

## Auto Loaded With Dynamite Stolen

### Auto Is Stolen By Convicted Robber

Bakersfield, Cal., June 8.—(UPI)—Road blocks were thrown up today for a convicted robber who apparently fled in a stolen car, unknowing it was loaded with enough dynamite to blow him sky-high.

Sheriff's deputies said the convict, Lavern Speer, 23, could touch off the 50 pounds of high explosive by jumping over a bumpy road. The dynamite also could go off if the car were hit by another auto or mired by a mudhole.

Speer and his brother, Gerald, 28, escaped Monday morning after overpowering two deputies taking them to San Quentin to serve sentences on breaking up a Bakersfield hotel. Gerald was recaptured yesterday.

The younger brother, an ex-con, left with a long escape record, so he would never be taken alive or making his escape, and intended to get the people who kidnapped him.

The automobile was reported missing shortly after Gerald surrendered to sheriff's agents. One woman who spotted him, driving in the scrubby around the Kern County courthouse, Gerald apparently was waiting to rendezvous with his brother, authorities said.

Other local law enforcement officers said he might be heading north to the San Joaquin River, where he had been听说 of high explosives in the area, particularly dynamite, used for mining claims. The authorities said a few hours later that he had been seen near the Kern River, about 10 miles from the San Joaquin, who will attend most notable Nebraskan

trainee by Thursday noon. This

trainee will be furnished by Kansas

State of the Strategic Air Command

as officer said. He advised in the

way two days are remaining for

graduation from Decatur High.

Electrical equipment to help

trainee to succeed in his

new assignment, including a

radio, telephone, and

other equipment, will be

delivered from the base station

Friday afternoon at 2:30 o'clock.

The Decatur soldier is being

trained as a draftsman and his

preparation will be furnished by Kansas
