

Reckless Homicide Charged To Driver

Richmond, Ind., Sept. 19—(UP)—Police said today reckless homicide charges would be filed against Obe Murphy, 44, Richmond, in connection with the death of an Earlham College sophomore yesterday.

John C. Hendren, 19, Grosse Pointe, Mich., was killed when an auto, driven by Murphy, struck the car in which he and four other students were riding. Hendren was in the rumble seat of the car.

Police arrested Murphy and said he was operating his car while under the influence of liquor.

George Weiman Marks 90th Anniversary

George Weimann, assistant postmaster at Schumm, Ohio, and father of Mrs. Phil Sauer of this city, celebrated his 90th birthday anniversary Sunday.

A family dinner was held in the basement of the Zion Lutheran church. Scores of friends called and extended felicitations to the nonagenarian celebrant.

Besides the daughter, Mr. Weimann has two sons, Carl and Edward of Schumm. Mr. Weimann lived in Decatur several years. He was one of the charter members of the Zion Lutheran congregation in this city.

In Stumpy Point, N. C., a village of 400 persons, there is one Republican.

Evangelist

Revival services will open Tuesday evening at the Church of the Nazarene, continuing through Oct. 2. The evangelist will be the Rev. Roy A. Betcher, above, of Mooresville, who has many years of experience in this field. As the evangelist will not arrive until Wednesday, the Rev. E. D. Wolfe, pastor of the First Church of the Nazarene in Fort Wayne, will bring the message Tuesday night.

The singer will be Nelson Chamberlin, of the Fort Wayne Bible Institute. Services open each evening at 7:30 o'clock.

Say British Action Is Temporary Cure Pound Devaluation A Temporary Aid

Washington, Sept. 19—(UP)—American bargain hunters soon may find British tweeds and Scotch whisky marked down 30 percent but economists here warned today that it won't happen overnight and it may not last.

They said the announcement by chancellor of the exchequer Sir Stafford Cripps that the British pound had been cut in value from \$4.03 to \$2.80 is only a temporary cure for what has developed into a long-range headache.

Dr. Edwin G. Nourse, chairman of President Truman's council of economic advisers, said the big question is how long British manufacturers will be able to sell at the new low prices and still meet present production costs.

The benefits of devaluation largely will be erased, he said, if British producers are forced to restore higher price tags on the goods they sell in the United States and other dollar areas.

Nourse explained that devaluation is designed to permit Britain and other empire nations to sell more goods for dollars. With more dollars flowing into Britain, the British can buy the things they

need from the United States.

But if prices rise again—and economists here said they well might if British labor clamors for more wages to cover the somewhat higher living costs resulting from devaluation—the situation will return to its present stalemate.

Knox Man Is Killed As Auto Overturns

Knox, Ind., Sept. 19—(UP)—Charles Schnake, 26, Knox, was killed yesterday when his automobile overturned at the intersection of U. S. 35 and Ind. 10 near here.

Attends Meeting Of Water Works Heads

Ralph Roop, superintendent of the Decatur water department, was one of the water works operators participating in a panel discussion of records for efficient operation of water works, held recently in Wabash.

Harvey Wilkie, Purdue University, acted as moderator for the discussion and group included, in addition to Roop, F. M. Hageman, Portland; Ralph Spurgeon, Ligonier; S. W. Evans, Warsaw; Robert S. Baker, Wabash, and C. H. Romeiser, Auburn. Following the discussion, inspection trips were made by the group to the Wabash water plant, the Honeywell community center and the Ford meter box company.

New Rail Passenger Car Is Introduced

Chicago, Sept. 19—(UP)—The Budd company today introduced a new railroad passenger car with its own built-in power plant for locomotion, heating, lighting, and air-conditioning.

Powered with twin 275 horsepower General Motors diesels, the car is driven direct from the motors by use of a torque converter transmission which eliminates the need for producing electricity and driving the car with that power as in regular diesel engines.

The torque converter applies power to the car axles through use of a spinning fluid in starting and finally when the car approaches cruising speed the transmission system locks automatically into direct drive.

With engines hidden beneath the floor and water supply on a blister in the roof, the car is available full length for passengers. It can be operated from either end in a cab like a street car by one operator, and is considered particularly useful on all runs except those now served by deluxe blue-ribbon equipment in overnight express services.

The Budd company is making three types of cars available. One

type, demonstrated today in a run to Valparaiso, Ind., from Chicago over Pennsylvania railroad lines, is a passenger car with seats for 90.

Another is a car with a 17-foot baggage compartment and seats for 71 passengers. A third is a 17-foot baggage compartment, a foot railway mail service compartment, and seats for 49 passengers. The cars can be used singly or multiples.

Trade in a Good Term —

PUBLIC AUCTION

REAL ESTATE AND PERSONAL PROPERTY AT WREN, OHIO

Tuesday Eve., Sept. 27th — 6:00 P.M.

HAUGKS

High wages—Low prices? We can have them!

A lady sat down at day's end before a weary shoe clerk. She began to tell him just exactly what she wanted. But soon the salesman broke in with "Yes, yes, lady, I know—big inside but little outside."

That's just the way we are about wages and prices.

We want high wages. But we want low prices too.

Labor is about 85% of the cost of getting goods from the ground to the ultimate user. To get this big labor cost inside of low prices, we have really got to have lots of help with the shoehorn.

But we can do it!

We can have low prices with high wages—if we each in this country turn out a lot of goods in a day for that day's high

pay. For we can then buy lots of goods from each other with our day's pay.

If we each turn out little goods for lots of pay, we will each be able to buy just little goods for our big pay.

How can we each get more done during our day's work?

Nobody in his right mind wants to get it done through having employees put forth more or harder body effort than ought to be in an honest day's work by our reasonable modern standards.

So the extra goods from a day's work—the extra goods that can then be bought with a day's pay—have got to be produced largely with our minds instead of our muscles!

We each have to put our most fruitful thinking into waste elimination, improved designs, and arm-lengthening tools and methods . . . into heightened interest, ingenuity, skill, and care in increasing productivity and making a given amount of cost result in as many goods as possible.

This kind of thinking by us all is the shoehorn that can help us squeeze the big cost foot into the little price shoe.
