The colonel pointed out that in event the report of enemy action was false the bomber pilot is prevented from making an attack by a plan called "fail safe" which is "proof against error, human or mechanical."

## Branch Factory To Locate At Geneva

### Branch Factory To Locate At Geneva

A new factory, employing between 25 and 50 persons, will begin operations in Geneva within 45 days.

The factory, producing sliding glass doors and windows, will be a branch expansion of the Nudor Manufacturing Co., North Hollywood, Calif. Remodeling will start at once, and production will begin in about a month and a half.

Negotiations were carried on by the Geneva businessmen who own the building, formerly the Fulton glass building, and later the Reliance Spool Corp., and Herman Steegman, area development consultant for Indiana-Michigan Electric company, and Nudor officials.

The producers of Club 21 sent an invitation to the school after inquiries had been made earlier by the students on active participation in the show. Each Saturday night, for an hour and a half, various schools in the Fort Wayne and neighboring city area are invited to send delegations to take active parts in the show. The students dance to recorded music, are interviewed by the master of ceremonies, games are played and refreshments are served.
