**Ohio Senator Blocks  
Postmaster's Job**

The appointment of Donald P. Hurless, nominated several months ago, is one of 38 postmasterships being blocked by Democratic senator Stephen A. Young, of Ohio. Sen. Young, as most senators of the "out" party, is holding up all postmaster nominations until after the fall election, so that Democrats instead of Republicans can be appointed if Sen. Kennedy defeats Nixon for president.

It is a senatorial custom not to confirm a nomination if a senator from the state involved declines to approve the nomination.

**FASHIONS IN FIGHTING GARB**—Over a century and a half of American history is represented in the uniforms worn by these men. From left to right the soldiers are: World War II infantryman, Civil War sergeant, Continental Army officer and private from the Revolutionary War, and a dress uniform worn at the time of the Mexican War. The object they stand beside is a Discoverer recovery vehicle, a modern item in America's military research effort and designed to be the first man-made object recovered from space.

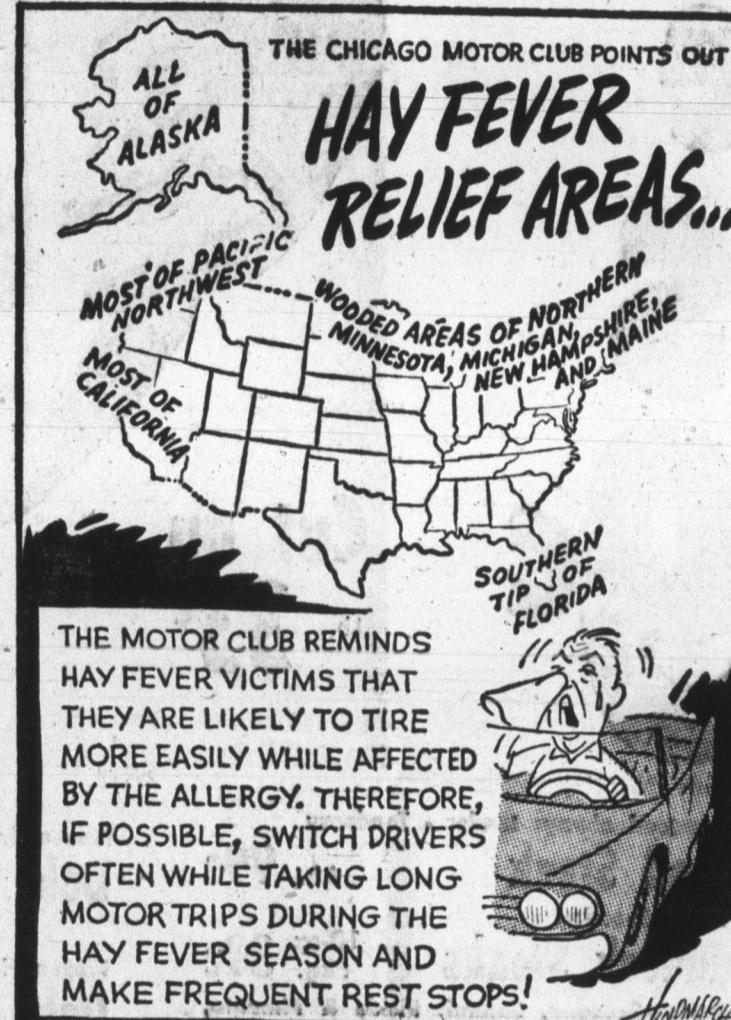

**Human Flies Paint  
Decatur Bridge**

About 18 "human flies" were found working on the St. Mary's river bridge on U.S. 27, just outside Decatur today. The men are from Baker Bros. of Indianapolis, and will be working on the bridge the next few days.

They are cleaning off the bridge, removing the rust and then will give it a good coat of red lead paint where the rust appears on the bridge. After the red paint dries, they will give the bridge two coats of aluminum paint. The northbound lane of traffic is blocked off under the bridge making it one-way traffic.

After the red paint dries on the east side of the bridge, southbound traffic will be held and the west side of the bridge will be painted. The reason for blocking one lane is to prevent any paint from dripping on the cars.

True (Tabby) Andrews, bridge inspector for the state highway department, who inspects the bridges when they are finished, said that six other bridges in the county are to be painted, including the Wabash river bridge near Geneva, a bridge south of Geneva, one east of Geneva, another east of Monroe, one in Blue Creek township and the overflow bridge on 27, just north of the bridge now being painted. The overflow bridge has steel underneath and must be worked on.

**American Speech  
Called Propaganda**

STOCKHOLM (UPI)—A Swedish official of the International Astronautical Congress today interrupted American space expert Spencer Beresford midway through a speech in which he said that U-2 reconnaissance flights were legal.

Curt Groenfors, chairman of the congress's space law meetings, had insisted even before Beresford gave his address that it was "political propaganda." He said the part of his speech "dealing with the U-2 incident will not be put on the congressional records."

Many Adams county residents traveled to Elwood to hear the acceptance speech of Wendell L. Willkie, Republican nominee for U. S. president.

Beresford is a counsel for the U.S. House space subcommittee.

He was permitted to resume his talk after British delegate Christopher Shawcross left the session in anger, protesting that Groenfors had no right to interrupt the American.

The American's speech, entitled "High Altitude Surveillance in International Law," contended that U-2 flights, such as the one made by Francis Gary Powers, about to stand trial on Moscow charges of espionage, were legal.

**Bluffton's Tax Levy  
Estimated At \$7.67**

Bluffton's tax levy may total \$7.67 this year, as the city rate hit \$1.94 (estimated); school, \$3.81; county, \$.97; welfare, \$.19; poor, \$.08; county school, \$.27; library, \$.14; township, \$.05; hospital, \$.10; hospital bond, \$.04; hospital building, \$.05; 4-H, \$.02; and state, \$.01. Last year's rate was \$7.12. Decatur has an estimated rate of \$6.56, compared with \$6.24 last year.

Today's report said consumer goods output in July was somewhat lower than June. Business equipment lines reported record production, however, and materials production held steady in July after declining during the first half of the year.

Auto production fell about 12 per cent last month, partly reflecting strikes at plants of a major producer, the board noted.

The over-all production index

has moved within a relatively narrow range this year. It registered 111 last January—matching the all-time record high—and dropped to 109 in June.

Today's report said consumer goods output in July was somewhat lower than June. Business equipment lines reported record production, however, and materials production held steady in July after declining during the first half of the year.
