to correct this condition. Pause and read. You know that body weakness frequently the result of a weak "picture"—lowering of the red blood cells and their hemoglobin. It is so very necessary to keep up strength and vitality. Then why not try S.S.S.—the great tonic for decades? Its value has been proved by extensive scientific research and by millions of happy users.

Take S.S.S. and note the way your strength and appetite are restored. Two convenient sizes at all drug stores—the larger size is more economical. Don't permit any one to "switch" you in your determination to restore your red blood cells and their hemoglobin content for regaining strength.

Cause of Heat Lightning

Heat lightning is due to the reflection from distant clouds of far-off flashes, the thunder being too far away to be heard. The weather bureau says, however, that it is possible for an electric discharge through the air to build up more or less gradually from a burst discharge to a full flow, and such a discharge would produce little or no thunder.

It's fun to be fooled —
...it's more fun to KNOW

Another "magic show" is cigarette advertising.

One of its greatest tricks is the illusion that cigarettes can be made miraculously "MILD" through manufacturing methods.

THE EXPLANATION: All popular cigarettes today are made in modern sanitary factories with up-to-date machinery. All are heat treated—some more intensively than others, because raw, inferior tobaccos require

more intensive treatment than choice, ripe tobaccos.

The real difference comes in the tobaccos that are used. The better the tobacco, the milder it is.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

This is why Camels are so mild. This is why Camels have given more pleasure to more people than any other cigarette ever made.

It's the secret of Camels' rich "bouquet" ...their cool flavor...their non-irritating mildness.

All the natural, ripe goodness of Camel's tobacco is kept fresh for you by the famous air-tight, welded Humidor Pack. Don't remove it.
