Church To Observe 75th Anniversary

St. Paul Lutheran
Service On Sunday

The 75th anniversary of the founding of St. Paul's Lutheran church, near Preble, will be observed Sunday in three services. English service, 8:45 a.m., German service 10 a.m., and an English service at 2:30 p.m. Two former pastors of the congregation will be the festival speakers, Rev. Adolf Koehler of Janesville, Minn., who served the congregation from 1912-1916 will speak in the morning services. Rev. W. H. Moeller of Van Wert, Ohio, will occupy the pulpit in the afternoon service. Rev. Moeller was the pastor of St. Paul's from 1934-1942. The pastor of the church, Rev. O. C. Busse, will be the liturgist in these services. Special music will be offered by the organist, F. C. Schmiede, and the choir under the direction of Mr. Schmiede will enhance the services with a number of anthems. The ladies' organizations of the church will serve a luncheon in the church basement after the afternoon service.

St. Paul's is a daughter church of Zion Lutheran church, Friedheim. For six years the congregation was served by pastors of the Friedheim church. In 1879 Rev. G. Spiegel was called as the first resident pastor of the congregation. Under his pastorate the present church edifice was erected. Prior to this the congregation had worshipped in a small school house which had been erected at the time of the organization of the congregation. The present church building was completely renovated at a cost of \$23,000 in 1945.

Halloween Pranks Already Begun By Decatur Youngsters

Halloween is all of three weeks away, but the youngsters have already begun their pranks, trivial and otherwise. Unidentified youths darkened much of the city Tuesday night by tampering with an easy-to-reach power switch up town. Police warned that pranksters who were not so fortunate might be electrocuted in a similar attempt.

Auto windows bedecked with soap marks are beginning to make their appearance on city streets. Some motorists have reported their horns stuck in addition to the

soapings. Defacing the windows with candles, incidentally, is the most effective trick the kids have discovered to date. The soap washes off, but the candle marks are semi-permanent.

DON'T JUDGE MEAT VALUES BY THE PRICE-PER-POUND ALONE

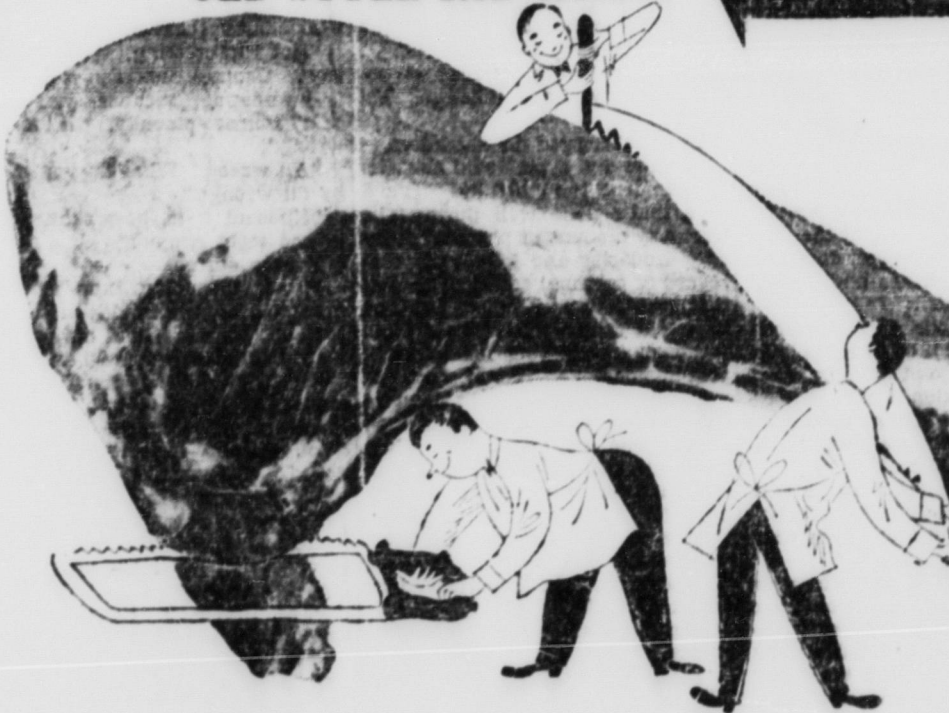

Make 3 comparisons

Here is why "Super-Right" Close-Trimmed meats give you more good eating for your money.

Three factors should govern your meat purchases: (1) the price, (2) the quality, and (3) the cutting method employed. Let's first consider price. The price per pound is NOT necessarily a guarantee of quality. IT IS NOT THE PRICE PER POUND THAT COUNTS... IT'S WHAT YOU GET FOR YOUR MONEY! Cutting methods often employed give you portions of coarse meat and bone that you can't put to best use; for example, the short ribs attached to rib roasts, the tails on steaks, and the long rib bone on chops and roasts.

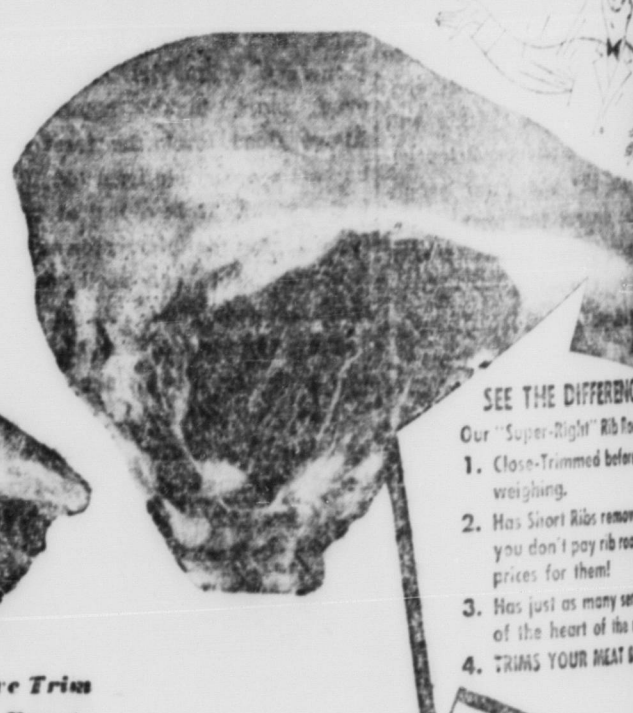

So don't jump at conclusions when you see meat advertised at low prices per pound. Here's a "lesson" on buying meat that will help you have more and better meat on your table at lower cost.

OLD STYLE RIB ROAST

see the difference

"SUPER-RIGHT" RIB ROAST

Here's how we Trim
An Old-Style Roast

This is a rib roast cut in the old style. Note that it contains an excess of chine bone, which is waste, and short ribs which, while delicious braised, are not as tender as the rest of the rib and should not be roasted. Because short ribs contain a larger percentage of bone they obviously should cost less per pound than the rib roast. At A&P we sell short ribs separately—at short rib prices not as a part of your roast at roast prices.

Here is the same fine-quality rib roast, "Super-Right" Close-Trimmed, as sold at A&P. Note that short ribs are removed, and the tip of the chine bone has been disposed of as waste. You get the very heart of the roast, and at a price in keeping with the "Super-Right" policy of giving you more good eating for your money. And there are the same number of delicious servings of the heart of the roast.

READ THIS BEFORE YOU BUY YOUR NEXT RIB ROAST

When a whole rib of beef is cut in a meat market, it consists of several parts as shown in the photo. (1) There is a prime rib roast, consisting of the first five ribs, (2) a pot roast of two heavy blade ribs, (3) a series of seven short ribs and (4) a protruding edge of the chine bone that is waste.

Let's first consider the two heavy blade ribs. These are not suitable for roasting, but are delicious as a pot roast. Obviously, if you buy heavy blade ribs for prime ribs, you are not getting your money's worth. At A&P, under the "Super-Right" cutting method, you get only the tender first five ribs as rib roasts, the two blade ribs are sold as pot roast at a considerably lower price, and the short ribs are sold as short ribs. Compare quality... compare prices... you'll prove to yourself that you can buy A&P "Super-Right" Close-Trimmed Meats with confidence and trim your meat bill too!
