Pictures Of Flood In Eastern States

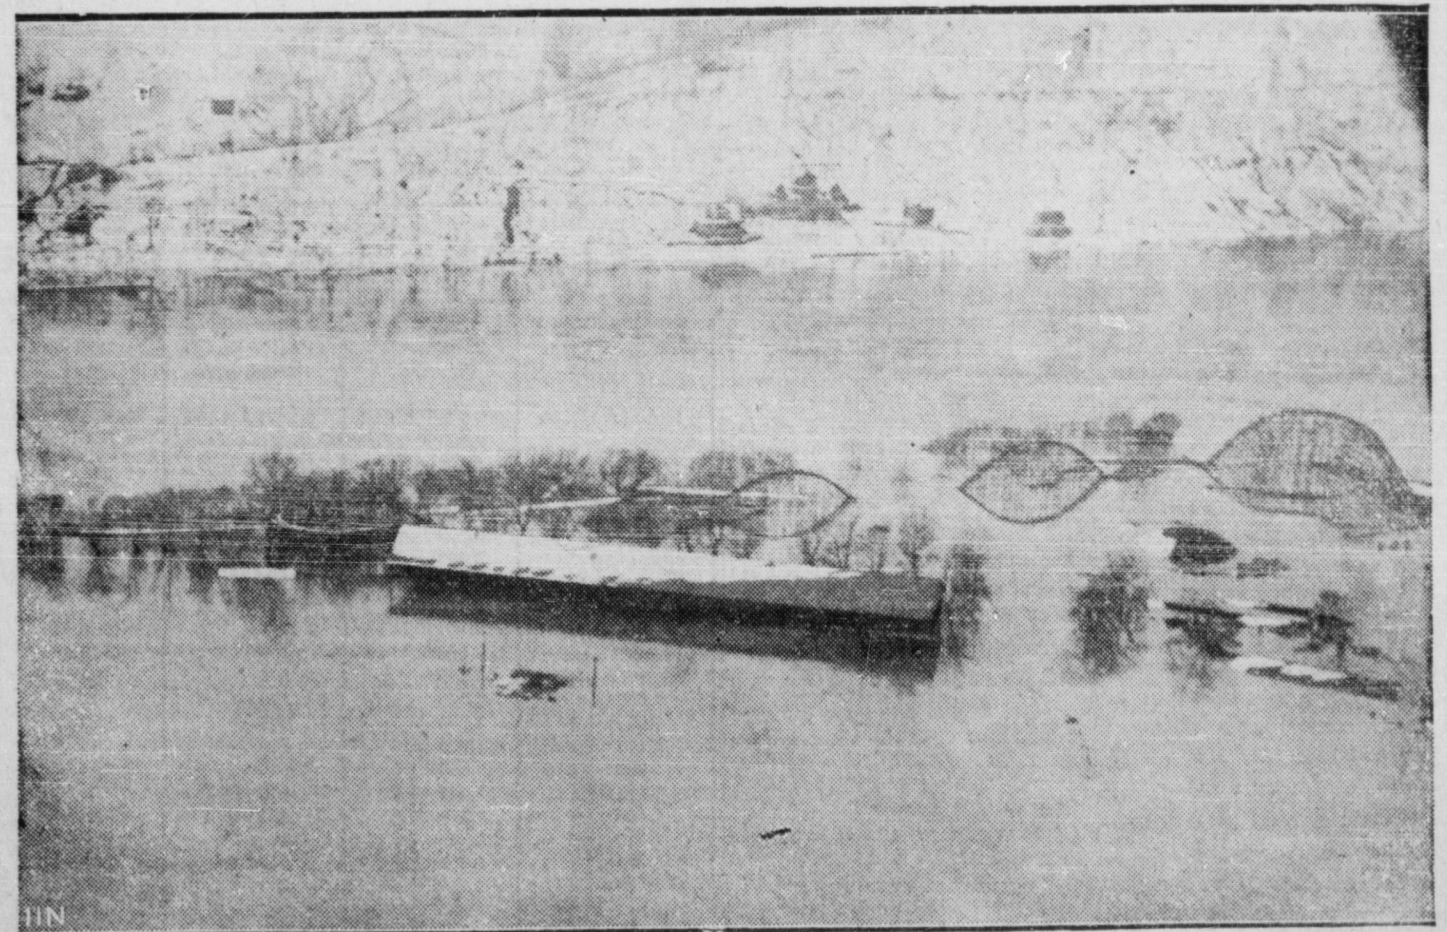

Flood Leaves 20,000 Homeless at Wheeling, W. Va.

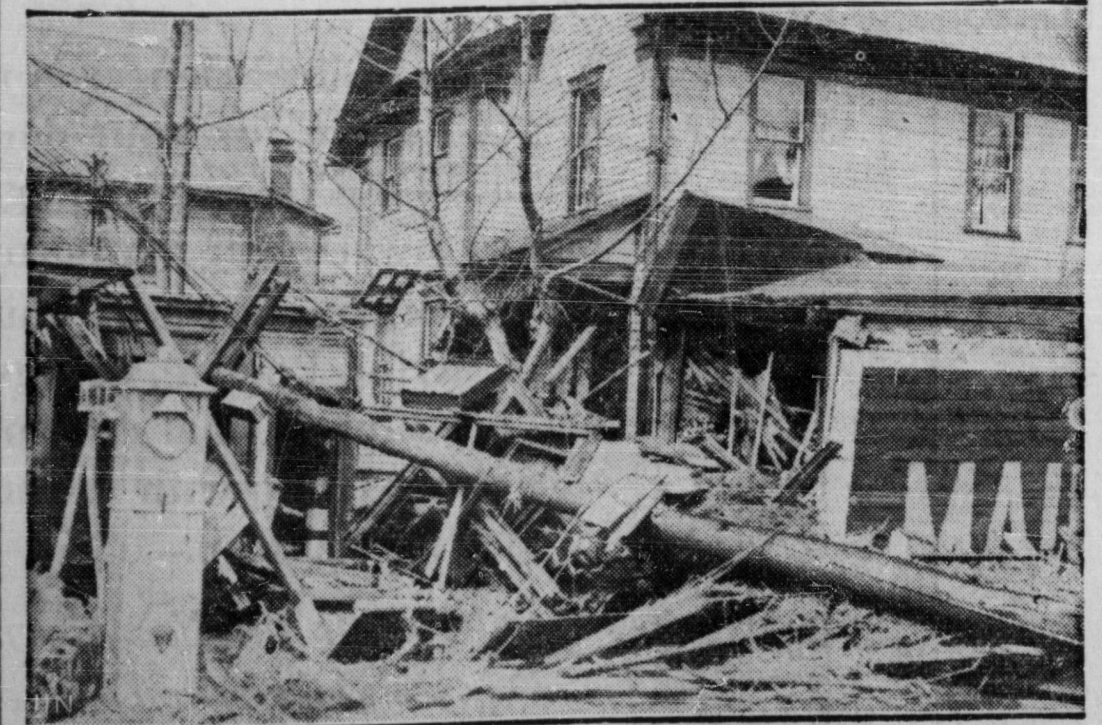

More than a score of lives were lost in the vicinity of Wheeling, W. Va., above, when the Ohio river rose to the unprecedented height of 54 feet, leaving at least 20,000 homeless in the city of Wheeling alone. Fire and explosions added their terrors to the perils of the churning yellow flood as refugees fled to higher ground.

This striking aerial view of New Martinsville, W. Va., on the Ohio river, shows how the city was inundated when waters descended from the surrounding hills and the over flow of the river swept down the valley.

When the Ohio river went on a rampage one of the cities which suffered most was Marietta, O., above which was practically cut off from the outside world.

Chaos and confusion reigned at Johnstown after floods piled wreckage and debris in residential and business sections, causing damage estimated in the millions.

Ten thousand people were left homeless when the angry Ohio river went on a rampage, completely submerging Wheeling Island, above, and endangering the huge suspension bridge across the river from Ohio to West Virginia. The flood passed the all-time record of 52.4 feet, claimed the lives of a score of residents of Wheeling Island and Wheeling, and caused property damage estimated in the millions.
