

## YOUR CHILD'S HEALTH

Malnutrition is a condition of under-nourishment or underweight, and may lay the foundation for poor physical development and ill health in adult life, or possibly lead to some serious disease like tuberculosis. Parents can discover and check this condition; as well as others that are easily recognized, such as bad posture, skin diseases, bad eyesight, poor hearing, throat troubles, and many others.

The booklet, "Child Health," available from our Service Bureau at Washington may be obtained by sending the coupon below, with a dime enclosed to cover return postage and other handling costs:
