10 Persons Killed In Traffic Mishap

TOLEDO, Ohio (UPI) — An outing to a drive-in movie ended in violent death Wednesday night when ten persons, including eight young children, were killed in the worst traffic mishap in the memory of highway patrolmen.

The dead were identified as Felix Campos, 41, of Florida City, Fla.; his wife, Catherine; and their children, Joseph, about 10, Rosa, about 16, David, about 3, and Teresa, about 5; and Guadalupe Chico, 6; his brothers, Raoul, 13, and Jaime, 7, and sister, Maria.

The Chicos were the children of Mr. and Mrs. Camilo Chico.

The Chicos and Campos were migrant farm workers employed by Emil Weber of near Elmore. A neighbor, Clayton Magsig, said the two families just arrived at Weber's farm this week.

A station wagon containing the victims was attempting to pass a tractor-trailer on a straight stretch of Ohio 51 about 10 miles southeast of here and five miles north of Elmore when it slammed head-on into another tractor-trailer operated by Charles Strong, 38, of Swanton, Ohio.

Strong was released after treatment for minor injuries at a hospital here.

Mr. and Mrs. Campos and their daughter Maria were pronounced dead at the scene. The others were dead on arrival at St. Charles Hospital except for Guadalupe Chico, who died 25 minutes after he was admitted, and Teresa Campos, who died several hours later of head and other injuries.

Continued Warm Is Forecast In State

By United Press International
Hot-weather haters anxious for the first cool nights of the fading summer season had no promises from the weatherman today that anything like that lies ahead for Indiana.

August arrived at midnight amid summer warmth. Continued warm conditions were due today, Friday and Saturday. Previous long-range forecasts indicated the same was expected for Sunday and Monday. And to add to the long-range outlook, the Weather Bureau in Washington said August as a whole promises to be hotter than normal in this area.

Temperatures crested Wednesday between 79 at South Bend and 91 at Evansville. Overnight lows ranged from 63 at Lafayette to 67 at Evansville.

Highs today will range from the 80s to 92, lows tonight from the 60s to 70, and highs Friday from the upper 80s to 92.

Scattered showers and thunderstorms gave some areas additional moisture. During the 24 hours ending at 7 a.m. today, totals included South Bend 33, Lafayette 12 and Fort Wayne a trace. At Chicago, nearly half an inch of rain fell.

The southern tip of the state rode out a severe storm alert Wednesday afternoon and early evening. No storms of damaging nature were reported, however.

There was a chance of afternoon or evening thundershowers Friday and a likelihood of such showers Saturday.

U. S., Korean Troops Patrol At Truce Line

SEOUL, Korea (UPI) — Swelling American and Korean soldiers of the United Nations Command patrolled gingerly along the truce line today on guard against further infiltration from Communist North Korea.

Three skirmishes between U.N. troops and Red infiltrators Monday and Tuesday killed four North Koreans, three Americans and one South Korean in what has been called the gravest series of incidents since the Korean War ended 10 years ago last Saturday.

Over the years both sides have filed thousands of complaints about violations of the truce. In the two weeks before the latest series of skirmishes, five other North Korean infiltrators were killed.

But the new series was the worst concentration of incidents on record and it occurred six miles south of the demilitarized zone, the deepest Red penetration into South Korean territory since the war ended.

The UNC command said there was more firing Wednesday, apparently warning shots by U.N. troops toward suspicious persons or objects. There were no casualties or property damage.

All was quiet as of midday today. The weather continued hot along the 155-mile truce line, with a broiling sun, high humidity and temperatures close to 100.

South Korean officials said that behind the rash of fatal incidents were the Chinese Communists, chafing under the pressure of their power struggle with the Russians and intent on stirring up trouble.

Tax Revisions Approved By House Group

WASHINGTON (UPI)—Congressional tax writers have unanimously approved legislation designed to make home ownership one of the best hedges that an American can take against inflation.

The House Ways & Means Committee Wednesday affirmed by a 22-0 vote an earlier decision to add special benefits for home owners to the across-the-board rate reductions in income taxes President Kennedy wants enacted this year.

The provision would grant a "once in a lifetime" tax break to taxpayers who sell their homes for a profit after reaching the age of 65. The Treasury estimated that it would mean tax savings of \$10 million a year to elderly homeowners.

Approve Other Revisions

It was one of a number of tax revision approved by the committee as it began a final round of voting on a compromise version of Kennedy's tax-revision-and-reduction program. In day-long balloting, the committee approved structural changes in tax law that would net about \$655 million a year in additional income tax payments. The biggest revenue producer—denial of U.S. tax deductions for payment of state and local taxes on gasoline, cigarettes, alcohol and auto tags—accounted for \$500 million of the total.

Other revenue-producing revisions still to be voted upon are designed to limit the bill's final revenue loss to a maximum of about \$10 billion after rate reductions for individuals and corporations are included.

Under present law, homeowners already enjoy special tax privileges. A homeowner can postpone indefinitely payments of taxes on profits from the sale of his home as long as he promptly reinvests the profits in the purchase of a more expensive residence.

The legislation which the committee approved Wednesday, is aimed at solving the tax problem which arises at the end of the line when the retired homeowner decides to sell his home and either buy a cheaper one or move to a rented apartment or house. At that point, the committee agreed, the taxpayer should get a "once in a lifetime" tax break.

Any profits from the sale of a residence by a taxpayer 65 or older would be tax exempt if he sold the home for \$20,000 or less.

Approve Formula
Under a formula which the committee approved, profits on homes selling for more than \$20,000 would be partially tax exempt.

For example, one-half of the profits would be tax exempt when a home was sold for \$40,000; one-third of the profits would be tax exempt on the sale of a home for \$60,000; one-fourth of the profits would be tax exempt if the home were sold for \$80,000.

Such profits, since they are long-term capital gains, already enjoy favorable tax treatment. The capital gains tax rate now is

one-half the ordinary income tax rate or less. The committee has already tentatively approved Kennedy's proposal to lower the maximum tax on long-term capital gains to 30 per cent of the regular tax rate.

Thus, both this proposal and the new "once in a lifetime" benefit for homeowners become law: a taxpayer who upon reaching the age of 65 makes a profit of \$20,000 by selling his home for \$40,000 would have to pay only 15 per cent of the tax rate that would be applicable if he received the same income from wages, salary or other earnings.

George Bair Returns To Work Next Monday

George Bair, county clerk-elect, will return to work in the state intangibles tax department next Monday; Bair has been recovering from a heart attack suffered last March 19, and will work on a part-time basis until he is certain that he is able to work full time. Bair succeeds Richard Lewton next Jan. 1.
