DEATH CLAIMS RICHARD MYERS

(CONTINUED FROM PAGE ONE)

ager of the Hickey Machine Shops
in Ontario, Canada and at Law-
renceville, Illinois.

In November 1899, he married
Miss Mayme T. Long of this city.
To this union two children were
born. They are, Miss Josephine
Myers of New York City and
Richard Myers of this city.

Surviving besides the wife and
two children are three sisters,
Mrs. Andrew Harting, Dallas,
Texas; Mrs. A. E. Elston, Angola
and Mrs. William Lantz, Tulsa,
Okla. Four brothers are deceased.
Returning to Decatur, Mr. Myers
became a partner in the Gay,
Zwick and Myers Furniture store
in 1910. He remained in business
until 1929, retiring because of ill
health.

Mr. Myers was prominent in
local Masonic circles and took an
active part in lodge affairs, being
honored with all the important
elective offices in the Decatur
chapter. He was a member of the
Blue lodge, Knights Templar,
Scottish Rite consistory and Miz-
pah Shrine, Fort Wayne.

Known in nearly every state
encampment of Spanish-American
war veterans, Mr. Myers was
elected a state delegate to the
national convention of the veter-
ans held in Havana, Cuba, six
years ago. Several years ago the
district meeting of the veterans
was held in this city at the in-
vitation extended by Mr. Myers.

Mr. Myers served as a member
of the Decatur school board from
1913 to 1922, being a member of
the board when the new high

BUSINESS MEN MAY RULE CODES

(CONTINUED FROM PAGE ONE)
was "much dissatisfaction" with
the NRA's activities.

The plan quickly won the en-
dorsement of Administrator Hugh
S. Johnson, if it provided for cor-
responding organization for labor
"all the way through" and Swope
accepted that in toto. Harriman
also endorsed the plan in principle
as a desirable alternative to possi-
ble failure of the NRA through its
becoming "just a government bu-
reaucracy."

The Swope plan provided that
the national governing council be
made up of regional trade associa-
tion representatives. It also would
include representatives of govern-
ment departments, and maintain
extensive research and statistical
staffs. Johnson said the govern-
ment would exercise "very direct
and intimate supervision" over the
council.

This shift of emphasis to self-
regulation of business, rather than
government direction and supervi-
sion coincides with an impending
barnstorming tour by General John-
son to seek greater public support
for the NRA. The reaction which
follows his trip may have a bearing
on whether there is to be any ma-
jor shift of tactics in the recovery
drive.

The resolution of the powerful
Manufacturers' Association said
that recent rulings and instructions
relating to administration of codes
imperial industrial self-govern-
ment. It declared that "sound em-
ployment relationships must be
established in the light of local
plant and community conditions."

Harriman said that the perma-
nent value of the NRA would be en-
hanced if the program was carried
out by business under government
supervision to see that the inter-
ests of the people are protected.

"The government can't get any-
where policing industry any more
than it could police the 18th am-
endment," he said. "Business must
police itself."

There will be a big job for such

a council if it comes into being.
Less than 20 per cent of the codes
that have been drawn up have been
approved finally by the President,
NRA figures show.

GUARD AGAINST NAZI ACTIVITY

(CONTINUED FROM PAGE ONE)
strictest neutrality under pain of
prison sentences.

4—The commission will control
solicitation of funds for political
groups.

5—Exposure of government sec-
rets or terrorist activities designed
to control the 1935 plebiscite
vote will be punished by prison
sentences at hard labor.

6—Police, and gendarmes who
refuse to enforce the above de-
crees will be punished by impris-
onment for from two to five years
at hard labor.

The decrees were aimed direct-
ly at curtailing Nazi activities and
preventing an armed outbreak.
Nazi speakers have exhorted the
population to revolt, and even
children give the Nazi salute.

The Nazi situation has been a
source of international worry for
many months. In withdrawing
from the league of nations, Chan-
cellor Adolf Hitler said bluntly:
"After the return of the Saar to
the Reich, Germany will have no
reason for war against France."

There is sober doubt whether
the Saar population will wait for
the 1935 plebiscite, fourteen
months away. It is unsafe for
French officials of the mines to
move about freely. Many have
been beaten.

PERSONALS

Mr. and Mrs. V. S. Allen and sons,
John Robert and Ferd Ellis.

LOCALS

F. V. Mills has received a letter
from some fellow who claims to be
in prison in Spain, asking him to
help him get out. He says he is
in possession of \$360,000 and that
if Fred will help him to get free
he will give him \$120,000, but Fred
is skeptical of such a Santa Claus
giving him so great preference and
is not considering a trip to that
country where Claude Bowers pre-
sides as American Ambassador.

Dick Heller, secretary to Lieuten-
ant-Governor Clifford Townsend is
scheduled to make a political
speech at a district rally in Fort
Wayne this evening.

Dick Townsend is ill at the home
of his parents on Mercer Avenue.

Miss Madge Hite will go to Chi-
cago next week to visit her sister,
Mrs. Oscar Hoffman who is ill.

The Ladies Missionary Society of
the Presbyterian church held a so-

Laredo, Tex., Hums As Border Imports Mount

Laredo, Tex.—(U.P.)—International
commerce at this Mexican border
town has been humming on a ris-
ing scale in recent months.

In September lead imports from
Mexican mines totalled 115 car-
loads, an increase of three over
August. Exports of American goods
to Mexico through Laredo amount-
ed to 249 carloads for the month, a
drop of 40 from August.

Mexican export commodities, ac-
cording to El Boletin Fronterizo
Commercial, official publication of
the Mexican customs house at
Nuevo Laredo, included:

Antimony, refined arsenic, beer,
bones, bananas, cadmio, copper
metal, hides, ixtle, palm ixtle,
lumber, limes, lead and straw hats.
American commodities exported
to Mexico through Laredo were in-
cluded about three times as many
different items, from automobiles,
through machines and materials of
all kinds to water meters.

FORESEES NEW TYPE OF ENGINE

Chicago.—(U.P.)—The days of
steam locomotive, with its belching
smokestack and hissing cylinders,
definitely are numbered, in the
opinion of Fred Sargent, president
of the Chicago and Northwestern
Railroad.

Single unit gas and electric loco-
motives of various designs gradu-
ally will supplant the iron horse in
both suburban and long haul ser-
vice, Sargent believes. The single
unit system is more practical, flex-
ible and economical than either
steam, or a comprehensive, centri-
fugal electrified system.

"Elaborate studies made by West-
inghouse and General Electric show
that it would cost at least \$60,000,
000 to electrify the three suburban
branches of the Northwestern with
a fixed power plant system," said
Sargent.

"I predict that within eight or
ten years, possibly sooner, the gas
unit, or oil-electric engine will be
so far developed that it will take
the place of steam on American
railways."

The present method of electrify-
ing railroads with a stationery cen-
tral plant and either third rail, or

trolley power transmission, is not
flexible enough to be practicable,
Sargent contends. The single unit
system, however, would permit
flexibility of time and service
which is necessary for efficient
suburban transportation.

Chinesse Wall Draws Tourists

Clintonville, Wis.—(U.P.)—A sec-
tion of the famous wall of China is
the biggest attraction for tourists
in Central Park here. It is said to
be the only section of the wall in
the world outside China and con-
sists of about three tons of assor-
ted bricks and stones. A salesman
for an auto truck company obtain-
ed permission from the Sun Yat
Sen administration to transport the
wall to Clintonville.
