

Ministers Planning Migrant Ministry

The Adams county ministerial association needs help to make its new program of providing a cooperative "migrant ministry" for migrant workers and tomato pickers in Adams county this year, Rev. Charles Hill said today.

A committee, headed by the Rev. Marvin Zehr, minister of education for the First Mennonite Church of Berne, has been appointed to work out plans and a program for the months of August and September, or as long as the need exists.

Sees Farm Workers

A special school for migrant workers was sponsored by the Indiana council of churches June 15-16 at Camp Mac, near Warsaw. Rev. Hill represented the local committee at that meeting.

"It is not until one becomes actually involved in the work, that he realizes the extent and the potential of that work," Rev. Hill stated. "This school was an actual contact with migrant workers and their situations. It was a fruitful experience."

The chief purpose of the migrant ministry is to carry out the words of Jesus, "It is more blessed to give than receive," Rev. Hill added.

United To Serve

In the migrant ministry, the churches are united to serve men, women, and children who are following the crops. This program is encompassed in the Christian faith, and seeks to share that faith with the migrant, and to develop in him a sense of his personal worth, belonging and responsibility.

"It seeks to awaken the community to the opportunity and obligation of sharing equally all the protective benefits and warmth of community life. It challenges the local churches to include these seasonal neighbors in their concern and full fellowship."

"It calls on the state and nation

to apply Christian principles to the economy in which migrants live and work," Rev. Hill said, quoting from the purposes set forth by the national migrant committee in December, 1953.

Each year 18,000 migrants come to Indiana to help in the annual harvest of crops. The time of their arrival and length of their stay depends on the nature of the season or the crop. Here in Adams county, migrant workers usually help with the tomato crop. In former years, large numbers helped with sugar beets.

The Adams county migrant ministry has been organized chiefly upon a voluntary basis. All workers are volunteers, except one. One person has been hired for a very nominal fee to organize the work.

If You Can Help

"We, the people," Rev. Hill stated, "will carry on the real ministry. This ministry provides programs of supervised play; crafts and stories in Christian nurture; wholesome recreation for children, single men, whole families; health aids; instruction in nutrition, food preparation, sanitation; access to clinics, hospitals, immunization programs; sewing and homemaking help given by united church women; meaningful sharing of the spirit of the Master, whose concern was with the least of these, His brethren."

"If you have the desire to help in this kind of a ministry, please contact one of the following in your community: Decatur, call Rev. Charles M. Hill, 3-3821; Berne, call Rev. Marvin Zehr, 2-2202, or 2-3262; Geneva, Rev. Howard Cress, 368-7655."

White Breaks World Record Altitude Mark

EDWARDS AFB, Calif. (UPI)—Air Force Maj. Robert M. White today enjoyed the distinction of being America's only "winged astronaut."

The 38-year-old test pilot qualified for his astronaut wings Tuesday by rocketing the X15 rocket plane to a world record altitude for winged aircraft of almost 59 miles.

He made the altitude record—310,000 feet or 58.7 miles—on his 16th flight in the rocket ship. He bettered the old record of 46.7 miles, which he shared with another X15 pilot, Joseph Walker, by 12 miles.

White holds the X15 speed record—4,159 miles an hour. Tuesday's flight was not a speed test and the plane was clocked at "only" 3,784 miles an hour.

White took his record more or less in stride. With a straight face but with a twinkle in his eyes, he said in answer to a question at a news conference, "This impressed me as being a very unusual flight."

Son Greets Him

His 7-year-old son Gregory was on hand to greet him as he landed and someone asked what the boy's reactions were.

His eyes twinkling once again, White said, "I would say he was impressed generally but he's not quite 8 years old and I would hesitate to interpret his reactions."

White had given strict orders to Air Force public relations people to prevent any attempt by newsmen to question his son. It was said that he does not like to have his family in the public eye. His wife, Doris, did not make an appearance. In addition to Gregory, they have two daughters, Pamela, 4, and Maureen, 2.

White, like so many of his colleagues in aerospace programs, speaks well and thoughtfully and responds quickly to questions.

He is a pleasant-looking man of medium height and build and has brown hair and blue eyes. White has an electrical engineering degree from New York University and is assistant chief of flight test operations at Edwards.

Fussing Incident

At his news conference he volunteered some information on a puzzling incident. He said he saw a paper-like object tumbling through space outside the X15 and admitted frankly he didn't have the faintest idea what it was. But he added that he thought "in all conscience," he should talk about it.

"We've never seen anything like this before," he said. "I haven't got the slightest idea what it was. As I went over the top, I saw a couple of particles go by the airplane. They showed up again. They were very small, flaky objects and I thought they were from the residue of peroxide which the engine burns."

"Then I saw another larger object to my left. It looked like a piece of paper about the size of my hand."

He said he did not believe cameras attached to the X15 were in position to record the object.

Decatur Youth At Howe Summer Camp

HOWE, Ind. — Joseph F. Azbell, Jr., 8, is attending Howe Military school summer camp at Cedar Lake. The camp, under the direction of lower school principal Marx D. Merrel, is located just a few miles northeast of Howe school.

Joseph is a son of Mr. and Mrs. Joseph F. Azbell, 207 Lumberlost Trail, Decatur.

Bonfiglio Attends Summer Encampment

S/Sgt. Anthony A. Bonfiglio, 616 W. Grant street, a member of 9516th Air Force Reserve Recovery Sq., 8575th AFRRG, Fort Wayne, is attending 15 days summer encampment at Bakalar Air Force Base, Columbus.

Bonfiglio, along with other members of the same unit, left Sunday and will be released to the home station, Baer Field, Fort Wayne, July 29.

Bayh Assails Senate Record Of Capehart

WASHINGTON (UPI)—Birch Bayh, Democratic nominee for the U.S. Senate in Indiana, will ask President Kennedy to campaign in Hoosierland before the November election.

Bayh, here to attend a "school" for Democratic candidates, predicted Tuesday that he will defeat Sen. Homer E. Capehart, R-Ind., in a "tough" fight.

At a news conference, Bayh attacked Capehart's record and characterized his GOP opponent's three terms in the Senate as "18 years of nothing."

He was asked about Capehart's claim that he draws more applause at campaign meetings by his call for an invasion of Cuba than by any other discussion of issues.

"I think it is foolhardy on the part of a man who has been in the Senate for 18 years to want to declare war on the basis of an applause machine," Bayh said.

"Unquestionably the people of Indiana would like to see (Cuban Premier Fidel) Castro removed from the scene. But those same people who applaud the removal are going to think a long time when they realize it's their brothers or husbands or sons who would be on the beachhead and not the senior senator from Indiana."

Bayh praised Indiana Democratic leaders for steps to save wounds left by the recent state party convention and said he felt the action would help in the coming campaign.

Under the political shuffle announced Monday, Indianapolis Mayor Charles Boswell, who opposed Bayh for the senatorial nomination, would become Indianapolis postmaster. James E. Noland would succeed him as Marion County (Indianapolis) Democratic chairman and Marion County Prosecutor Phillip L. Bayt would become mayor.

"It cannot possibly hurt us,"

British Court Denies Soblen Freedom Plea

LONDON (UPI)—Britain's highest court today rejected Dr. Robert Soblen's plea that he be set free in England or some other country to escape life imprisonment in the United States as a Soviet spy.

Soblen's attorneys promptly announced they would appeal and the court said they had 14 days in which to file it.

The court did not rule on whether Soblen now could be sent back to the United States immediately.

There was some confusion how the appeal would be made. A civil appeal—and today's ruling came in a civil court—must go to the court of appeals, while a criminal appeal can go only to the House of Lords.

After today's court ruling, a Home Office spokesman said "no immediate action" would be taken on Soblen's request for political asylum despite the high court's refusal to release him.

"It will be considered," the spokesman said of Soblen's request to stay here. He said the next step awaited the nature of Soblen's appeal action.

Lord Chief Justice Parker, who announced the decision of the three-judge Queen's Bench, said he doubted the government would allow Soblen to be removed from the country while an appeal was pending.

This meant it would be some time before U.S. authorities could get their hands on Soblen, if ever. The fugitive psychiatrist also still has pending a request to the British government for asylum.

The 61-year-old Soblen sat dejected, his head buried in his hands, as the court rejected all his arguments that he was entitled to be freed from British custody and allowed to go on his way.

Soblen's counsel had argued that the very fact the fleeing spy had been permitted to land from an Israeli airliner July 1 and was taken to a hospital was tantamount to formal permission to land.

Part of the west wall of the Decatur light department building, which will revert to the city when the electric equipment sold to Indiana & Michigan is removed, was torn down because it was a common wall with the adjoining buildings authorized to be torn down by the city, Mayor Donald F. Gage said at the city council meeting Tuesday night.

The mayor also asked when the city water department would be through using the water pumps in the building, as I & M wants to take line boards out of the building, and the condensers in the basement, but must interfere with the pumps to do it.

Connections To Two Water Towers Leak

A check of the connections between the two water tower pits and the 12 inch water mains leading to them shows that both leak, city engineer Ralph E. Rupp told the city council Tuesday night.

The project engineer has been notified, and he has informed the installing company, so that this can be corrected before the tanks are filled, and the city water pressure is raised, so that the constant minimum pressure will be the present maximum.

Rupp also explained that the 12-inch main on Jackson street is now satisfactory, and that it had originally run into a tile draining two catch basins, but that this had been corrected, and the pipe re-laid Tuesday. Paving of the area over the pipes began Tuesday on the block between the middle of Second street and First street.

Work Is Started On Paving Line Street
The paving of Line street, which has been torn up and the level of the street redone, began Tuesday, Adolph Kolter, city street department superintendent, told the city council Tuesday night.

Grant street has been completely paved now, and is open from Mercer to Line, and has been widened, graded, and leveled.

The city has also enlarged the parking lot at Hanna-Nuttman park pavilion, and cut off access to the private lane leading to the property from highway 224.

Part Of Wall Of City Building Down
Part of the west wall of the Decatur light department building, which will revert to the city when the electric equipment sold to Indiana & Michigan is removed, was torn down because it was a common wall with the adjoining buildings authorized to be torn down by the city, Mayor Donald F. Gage said at the city council meeting Tuesday night.

The mayor also asked when the city water department would be through using the water pumps in the building, as I & M wants to take line boards out of the building, and the condensers in the basement, but must interfere with the pumps to do it.
