

## One-Piece Dress with Cape

For Sports or  
for Town Wear.

By ELLEN WORTH

Delightfully cool and smart is this light blue cotton pique dress with navy trims.

It is such a fascinating affair to make. The dress cuts in one piece from neck to hem with inverted pin tucks to fit the waistline. An action pleat at the center-front and at the center-back provides ample freedom. The pretty shoulder cape that follows the neckline of the dress at the front, also cuts entirely in one piece.

You'll finish it so quickly, you'll want to make another in tub pastel silk or linen.

Style No. 1821 is designed for sizes 12, 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 5/8 yard of 39-inch contrasting for dress and cape.

Our Illustrated Home Dress-making Book contains the latest fashions together with dressmaking lessons and the fundamental principles of sewing. Whether you are an experienced sewer or just a beginner, you will find this book helpful indeed in making your summer clothes. It is just full of ideas to enhance your own looks. You simply can't afford to miss it! Send for your copy today.

## STONE-AGE MAN TRACED IN WEST

Sequoia Park, Cal. — (U.P.) — One  
million years ago, when the Java  
ape-man existed, this section of  
California already was occupied by a  
primal race capable of making  
stone utensils.

That is the conclusion that has  
just been made public by Walter  
Fry, United States commissioner  
of Sequoia Park, and Dr. Francois  
Matthes, noted geologist.

Although the Java ape-man is  
regarded as the oldest known hu-  
man link, there is every indication,  
the two scientists assert, that a  
much more humanized type of man  
existed at that time in Tulare  
county, California.

The conclusions of the two men  
are based on the existence at At-  
well Mill and Giant Forest, of a  
number of giant stone basins in  
some cases four feet in diameter  
and from two to four feet deep.

It has been proven to the satis-  
faction of scientists that these  
could not have been formed by the  
action of water, nor have any  
grinding tools with which they  
might have been made ever been  
found. All theories as to their pos-  
sible use have been discarded.

However, the most important dis-  
covery in connection with them,  
made by Dr. Fry, is the presence  
of an inch of encrusted volcanic  
ash in two of them that were lying  
exposed to this material.

The youngest volcano mountain  
in or near Tulare county is a cone

near Golden Trout creek, but  
which, according to Dr. Matthes  
could only have had its last per-  
iod of activity over a million years  
ago.

The conclusion of the two  
scientists are that the basins could  
only have been made by a prim-  
eval people living here a million  
years ago. These basins exist only  
in the Sequoia belt of Tulare  
county.
