

Dairy Month To Be Featured By County 4-H Clubs; Eight Girls Will Appear On TV

Eight outstanding 4-H girls from Adams county will appear on Wayne Rothgeb's "June Is Dairy Month" television show on WKJG-TV in Fort Wayne on Tuesday and Wednesday, June 21 and 22. They will all demonstrate the use of different dairy products featuring milk, butter, cheese, cottage cheese and ice cream on the program which will be telecast at 12:15 p.m. These dairy programs are being held in observation of "June Is Dairy Month."

All older 4-H girl junior leaders were given an opportunity to appear on television and the eight interested girls have been working and planning their demonstrations. Girls who will be appearing on television are: Karen Cauble of Kirkland township; Linda King of St. Mary's township; Gail Egly of Jefferson township; Esther Brehm of Monroe township; Kathy Brunstrup and Barbara Carver of Blue Creek township; Connie Bergman and Marsha King of Root township.

Last evening the girls held their second meeting at the WKJG-TV studios in Fort Wayne. They were given a tour of the television studio and also met with Wayne Rothgeb and the producer of the show to finish plans for their appearances on television next week. Accompanying the girls were Mrs. Clair Carver, Sally McCullough and Gloria Koeneman.

To Appear Wednesday
Kathy Brunstrup, Karen Cauble, Linda King and Connie Bergman will appear on the Tuesday show and Gail Egly, Barbara Carver, Marsha King and Esther Brehm will appear on the Wednesday show.

Miss Gloria Koeneman, who is working on dairy promotion during the month of June arranged for the Adams county 4-H girls to appear on television and planned for the shows with Wayne Rothgeb for dairy products promotion during "June Is Dairy Month."

Koeneman To Speak
Several 4-H clubs, church organizations, service organizations, Farm Bureau groups and home demonstration clubs who will be meeting during the remainder of the month of June will devote part of their meetings to hearing about dairying, dairy products and the dairy industry. Miss Gloria Koeneman, who is working on dairy promotion for the American Dairy Association is scheduled to talk to the following organizations during the remainder of the month: Preble Peppy Pals 4-H club, Decatur Lions club, Fort Wayne Optimist club, Zion Lutheran Walther League, Monmouth Merry Maids 4-H club, Monmouth Junior Merry Maids 4-H club, Fort Wayne Lions club, Merry Matrons home demonstration club, Decatur home demonstration club, St. Joe Jills 4-H club, Preble Jolly Juniors 4-H club, Decatur Peppy Gals 4-H club, Kirkland Kut-Ups 4-H club, St. John's Guild, Farm Bureau picnic, Preble township Farm Bureau meeting, Jolly Housewife home demonstration club, Sunny Circle home demonstration club, Columbia City Kiwanis group, Live and Learn home demonstration club and the Montpelier Kiwanis group.

During the past week she spoke at the Hartford City Kiwanis club, Merrier Monday's home demonstration club, Port Wayne Kiwanis club, Hoagland boys 4-H club, Madison Maidens 4-H club, Marion township (Allen county) Farm Bureau meeting and the Friendship Village home demonstration club.

One Of Twelve
All during the month, Miss Koeneman has been, and will be speaking to various organizations stressing the importance of the use of milk and dairy products in everyone's daily diet.

There are twelve young people in Indiana, representing 4-H clubs, Future Farmers of America, Future Homemakers of Indiana and the Indiana Rural Youth, who are presenting dairy promotion talks throughout the state. Miss Koeneman is one of three Indiana Rural Youth members working on dairy promotion.

Farm Booklet Available At Paper Office

AKRON, Ohio—City-bred boys are overlooking one of today's best bets in careers—agriculture. And farm area youth owe it to themselves not to overlook how green the grass is in their own back yard.

That's the message of a new four-color cartoon book just published by The B. F. Goodrich Company. Called "Tommy Looks at Farming," the picture-story portrays opportunities in agriculture for high school and college graduates. It also calls attention to the importance of mechanized equipment in raising American farmers' yield-per-acre to the world's highest.

Tommy learns that you don't need to be a farmer to be in agriculture today. Scientific farming calls for skills in such fields as agricultural and biological chemistry, rural economics and sociology, veterinary medicine, agricultural engineering, agronomy, zoology, entomology, marketing and research. And there are more than 500 distinct occupations within these fields.

Story concerns Tommy Johnson, city-bred teenage hero of a series of B. F. Goodrich cartoon books and films, who spends a summer on his uncle's farm. In contrast with Tommy's enthusiasm for farm life is the attitude of Bill Wade who, though brought up on a farm, is just waiting to swap farm life for the city as soon as he finishes high school.

Tommy gets a firsthand look at the Johnson farm, a prize example of scientific farming. His Uncle Jim keeps up to date on chemicals that control plant pests—mechanized equipment that does the work of many men—and newest techniques of farm management that increase yield-per-acre. Uncle Jim is typical of the American farmer who out-produces his counterparts in every other nation in the world. Today, one American farmer produces enough food for 24 persons.

The new cartoon book is the third in a series of "Tommy" books published by the B. F. Goodrich Company. More than six million copies of one book in this series, "Tommy Gets the Keys," dedicated to making the nation's youth safer drivers—have been distributed, largely in the nation's schools. Initial printing of "Tommy Looks at Farming," three million copies, is the largest single press run ever made for school distribution of an industrially sponsored cartoon book. If the books were placed end to end they would form a stack as high as 1,340 Empire State buildings piled atop one another. The ribbon of paper required to print the books would be 29 inches wide and 1,560 miles long—about the airline distance between Boston and Dallas.

First distribution of the book was to the nation's junior and senior high schools, as an insert in the May 4th issue of Scholastic Magazine. The insert was delivered directly into some 100,000 classrooms across the nation, to more than 2,300,000 student and teacher subscribers. A full-page teaching guide, prepared by the editors to facilitate classroom discussion, appeared in the teachers' edition.

Architecture Guild Award To Valpo U.
VALPARAISO, Ind.—The recently dedicated 3,300-seat Valparaiso University chapel has received the 1960 church architectural guild of America award. The 341-foot-long building with a nave height of 58 feet and a chancel height of 105 feet towers over the new east campus of the Lutheran church-Missouri synod affiliated university.

The chapel design incorporates features of the "Church of the Nativity" at Bethlehem. The 61-bell electronic carillon in a free-standing campanile sounds the call to worship on Sundays and for daily matins. It also notes the beginning and end of classes. The award was made to St. Adalbert, and Anderson, architects of Park Ridge, Ill. Principal architect for the chapel was Charles E. Stadel.

Wheat Allotments Due June 30

The ASC county office is accepting wheat allotment applications for certain farms. A producer who intends to seed wheat for harvest in 1961 on a farm for which a 1958, 1959, or 1960 allotment was not established, irrespective of whether or not wheat was seeded for harvest as grain in one or more of these years and who wishes to be considered for an allotment must make application for an allotment according to James Garboden, chairman of the Adams County Agricultural Stabilization and Conservation office.

For the entire feeding year (October 1959 - September 1960), total use of feed grains is expected to be around 7 million tons above the 150 million tons consumed last year. However, even this high rate of disappearance would fall somewhat below the record 1959 feed grain crop and would result in a slightly increased carryover into the 1960-61 feeding year.

Present information, according to James Garboden, chairman of the Adams County ASC committee, is that corn disappearance in 1959-60 may reach a record level of close to 4 million bushels. Disposition of wet corn, heavy feeding of cattle and slightly more hogs on farms than a year earlier all contributed to the heavy disappearance of corn during the past six months.

Total sales of corn by farmers from the bumper 1959 crop are estimated at 1 billion 683 million bushels—the largest on record. Sales of other feed grains were smaller than in 1958-59, reflecting the smaller 1959 crops.

Total cash receipts from sales of corn, grain sorghum, oats and barley in 1959-60 are estimated at \$2.5 billion, or \$53 million more than from the 1958 crops.

Exports of feed grains from the United States in the first half of the 1959-60 feeding year slightly exceeded the record of a year earlier, and for the entire year exports are expected to reach a record high of around 13 million tons.

If at least two-thirds of the farmers who vote in the referendum approve the 1961 quotas, then quotas with penalties on "excess" wheat will be in effect, and price support will be available on the crop at not less than the minimum support to be announced before the referendum.

If more than one-third of the votes oppose the quotas, there will be no quotas or penalties in effect, and price support will be available at 50 per cent of parity to farmers who comply with their allotments.

This is the eighth successive year for which wheat marketing quotas have been proclaimed. They have been approved in a referendum for each of the past seven years.

Word Received Of Miller Lock Death
Word has been received here that Miller Lock, son of Mrs. Charles Lock of Chicago, and the late Mr. Lock, was injured in a fall and died later in a hospital of a heart attack. He was a former resident of Decatur.

Mrs. B. G. Thomas Reelects Secretary
Mrs. B. G. Thomas, of Decatur, was reelected secretary of missionary education for children of the Indiana north branch of the WSW of the Evangelical United Brethren church at its ninth annual convention which closed Wednesday.

Mrs. Paul Temple, of Geneva, was reelected secretary for missionary education. Mrs. Norbert Huffman, of Berne, was appointed group leader for the Decatur group.

More than six-hundred women attended the three-day session to hear the Rev. Elton P. Garrison, missionary to Osaka, Japan, Miss Joyce Rohde, a teaching missionary to McCurdy high school, Santa Cruz, New Mexico, and Miss Lois Miller, general secretary of Missionary education for children and youth, Dayton, Ohio.

Feed Grains Disappear At Record Rates

The disappearance of feed grains set a new record during the October 1959-March 1960 period and is continuing at a heavy rate, according to the latest U. S. Department of Agriculture report on the feed grain situation received at the Adams County Agricultural Stabilization and Conservation office.

For the entire feeding year (October 1959 - September 1960), total use of feed grains is expected to be around 7 million tons above the 150 million tons consumed last year. However, even this high rate of disappearance would fall somewhat below the record 1959 feed grain crop and would result in a slightly increased carryover into the 1960-61 feeding year.

Present information, according to James Garboden, chairman of the Adams County ASC committee, is that corn disappearance in 1959-60 may reach a record level of close to 4 million bushels. Disposition of wet corn, heavy feeding of cattle and slightly more hogs on farms than a year earlier all contributed to the heavy disappearance of corn during the past six months.

Total sales of corn by farmers from the bumper 1959 crop are estimated at 1 billion 683 million bushels—the largest on record. Sales of other feed grains were smaller than in 1958-59, reflecting the smaller 1959 crops.

Total cash receipts from sales of corn, grain sorghum, oats and barley in 1959-60 are estimated at \$2.5 billion, or \$53 million more than from the 1958 crops.

Exports of feed grains from the United States in the first half of the 1959-60 feeding year slightly exceeded the record of a year earlier, and for the entire year exports are expected to reach a record high of around 13 million tons.

Morton Railing To Head Disabled Vets

Morton Railing was elected commander of the DAV for the 1960-61 year, at the meeting held Thursday night. Also elected to office were: Jerome Heimann, senior vice commander; Fred Pomeroy, first junior vice commander; Felix Yoder, second junior vice commander; Herald Hitchcock, treasurer and Ralph Conrad, chaplain. Gordon Brobeck was named three-year trustee. Victor Steiner was voted two-year trustee, and Rufus Sommers was elected one-year trustee.

Ed Zeser was elected sergeant at arms. Guy Allen was picked as officer of the day and Ed Bauer was voted adjutant. Several of the DAV members traveled to Elkhart this week for the DAV convention, which is now in progress. The next meeting will be July 7, at which time the new officers will take over.

Injuries Are Fatal To Three-Year-Old Boy

FORT WAYNE, Ind. (UPI)—Albert E. Miller, 3, Spencerville, died in Parkview Memorial Hospital Friday of injuries received six days earlier when a buggy he was riding in was struck by a car.

The buggy, driven by the boy's father, William, was hit on Ind. 101 northeast of Harlan in Allen county by a car driven by Wayne D. McNabb, 20, Woodburn.

Man Killed Fleeing Scene Of Burglary

MUNCIE, Ind. (UPI)—A 25-year-old North Carolina man was killed shortly before midnight when a state trooper and a county deputy sheriff fired shots at him as he fled a burglary scene.

The dead man was identified as Jay D. James, route 6, Marshall, N.C. In his billfold police also found a card indicating he had a Muncie address.

County Agent's Corner

Corn Fields

We need more cooperation from the weather man so some of the corn fields can be cultivated. Some of this corn has all together too much pasture, but it makes an interesting comparison with corn planted under minimum tillage. Go over to the Berne-French School Farm and look at the trial plots; you'll be interested in the way they have responded. Also you might check with one of your neighbors who tried minimum tillage this year — get his reaction.

Kill Weeds In Corn With 2,4-D
Should broad leaved weeds, such as horseweed, smartweed, ragweed, cocklebur or morning glory threaten your corn crop, spraying with 2,4-D may be your answer to the problem. Corn is sufficiently tolerant to 2,4-D, so that dosages that will kill many weeds should not intended to replace cultivation but to be used in combination therewith. Often times spraying will reduce the number of cultivations necessary. It will also clean up the weeds in the row where the cultivator cannot reach.

The stage of weed growth rather than the size of the corn should be the guide used in timing applications of 2,4-D in corn. When early-growing weeds are a problem, spraying may be done while the corn is small. When late growing weeds are a problem, spraying should be delayed until the weeds have emerged. When spraying large corn (12 inches or higher) drops should be used on the sprayer so as not to apply the spray over the top of the corn plants.

Two-thirds of a pint of a 40 percent 2,4-D in 10 gallons of water per acre is considered the proper dosage. Either the amine or ester forms of 2,4-D may be used. When ester forms are used the "low volatile" type is preferred. It is not as volatile as the regular esters and is safer to use near susceptible crops as soybeans, tomatoes and clovers. Do not overdo as there is danger of damaging corn with 2,4-D.

Variety Plots
The wheat and oats variety plots were marked recently. A sign indicating a demonstration plot was put up and the varieties were marked with signs. The wheat plot is on the Henry 1 1/4 mile farm 3 miles south and 1/4 miles west of Decatur and includes the varieties of Vermilion, Laporte, Monom, Dual and Knox. The oats plot is on the Elmer J. Isch farm, 4 miles west of Monroe and field is 1/2 mile south. Oats varieties are Putnam, Minnhafer, Newton, Bentland, Clinton 59, Clintonland 60, and Goodfield. Meetings at each of the plots will be held in a couple of weeks.

4-H Public Speaking
Pat Ruble of Union Township won the 4-H public speaking contest held recently. She will represent Adams County in the district contest to be held on July 7 at Wabash.

June, Dairy Month
The 4-H Junior Leaders toured the Home Dairy at Berne for their June meeting. The dairy furnished refreshments of milk to the group.

Ag. Alumni Meeting
L. E. Archbold spoke to the ag. alumni group recently on his trip to Mexico.

Berne Student Gains Degree From Harvard

Wallace D. Flueckiger, of Berne, is one of the 3,000 students at Harvard University who received a degree Thursday. Flueckiger received a master's in business administration. This was the 309th commencement of the university. There are 26 others from Indiana also receiving their degrees.

Has Severe Reaction From Bite Of Insect
An insect bite, either a mosquito or fly, caused Elmer (Chalky) Wintereg, county coroner, to suffer a severe allergic reaction Thursday afternoon, hospitalizing him overnight.

The bite caused a reaction that made it difficult for him to get his breath, but it lasted only a few hours, and Friday he was able to go back to work immediately on dismissal from the hospital.

Turning dairy cows out on pasture too early may damage the permanent or rotation pasture by excessive trampling while the ground is too wet and soft, advises Purdue University dairy scientists.

Of This And That

By: Lois M. Folk
Home Demonstration Agent
We're "knee deep" in June with the flowers in bloom. Activities in the county are spinning and they will spin faster and faster until August 2, 3 and 4, when the 4-H Fair is in full swing.

Fashion Clinic
Fashions galore, but how do you wear yours? This is what county 4-H girls discovered Friday evening at the 4-H Fashion Clinic. Mrs. John C. Carroll, 4-H leader of the Kekiongas 4-H club explained the right and wrong way of wearing and selecting accessories while models illustrated the suggestions. Following the meeting, refreshments were served.

Models for the evening were: Judy Yoder; Gail Egly, Lois Jean Gerke, Rita Norquest, Ellen Kay Lindsey, Judy Mosser, and Sharon Martin. Those serving on the committee were: Mrs. Holman Egly, Mrs. Raymond VanEmon, Mrs. John C. Carroll, Mrs. Kermit Yoder, Mrs. Ben Gerke, Mrs. Chester Baumgartner, Miss Karyl Kipfer, and Miss Judy Yoder.

Junior Leader Conference
Five Adams county 4-Hers will attend the Junior Leader conference June 22-25 at DePaul University. The group will leave at 6 a.m. for Huntington on the 22, where they will board a chartered bus for the trip to DePaul. Those attending from Adams county will be: Karen Cauble, Jeannie Stolz, Cindy Collier, Larry Duff, and David Bailey.

Junior Leader Training Camp
Four Adams county 4-Hers will attend the Junior Leader Training camp at Camp Limerlost in LaGrange county June 23-26. The group composed of Connie Bergman, Lois Jean Gerke, Esther Brehm, and Stanley Hill will receive training in several areas of camp life. After the training camp the group will remain at the camp to help with the Adams-Wells county 4-H camp.

4-H Camp
Applications have been arriving for the Adams-Wells county 4-H camp. The camp will be held at Camp Limerlost June 26-29. Buses will leave at the following times: Berne, 11:30 a.m.; Copps, 11:45; and Decatur, 12 noon. For a lot of fun camping, join us!

Homemaker's Conference
Area women attended a homemaker's conference recently and everyone had a good time. At least if you were around Hall X you would have thought so. Conference sessions were informative and interesting, but the leaders will discuss them at the July home demonstration meetings.

During the annual business meeting, Adams county received a certificate for starting a new home demonstration club during 1960. Also, since we had 100 per cent of our voting delegates at the conference, we received home demonstration decals. Both awards were presented to Mrs. Dan

Striker, county president.
June Is Dairy Month
Since fruit is becoming plentiful, here is a sauce which makes a delicious dessert.

Four Custard
1 1/2 cups milk, 2 egg yolks, 1/4 cup sugar, dash salt, 1/4 teaspoon vanilla extract. Heat milk in top of double boiler, over direct heat, until tiny bubbles appear around the edge. Beat the egg yolks with the sugar and salt just enough to blend thoroughly. Very slowly, pour the hot milk into the egg mixture (beat constantly). Return the mixture to the top of the double boiler, and place over hot, but not boiling water to cook. Cook, stirring constantly, until a thick coating of custard forms on a metal spoon dipped into it, or about 10 minutes. Pour the custard immediately into a bowl, and cover, so a skin won't form on top. When cool, stir in flavoring. Makes 1 1/2 cups. Serve, chilled over fresh fruit or pudding.

Ohio Holstein Completes Record

BRATTLEBORO, Vt.—The Holstein-Friesian Association of America has announced the completion of an outstanding official production record by a registered Holstein cow in this area.

Gamble Pabst Burke Inks 3839-234, owned by Lester F. Weck, Ohio City, Ohio, produced 17,521 lbs. of milk and 641 lbs. of butterfat in 365 days on twice daily milking as a 5-year-old.

The Ohio State University supervised the weighing and testing of production as a part of the official herd testing programs of the national Holstein organization. These programs provide continuing lactation and lifetime production records on every cow in more than 2,600 participating registered Holstein herds.

A firm seedbed is important when seeding grasses and legumes, says North Dakota Agricultural College. In fact, the college adds, it is almost impossible to get the seedbed too firm.
