than to call it a slave labor law or something like that, seems a good indication that their attitude will not last."

"With the cooperation of business and management in support of the law," he said, "we can have the greatest era of industrial peace the nation has ever seen."

Hartley's talk highlighted the evening session of the state Chamber of Commerce symposium on the law.

Vice president Clarence A. Jackson of the Chamber described the two-day session, attended by nearly 500 businessmen, as designed to "making Indiana employers better able to help make the Taft-Hartley law live up to the high hopes of its authors and of nearly four-fifths of the congress who voted for its passage."

# Pigs in China

China has 35 per cent as many cattle as this country, 35 per cent as many sheep and its hog population exceeds ours by 25 per cent. Pork is the favorite meat but is usually found only on the tables of the wealthy families. Mutton is widely used in some parts of China. Pork and other meats must be sold shortly after slaughter because of lack of refrigeration.

He told the committee that a check of 438 members showed that 76 per cent did not have \$300 left in savings and checking accounts or war bonds amounting to \$300 or more left. His statement gave a hint that an "enforced" buyer's strike might be near.

The committeemen themselves found the cost of living high. They said the \$6 a day expense money they were allowed was putting them in the red.

# Ford Pension Plan Doomed

## CIO Concedes Loss In Worker Voting

Detroit, Sept. 25 — (UP)—Richard T. Leonard, vice president of the CIO United Auto workers, admitted today that his pension plan for 108,000 production workers of the Ford Motor company was doomed.

Leonard, head of the UAW's Ford department and father of the pension plan, conceded defeat after early returns from the balloting of Ford local 600 showed 10,000 workers against it with only 3,000 voting for it. The vote of the 44,000 members of local 600 offered the last possible chance to swing the tide for the plan which had been beaten in more than 30 out of 43 locals by a margin of 10 to 1.

"I am sorry to see it happen and I feel pretty bad about it," Leonard said, "but I am certain the pension plan will be rejected by the Ford workers."

Ford had offered the pension plan along with a seven-cent hourly wage increase. By rejecting the plan, workers got an 11-cent wage increase, plus an additional 3½ cents to pay them for six holidays annually.

Leonard blamed defeat of the pension plan on the rising cost of living which he said made UAW workers choose the highest possible wage boost over a plan that would benefit them in the future.

"Their 'problems' centered on the 'no contract' policy approved recently by the ITU convention. The union decided to by-pass the national labor relations board in future negotiations with employers. It instructed locals not to sign contracts but merely to post conditions of employment and bargain on that basis alone.
