To Crack Down On Expense Accounts

NEW YORK (UPI)—The federal tax collectors plan to crack down sharply this year on business men and their expense accounts.

Uncle Sam may make such an example of some that they and their bosses will wind up paying a tax on their real income that is more than their salaries.

Internal revenue officials in New York said today they are being driven to action not only by the need for revenue but by floods of complaints from people who don't have expense accounts and who "are furious at what they see some of their neighbors getting away with."

Form 1120, the 1959 corporate tax return, will ask column—of embarrassing questions about company-operated yachts, hunting lodges, hotel space, vacation allowances, and use of credit cards, the attendance of wives and children at business meetings, and how closely commission salesmen's expense accounts are checked against commissions.

The main Internal Revenue Bureau in Washington has come up with some dandies in previous expense cheating. One man tried to charge off all his son's college fees as a contribution to his alma mater... visits to phony branch offices at swank resorts are a growing means of tax swindling... another business man claimed a "necessary deduction" for a sports car used by his son in college... many cases of "lunch groups" who ate together regularly on credit cards, with a different man charging off lunch for all each week as tax deduction, were found.

"We're going to take an extra close look at the returns of corporations that make big use of credit cards," New York tax officials said.
