# NOTICE OF FARM ALLOTMENTS AND MAXIMUM ACREAGES OF WHEAT AND BARLEY UNDER CONTRACTS FOR MEMBERS OF THE WHEAT PRODUCTION CONTROL ASSOCIATION OF ADAMS COUNTY STATE OF INDIANA

Listed below are statements of the allotments which have been determined for members of the Adams County Wheat Production Control Association from Adams County.

These allotments are to hold for the duration of the present wheat contracts, and they are the basis upon which adjustment payments are to be made. They have been determined by the County Allotment Committee after careful consideration of the application statements. Every effort has been made to have these allotments as accurate as possible. The maximum acreage which may be sown to wheat for the 1934 crop on each farm, under the reduction requirements of the contract is also listed.

The Adams County allotment, which has been calculated from records of the United States Department of Agriculture, is 155,952 bushels. This is the total number of bushels allotted to the county under the wheat plan. The total of the individual allotments, including those allotments which could have been assigned to farms which are not participating under the wheat program, must be in line with the county allotment figure. The number of nonparticipating wheat farmers in the county is 736; the average total wheat acreage for those nonparticipating farms during the base period is 11,991 acres; the total average wheat production on these nonparticipating farms during the base period is 24,820 bushels.
