Silver Program—New Deal For U. S. Mines

The ratification of the London silver agreement by President Roosevelt, which raises the price of the precious metal from 40 to 64.5 cents an ounce is regarded by silver proponents, including Senator Key Pittman of Nevada, who proposed the agreement in London, as a big step towards prosperity. Among the silver expected to result are a large increase in foreign trade, world stabilization of the silver price, an increase in foreign buying power, consequently a greater market for U. S. products, a boost in commodity prices and a new era of prosperity for our Rocky Mountain silver mining area. Mines that have been shut down in New Utah, Arizona and Idaho, because silver did not pay cost of production, will once more go ahead full creating new jobs and putting more money in circulation.

BRITISH HAVE NEW FARM PLAN

MONTREAL, (U.R.)—Fifteen British farm settlements, each costing \$1,000,000, may be established in Canada in the near future, according to a plan advanced by Brigadier General M. L. Hornby, of Lethbridge, Alta., and Sussex, England, who now is in Canada interviewing government officials. Gen. Hornby recently returned from an extended trip to Britain where he was engaged in furthering his plan.

Ten locations for the proposed settlements have been selected in Manitoba and Saskatchewan and more locations will be decided upon in Alberta.

Gen. Hornby proposes that each unit of his plan should be sponsored by some town or county in Britain. Settlers would be selected carefully and adequately financed, at no expense to Canada from the fund set up annually in Great Britain for Canadian and Australian settlement, implemented by private investment.

Any misfits sent to Canada would be guaranteed return to Britain within five years by the sponsors of each unit.
