# How To Plan For Planting

What do people think when they see your home, either in passing, or in visiting it? Often the home may be judged by neighbors and friends on the basis of its landscaping and the pleasing effect landscaping imparts to the property. The value and saleability of a home depends to considerable extent on the first impression of the property as a whole, with good landscaping enhancing the value.

Primary points for good landscaping include excellence of design, according to the American Association of Nurserymen. A well designed planting takes advantage of the topography of the site to create a beautiful picture from vantage point — on the street side, in the rear yard, on the terrace, or looking at the side borders of the property.

It capitalizes on good views and screens off unsightly vistas.

PROPERTY LOOKS pretty as a picture when it's properly landscaped for adequate shade, privacy and beauty from any angle.

It ties the house to the ground in such a way that it delights the eye, as living plants, sun, earth and sky and house become part of one composition.

Adequate shade should be provided at the time of day you want it and exactly where you want it. Flowers and foliage, roses and perennials are placed for enjoyment in just looking or so the blooms can be cut to brighten up the indoors.

Proper landscaping today takes into consideration garden or outdoor living that has become increasingly popular in the past few years. The garden living area is planned with both outdoor entertainment and recreational features.

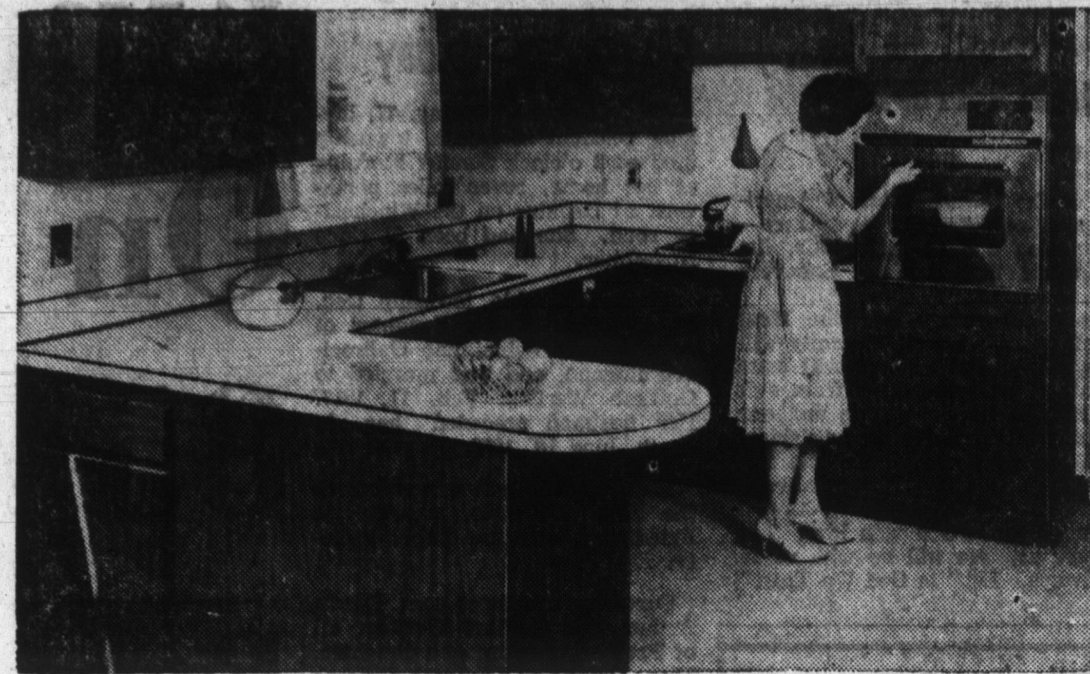

Privacy of course is necessary, and this can be provided either by hedges or informal groupings of plants. Sometimes just one or two evergreen or flowering shrubs or trees, will create the desired effect.

For those who enjoy fresh fruits, and who doesn't, there can be fruit-bearing trees, and small fruits like strawberries, raspberries, or asparagus and rhubarb.

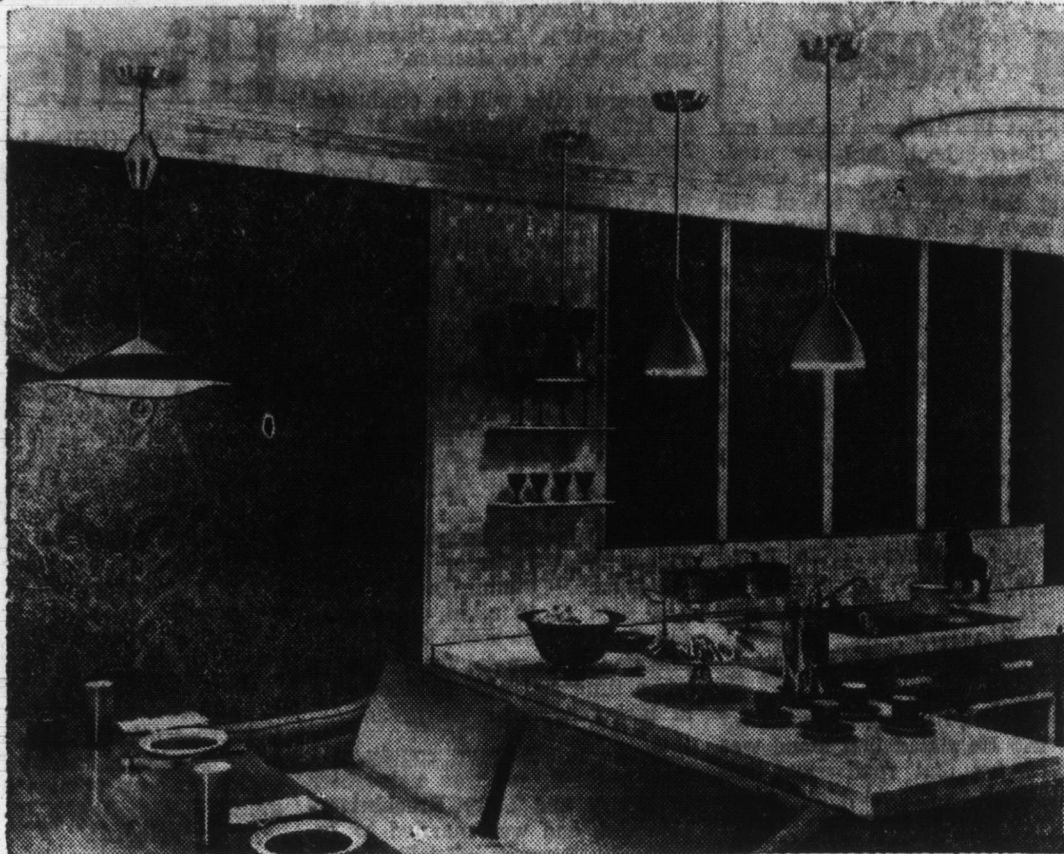

### KITCHEN SELLS HOUSE

If you plan to move in a few years, remember that house-hunting homemakers usually head straight for the kitchen of homes that are up for sale. It's a good idea to remodel the kitchen now, installing one of the new high-oven electric ranges. Your family will enjoy it while you live there, and it will help you sell your home at a better price later.

# Creating A New Kitchen That's Practical, Pretty

SAVE STEPS IN A REMODELED KITCHEN featuring efficient "U" layout of major appliances, cabinets and counters. Convenient plan provides homemaker with ample working and storage space as well. Suburban DeLuxe wall oven and range top.

SHED SOME LIGHT ON THOSE SECTIONS OF KITCHEN and dining area requiring extra illumination with a variety of imaginative and practical fixtures that supplement ceiling dome lighting the entire room. Fixtures by Moe Light.

KING-SIZED CONVENIENCE is available, even in kitchens where space is at a premium, with today's compact appliances. Here, the homemaker has everything, including a food waste disposer. Appliances shown by G. E.

### Change House

If you live in a row house and want to give your home a bit of distinction, you can have an attractive screening fence section built as an accent along your walkway near your entrance door. You should use a durable wood like western red cedar for this simple, yet effective installation.

### Ventilation

If your attic is not ventilated properly, you may get condensation, and the simplest cure is to install small louvers to let air circulate.

Here's an easy and economical way to house the hi-fi components and other entertainment equipment you're assembling. Easy-to-build fir plywood boxes serve as book cases or record storage until you're ready to add another piece of equipment. Simple, easy-to-follow plans are available free for the asking from Douglas Fir Plywood Association, Tacoma, Wash., 98402

### Music Buffs Offered Plan

One of the advantages of buying stereo or hi-fi components one at a time is the saving in cabinetry — you buy what you need for the effect you want, but don't have to use part of your capital for furniture.

Eventually, you reach a point where naked tubes and uncovered turntables need a home. If you're still not interested in spending a big sum on professional cabinetry a new do-it-yourself plan may be right down your alley.

A demountable music wall designed by the Douglas Fir Plywood Association, Tacoma 2, Washington is just as flexible as the needs of music buffs. A free

plan is yours for the asking. Easy-to-follow directions give details on assembling a series of solidly-built plywood boxes in any arrangement that suits your needs. Some of the boxes can be used for books or record storage until they're needed for new components.

Construction details are simple, and can be handled without power tools, although their use would simplify the job. There are a number of alternate finishing suggestions, to make it possible to fit the unit into your home.

Color can work a wonderful transformation in any room — especially when you follow some of the basic rules that have been discovered about its use. Here are "Color Do's and Don'ts" to guide you:

### Easy to Work

Most popular of all hobbies is wood working because wood is easily worked with simple tools and by inexperienced men and boys. The joy of creation is the more readily achieved when working with wood.

### Air Conditioned

To create a perfect air conditioned fence with privacy, arrange fence boards so that alternate ones are on opposite side of the framing. Best plan is to use eight-inch wide boards of western red cedar set on cedar or Douglas fir frame.

### Most Valuable

In Chipping Ongar, Essex, the timbered walls of a church erected in 841 A. D. still stand.

### NAILING ENDS

Prevent splitting by blunting the point of a nail before driving it into ends of wood. Hold nail upside down on firm surface and tap point lightly with hammer. The blunted point will then shear through the fibers instead of spreading them apart.
