

HOW THE FEDERAL WAGE-HOUR LAW AFFECTS YOU!

Have YOU a right to the minimum wages set up by the wage-hour law? If the law applies to YOUR work, how much should your employer pay you? For straight time? For overtime? How is overtime figured? Can hours be averaged over more than one week? What can you do if you think your pay is less than the law provides? How will Uncle Sam help you to get what is coming to you under the law? Suppose your employer does not keep proper records required by the law; what can you do about it? Can you collect back wages due if your employer fails to observe the law? Are your rights under union agreements and state wage and hour laws affected by the federal law? What does the law do to protect child workers?

All these questions are fully answered in a leaflet, prepared by the U. S. Government, a copy of which you can get by filling out the coupon below and sending to our Service Bureau at Washington.

CLIP COUPON HERE

F. M. Kerby, Dept. HWS,
Daily Democrat's Service Bureau,
1013 Thirteenth St., Washington, D. C.
I want the pamphlet HOW THE WAGE-HOUR LAW AFFECTS ME, and enclose a stamped, self-addressed envelope for my copy:

MUD-JACK USED ON STATE HIGHWAYS AS PART OF MAINTENANCE PROGRAM

Mud-Jack in Operation on a State Highway

A brief news item, several weeks ago, referring to the use of a mud-jack by state highway maintenance workers to level sections of pavement where the concrete slab had dropped, resulted in a number of inquiries for pictures of this equipment and a description of its operation.

Pictured above is one of the mud-jacks operated by the State Highway Commission at work on a section of Road 1, south of Milan, where settlement of the base had resulted in a surface which produced a wavy sensation. Leveling of the low sections was in progress, with a moist mixture of top soil, and cement forced under the pavement slab by compressed air. Holes are bored in the pavement, about six feet apart, and through these the

mixture is forced under the pavement, raising it an inch or more at a time.

The mud-jack shown in the foreground is simply an air compressor, operated by a gasoline engine, and having a tank into which the soil and cement mixture is drawn and then discharged through the long hose stretched across the pavement. Proportioning of the water, soil and cement is done in a regular portable mixer such as is shown in the background. Holes in the pavement are stopped with wooden plugs while a "shot" is being placed in the immediate vicinity.

In discussing the use of the mud-jack as a part of the program by which Indiana's state highway system is maintained, T. A. Dicus, chairman of the Commission, said that it was but one of the many operations performed to keep the system in the best possible condition. Few motorists realize, he pointed out, the size of the state highway system or the many different things which must be done to protect the motorist's investment and give the best possible highway in return.

MARKETS AT A GLANCE

Stocks: firm and quiet.
Bonds: irregularly higher. U. S. governments firm.
Curb stocks: irregularly higher. Chicago stocks: irregularly higher.
Chicago stocks: irregularly higher.
Call money: one per cent.

LOOK at your STATIONERY and FORMS

Salesmen are careful about their appearance—they know that first impressions are exceedingly important. A shabby, style-of-1901 appearance does not lower customer resistance. Remember this when evaluating your stationery and forms. If they aren't up to par, let us modernize and beautify them NOW!
