Like this it seems to be a road-going airplane . . .

**THIS NEW FANDANGO** in the transportation world is the Hall flying automobile, in action at San Diego, Cal. You just back the plastic-bodied auto under the jacked-up wings (as above), hook on and zoom! You're airborne (as at right). The jacks are built-in for easy conversion from ground to air operations. Cruising speed is 100 miles an hour by air and 67 on the ground, getting 45 miles to the gallon of gasoline. Refinements of regular passenger automobiles are included, with fluid drive, low-pressure tires and four-wheel brakes. (International)

But like this it's a flying automobile.

## JOBS WANTED - NOT PROPAGANDA

As of this Friday another hundred workers in Decatur will be without jobs. This lay-off brings the total to approximately two hundred families who are learning that G.E. propaganda does not put food on the table. Businessmen in Decatur will feel the effects of this unemployment. Our entire town will be hurt.

Fighting for a FULL WORK WEEK AND A FULL PAY-CHECK FOR ALL, our Union is being met by the stubborn refusal of the Company. Faced as we are with lay-offs, we voted to share the work until the situation could be worked out. G. E. insists that it will lay-off the people Friday, saying that "It wouldn't be good business to be on a thirty-six hour schedule in boom times."

WE DON'T THINK IT'S "GOOD BUSINESS" TO HAVE TWO HUNDRED PEOPLE WALKING THE STREETS WITHOUT JOBS. OUR CONCERN IS FOR ALL OF OUR PEOPLE!

### WHY THE G. E. PROPAGANDA?

For months, G. E. has been making statements throughout the land that MORE AND MORE PRODUCTION IS the answer to the problem of inflation. THE CURRENT LAY-OFFS CONTRADICT THE COMPANY'S PROPAGANDA.

### G. E. Profits Up \$54,602,339

Net in first six months of 1948—a 29 percent increase over the like 1947 period.—This is \$52,502.00 net profit every working hour!

While putting out the propaganda that any control of prices would destroy free enterprise, G. E. faces seven anti-trust suits on the Justice Department's pending list, involving monopoly; restraint of trade; patent abuses in the manufacture and sale of light bulbs; international cartel agreement in the electrical manufacturing field; price fixing on electrical switches sold to utilities; a cartel agreement with the Krupp firm of Germany in the manufacture and sale of tungsten carbide!

It's time that we have an explanation from G. E. of some of its own practices—Time for G. E. to stop the double-talk and devote its efforts to getting work for the two hundred Decatur families.
