URGES BUYING OF BEET SUGAR

Residents Of Indiana, Ohio And Michigan Urged To Buy

Saginaw, Mich., Oct. 7.—(Special)—"The purchasing power of thousands of farmers in Michigan, Ohio and Indiana will be increased by hundreds of thousands of dollars this year if the people of the three states will demand and use beet sugar grown and made in Michigan, Ohio and Indiana," declared Arthur A. Schupp, executive secretary of the Farmers and Manufacturers beet sugar association, in an interview today.

"The harvesting of the 1936 sugar beet crop is now well underway," continued Mr. Schupp, "and every beet sugar factory, scheduled to operate this year in Michigan, Ohio and Indiana, will be operating on a 24-hour a day schedule before the end of this week."

When asked if beet sugar is now available, Mr. Schupp replied, "beet sugar is obtainable throughout the year, the processors having adopted the practice of marketing their annual sugar production over a 12-month period. Sugar from the 1936 sugar beet crop is now on sale in many cities and within the next few days every grocer in Michigan, Ohio, and Indiana will be able to supply his trade with beet sugar produced from this year's beet crop."

Commenting on how the people in Michigan, Ohio, and Indiana could increase the purchasing power of the farmers, Mr. Schupp said, "The contract, under which sugar beets are grown, provides that the farmers are to receive one-half of the net cash return from the sale of the sugar extracted from their beets. It follows, therefore, that if large quantities of sugar have to find a market at distant points, the net cash return is necessarily decreased. If, on the other hand, the people of Michigan, Ohio and Indiana rally to the support of the farmers by buying and using beet sugar, grown and made in the three states, the farmers' net cash return per ton of sugar beets will be materially increased. In short, by supporting their home sugar industry, the people can increase the purchasing power of the farmers by hundreds of thousands of dollars, without increasing the cost of sugar to themselves, the in-

crease in the return to the farmers being brought about by reducing distribution costs."

Landon Campaign

Waterloo, Iowa, Oct. 7.—(U.P.)—Gov. Alf M. Landon's campaign to recapture the corn belt sped forward today under powerful impetus of Frank O. Lowden's endorsement of the Kansan's farm program.

Lowden, former governor of Illinois, led the post-war Republican battle for farm relief and became the political idol of thousands of midwestern farmers.

In a broad frontal attack on the Roosevelt administration Lowden last night told a Blackhawk county audience that the new deal pointed the nation toward dictatorship. He said the supreme court has stood between the country and substitution of "an absolute autocracy at Washington for the union of the states." He warned of the tax bill accumulating under Roosevelt policy.

Lowden spoke before approximately 2,000 persons in the dairy

Talking to reporters after his speech, Lowden called for election of a Republican house of representatives as possible to cooperate with Gov. Landon after inauguration day next January. He predicted that "sane Democrats" in the state would join a vigorous Republican minority to turn the country away from Roosevelt policies next session if Gov. Landon were elected.
