

During the past year fifty-eight National Banks were organized.

The vote for the Presidential electors in Noble county resulted in a tie.

New York City has 25,000 more women than men, and Boston, 20,000.

The people of the United States in various ways are taxed to support the Federal Government to the amount of \$494,578,241.

The most prominent Union Soldier, honored at the North by an election to Congress was W. S. Rosecrans, who was chosen by the Democrats.

Rutherford B. Hayes retires from office with the sweet consciousness that he has rewarded the faithful rascals who helped him into office.

The New York Tribune wants Garfield to signalize his advent to power by recommending to Congress the retirement of the \$346,000,000 of legal tender currency.

John Sherman finds it difficult to circulate the standard silver dollar to the amount of \$400,000,000, while France keeps in circulation 365,000,000 five-franc pieces. The fact is he don't want to circulate them.

The Chicago Times calls the attention of "the political purists who are aghast at the Democratic manner of throwing out votes in the shoeing District of Mississippi," to the contemptible work done in Prusque Isle County, Michigan.

We imagine the "Old Guard," or the "300" who stuck out so resolutely at Chicago for Grant and empire, will take a reef in their sails. The proposition of their organ, the New York Times, to raise a fund of \$250,000 to pension their idol has only panned out \$9,000.

At the last election the Democratic party carried 19 States; the Republican party carried 19 States. New York taken from the Republican list would have elected Hancock. As it was the electoral majority in the 19 States carried by the Republicans, was with that party, while on the popular vote of the 19 States carried by the Democrats the majority over the Republican party is upwards of 120,000.

It was a trifle inconsistent to see the many Republican Journals who were six months ago demanding the admission of articles used in the manufacture of paper free of duty, taking issue with the Democracy in the question of tariff for revenue only. Many of them that recently stood up firmly for the tariff as it is, are now beginning a fight on several features of that mass of injustice and oppression. In their wholesale endorsement of our present tariff, the Republican brethren have shouldered a load that they can not carry.

Democratic Arkansas and Tennessee, and now Virginia, rescued from the radical readjusting regulators, are properly subjects of congratulation, for having repudiated repudiation at the polls. Here are three of those much derided Southern Commonwealths setting an example for commendation everywhere. Stalwart republican Minnesota presents no such agreeable figure for contemplation. And yet republican Minnesota was one of the most awfully scared and anxious of the "Business" yawpers less than a month ago. Pork does boil that way.

The sound of valiant promise, that wages would be increased and factories take on a new lease of enlarged prosperity if Garfield was elected has scarcely ceased its vibrations, and yet we hear of forces being reduced, and time cut down by the employers already. Prices have certainly advanced, but not wages. We shall be delighted to record an advance of the latter at any moment, and the performance of the promises made, for nothing rejoices us so greatly as the prosperity of the masses, the toilers of the land. We trust these early indications are not ominous of disaster. They are at least not encouraging.

Very curious and varied are the opinions of the radical press and miscellaneous their forecasts of the policy of the coming Garfield administration. Each of the several divisions or factions, who are only a unit when they scent office and plunder in the foreground, claim Garfield as their own, regardless of his uncertain quantity or quality. The anti-Garfield faction have "authentic" information that there was no bargain and a le at Menter, when the stalwart chieftains both the Camerons, Conkling and Logan made a pilgrimage in the crisis of the campaign to the accident of Chicago. Before that the campaign was going to the "demition bow-wow," and those eminent stalwarts were echoing the Conkling slogan, "Garfield is hardly fit to play chambermaid in a silver stable." After that, whether from newly discovered beauties in the figure they want to see, or because, for a consideration, the patronage and policy of his administration was to be under their direction and control, it is well known that these gentlemen who had therefore been sulking in their tents, at once took command of and run the

campaign, displaced Jewell by Platt, leaving it to the nominal head of the campaign committee, a figure-head. Clearly one wing or the other is to be cheated, but which one? If Garfield would only have the courage of his convictions, as they have frequently found utterance on the floor of the House during his sixteen years service, he would be victims of misplaced confidence. It is too much to hope that one so facile as he has proven will ever be other than the prey of the political vultures who have triumphed, no matter how, over the friends of law, order and constitutional government. And yet hope has not entirely abandoned us. The temptations that have hitherto, during a rising career, so easily overcome him he should now be able to resist at the zenith of an aspiration he probably never dared to contemplate. It will be well for himself and very well for the country if any such hope is realized.

Henry Clay Dean has been persuaded to state his opinion as to "how it all happened." He thinks the "old managers" did not take hold with a relish, and that too much youth was put into the field, and adds: "I don't think that the Mobilizer matter hurt Garfield any, because the Republicans were all in it; the back pay salary grab didn't because they had all taken it. The DeGolyer matter didn't, for the party depends for its support upon such frauds and corruption. What elected Garfield was the combination of Beecher, who, for two decades, has polluted literature, and who was caught in crime, with Conkling, who has been prancing for years with another man's wife, and Ingersoll, who read a writ of ejectment against Almighty God and a jail delivery to hell—this it was that defeated us and elected Garfield." Manifestly, Mr. Dean has been a close observer of the campaign and has critically studied Republicanism.

Georgia, which was the first of the Southern States to emancipate itself from the robbery of the carpet-bag rule, has made rapid advance in its fiscal affairs and general economy. It is now among the best governed of the States of the Union. It has a cash balance in its treasury. Its bonds bear but four per cent. interest and were placed at par. Its rate of taxation is low. Its State institutions are flourishing. The number of inmates of the penitentiary has been growing less while growth of the public schools has been rapid. In 1871 the number of white pupils was 42,914. In 1878 it was 137,211, and the number of colored pupils has increased from 6,664 in 1871 to 209,872 in 1878. The total number of children of school age in the State in 1878 was 432,444. The amount raised and expended for school purposes was \$520,000. The altered situation of affairs in Georgia is significant and gratifying.

The Man With a Mortgage on Garfield's Soul.
Speaking to me yesterday about Gen. Garfield, one of his friends said: "The only thing in Garfield's life that he really regrets was taking the fee in the De Golyer pavement case. The Credit Mobilier transaction never rested on his conscience, as he relied on the good intentions of the Oakes Ames to do him a benefit, and not an injury. But the De Golyer fee was not capable of that kind of defence. It was a large fee to take for a trifling service, while in the Credit Mobilier case the pitiful sum of money which went to his credit clearly showed that he meditated nothing rapacious; and," continued my informant, "I have observed that Garfield has a sad and constrained appearance whenever Dick Parsons of Cleveland, approaches him. I was once talking with him when Parsons called Garfield off, and I saw by the lights in the depot at I saw in Garfield's eye as he observed Parsons, at once a dramatic and profound, as it was in the presence of that person who had thrown a coil around him and got a mortgage on his character and soul."—From the Cincinnati Enquirer.

Stand Firm.
Every true Democrat will remain firm in the faith. Those who have no fixed principles will go to the Republicans where they rightfully belong. A majority of the people of this country are Democrats, and will remain such as long as the Democrats present such candidates as Gen. Hancock for a standard bearer, and so long as they advocate the principles which underlie and form the basis of our institutions. The Democratic party stands as one man for peace and fraternal Union. Its followers love their country and long for the day to come when there shall be no North and no South, when sectional lines will be obliterated and the people of every State in the Union vie with each other in making this nation what our fathers intended it should be, the greatest and best in the world. A Democrat who is animated by any other desire than the good of his country, is not one in the true sense of the word. The Republican is a sectional party. It lives not because it is right, but because it appears to the prejudice engendered by the late war, and keeps alive its memories to solidify one part of our people against another who have erred but repented, and born every suer and jibe of Northern sectionalists with a complacency that does credit to their patriotism. Democrats look to the good of the whole people, Republicans to the good of their party.—Pharos.

Jem Mace, the once well-known English pugilist, is keeping a large hotel in Melbourne. He is said to have become a "model moral man," and is, moreover, making money fast.

Editorial Conference.

Fort Wayne, Nov. 19.—At a meeting of the Democratic editors of Northern Indiana, held in this city to-day, the political situation of the country and the future of the Democratic party were elaborately discussed. After a full and free interchange of opinions, it was unanimously agreed that the following points should at once be pressed upon the attention of the American people.

1. A change of the Constitution of the United States providing for the election of the President and Vice President by the popular vote. The cumbersome, and in many respects dangerous, machinery of the Electoral College and the supervisory power of Congress, in a partisan sense, has made manifest the necessity of a Radical change in this particular.

2. The election of United States Senators by the people of the several States, instead of by the Legislatures thereof. This step is deemed necessary in order to free, as far as possible the election of members of the Legislature from pure partisan considerations, to the end, that legislation may be secured in accordance with the domestic wants of the State.

3. A judicious revision of the present unjust and discriminating tariff in the interest of the producing and industrial classes. This work to be performed under the guidance of men capable of dealing intelligently with the question of political economy, instead of pandering to the whims and crude notions of mere demagogues and stipendiaries.

4. Vigorous opposition to introduction of cheap Mongolian labor, with a view to preserving and promoting the dignity of intelligent labor.

5. Appropriate legislation by Congress for the taxation of greenbacks like other money.

6. Cultivation of a wholesome public sentiment opposition to the controlling of elections by the dependents of the National administration, high and low, and against the exercise of coercive measures on the part of corporations in interfering with the elective franchise of their employees.

7. A movement for securing the holding of elections in all the States at once, and the same day, to-wit: On the first Tuesday after the first Monday in November.

8. Believing that the prosperous condition of the country, so far as the same may have been affected by legislation, furnishes abundant proof of the wisdom of a Democratic Congress in restoring to the people the use of silver as money and prohibiting the further retirement of greenbacks, we protest against any tinkering with the finances of the country, and hereby express an unqualified condemnation of the presumptuous proposition of Secretary Sherman.

A demand upon the present Congress to institute a thorough and searching investigation of the charges that the apparent majority of Garfield and Arthur in the State of New York was obtained by fraudulent and illegal means, to the end that justice may be done to all parties, and for the removal of all doubt from the minds of the advocates of pure elections, as to the genuineness of the ballot, so that it shall appear upon such investigation that Mr. Garfield is justly entitled to the electoral vote of New York, he may enjoy the respect of the entire people as the lawful chosen President of the United States. If, on the other hand, it should be made to appear plainly and unmistakably that the result in New York was brought about by fraudulent and illegal means, in violation of the election laws of that State, we demand of Congress a firm and unyielding stand in favor of such action as will secure to the people the noble soldier and statesman, Winfield Scott Hancock, as their Chief Executive officer.

Fire.
Soon after daylight Sunday morning, an alarm of fire was yelled from the north east part of town. It proved to be the brick building known as the Mead property, and has been occupied only a short time by Rev. Coffman. Mr. Coffman had started his morning fire, when he soon discovered the house to be on fire. The near neighbors were soon at the place, but all attempts to save its burning proved fruitless, and immediately the work of carrying out the household effects was resorted to. Eshery thing except their safe and dishes were saved, but with the usual cuffs and scars to be expected on such an occasion. To the family it was a severe shock that can only be attributed to the effects of a bad flu. Mr. Meads loss, we learn, will principally be met by insurance.

About four o'clock in the afternoon, while the ruins of the former building were yet smoking, the Kirk property, at the corner of Ohio and North Sts., was discovered to be on fire. Water was freely administered and the building saved. It originated from an ash barrel in an adjoining out building.

Just at sunrise Tuesday morning last, the alarm of fire again aroused the people to the sense of their duty, and lo! it was the beautiful residence of Mr. Adam Coover wrapped in flames. The morning fires had been built and in some few moments the fire was discovered between the ceiling and roof. Men came rushing from all directions, but by the scarcity of water and want of ladders, everything proved of no avail in resisting the flood; saving the building was at once abandoned and all hands at once began carrying out she goods and with the exception of one bed and some clothing, in one of the rooms up stairs, everything was safely removed. It was a large two-story house, well built and worth at least two thousand dollars, and was covered by thirteen hundred and fifty dollars insurance. Indeed it must come to the aged

Mr. & Mrs. Coover a severe shock, for many years they have made it their home were well fixed and it is heart rending to see the fruits of their many years of hard labor in a moment turned into ashes.—Remington Reporter.

Go to Mrs. Healey's for the cheapest and best millinery goods in town. Wirt, the Dentist, extracts teeth without pain, by the use of Nitrous Oxide.

Gray hairs are honorable, but few like them. Clothe them with the hues of youth by using Ayer's Hair Vigor.

A Philadelphia quack informs the public that he is not at all exclusive. "If a patient wants it gentle and mild, I'm a homoeopath, and when anybody wants thunder and lightning, I'm an allopath."

General W. S. Harney, of the United States army, the old Indian-fighter, is temporarily stopping in New York. He is 82 years old, six feet three inches in height, and stands straight as an arrow.

It is so in politics, business, and everywhere else in life. The man whom you boost up the tree not only forgets to toss you down some of the fruit, but is as likely as not to pelt you with the chawings.

Rev. Joseph Nesbit, of Look Haven, announced as his text on a recent Sunday, "Hold fast the form of sound words." He then repeated from memory the entire shorter catechism, and closed the service with prayer without a word of comment.

A Hungarian exhibited in a phrenological museum two skulls of different proportions. "Whose is the large skull?" asked a spectator. "It belongs to the celebrated Attila, King of the Huns." "And the small one?" "Also to Attila, but when he was a child."

So great is the faith reposed in Ayer's Pills by those who have given them a trial, that the consumption of them almost passes belief, far exceeding any precedent. They cleanse the blood, improve the appetite, promote digestion, restore healthy action, and regulate every function. They are pleasant to take, gentle in their operation, yet thorough, searching, and powerful in subduing disease.

A pedagogue endeavored to instill prudence into the minds of his pupils by making them count a hundred slowly before speaking, or in a matter of importance, five hundred. Finishing a lecture upon the subject, he took his stand by the stove, and after some minutes observed that the lips of all his scholars were moving slowly and noiselessly. Presently and simultaneously they all broke out: "Four hundred and ninety nine! Five hundred! Master, your coat-tails are all on fire!"

The conversion of a certain Democratic newspaper reminds us of a certain Beaver family, in Pennsylvania, who refused all the kind overtures of a good old Methodist minister until one of the sons got bit by a snake. The minister was summoned, and in his prayer said: "We thank Thee, O Lord, for rattlesnakes; send one to bite Sam and one to bite Bill, and an awful big one to bite the old man, for nothing but rattlesnakes will convert the Beaver family."—Chicago Inter-Ocean.

Winter Tours South.
The season has arrived when residents of the Northern States have begun to agitate the subject of a trip to warmer and more congenial climes to which to spend at least a portion of the coming winter, and either Florida or Southern Texas will be generally decided upon as the objective place. In this connection the Pittsburg, Cincinnati & St. Louis Railway Co. (Pan-Handle Route) announce that they have placed on sale round-trip excursion tickets to Jacksonville, Florida; Austin, Houston, Galveston and San Antonio, Texas. These tickets are now on sale at all principle stations on the lines of this company, and can be procured from the general office through agents at smaller stations. Tickets are good for return passage until June 1st 1881, and are first-class in every particular. The Pan-Handle Route is the direct through-car line to Florida and Texas. For tickets, time-tables and full information, call on or address any agent of the company, or W. L. O'Brien, General Passenger and Ticket Agent, No. 219 North High street, Columbus, O.

"EVERYBODY"
Is respectfully notified that Dr. IRA C. KELLEY has opened an office over Willis J. Innes' Drug Store for the practice of Dentistry in all its branches. No pains will be spared to give the best satisfaction for the least money. Teeth extracted without pain. IRA C. KELLEY, Dentist.

We have much pleasure in recommending Thermanine to our readers, as an absolute cure for Malaria. The manufacturers name alone is a guarantee of its merit. It costs 25 cents per box. For particulars see Advt. For sale by Emmet Kantal.

ESTRAY NOTICE.
Taken up by Peter M. Graves of Gilliam township, Jasper county, Indiana, one three-year-old steer, of a light roan color, with the letters S. S. branded on the left horn. Said steer weighs about 950 pounds and is appraised at \$23.00.
From the Docket of James R. Guild, Justice of the Peace, Gilliam township, Jasper county, Indiana.
CHARLES H. PRICE, Clerk
Dec. 3, '80. Jasper Circuit Court

Application for License to Retail Intoxicating Liquors.
NOTICE is hereby given to all the citizens of the Town of Rensselaer and Marion Township, in the county of Jasper, and State of Indiana, that I, the undersigned, Henry Smith, a white male inhabitant of said Town and Township, and over the age of twenty-one years, will make application to the Board of Commissioners of said Town and Township, at their next regular session and meeting of said Board of Commissioners to be held in said Town of Rensselaer, commencing on Monday the sixth day of December, A. D. 1880, for a License to sell Intoxicating Liquors, to-wit: Vicious Liquors, and all Intoxicating Liquors which may be used as beverage, in less quantities than a quart at a time, with the privilege of allowing and permitting the said liquor to be drunk on the premises where sold, and precisely located as follows, to-wit:
A Room in the lower story of a two-story frame building located upon lot one (1), in block number nine, in the original plat of the said Town of Rensselaer, in Jasper county, and State of Indiana, described by metes and bounds as follows: Commencing at a point eight (8) inches south of the north line of the said lot, and from thence in a south westerly direction a distance of thirty-six (36) feet, and from thence in a north westerly direction at right angles with said Van Rensselaer street a distance of eighteen (18) feet, and from thence in a north easterly direction parallel with said Van Rensselaer street a distance of thirty-six (36) feet, and from thence in a north easterly direction parallel with Washington street a distance of eighteen (18) feet to the place of beginning.

Said Room fronts on Washington street, in said Town of Rensselaer.
Said applicant asks for a License for a period of one year.
HENRY SMITH.
November 12, 1880

Application for License.
NOTICE is hereby given to the citizens of the Town of Rensselaer and Marion Township, in the county of Jasper, and State of Indiana, that I, the undersigned, Henry Smith, a white male inhabitant of said Town, and over the age of twenty-one years, net in the habit of being intoxicated, and a fit person to be entrusted with the sale of intoxicating liquors, will apply to the Board of Commissioners of Jasper county, and State of Indiana, at their regular session, A. D. 1880, for a license to sell spirituous, vicious and malt liquors in less quantities than a quart at a time, with the privilege of allowing the same to be drunk on the premises where sold. The precise location of the premises wherein said liquor are to be sold and drunk, is in the lower story of a two-story frame building fronting on Washington street, in the Town of Rensselaer, Jasper county, Indiana, and situated upon the following described premises, to-wit:
Commencing at the corner of lot nine, in block nine, at the corner of Washington and Van Rensselaer streets, in the Town of Rensselaer, Jasper county, Indiana; thence north 57 degrees and 10 minutes east, parallel with Washington street, twenty-one feet; thence north 52 degrees and 50 minutes west, twenty-one feet and one-half feet; thence south 57 degrees and 10 minutes west, twenty-one feet to the easterly line of Van Rensselaer street; thence south 22 degrees and 50 minutes east, to the place of beginning. Said premises being known and designated as the bar room of the "Rensselaer House," and all on lot number nine, block number nine, in the Town of Rensselaer, county of Jasper, and State of Indiana.
CHARLES W. ROSS.
November 12, 1880

NOTICE TO NON-RESIDENTS.
The State of Indiana vs. In the Jasper Circuit Court, in Jasper county, Indiana, January Term, 1881.
Daniel Keller vs. J. Calvin Coover, Henry D. Ellis, Ellis, his wife, Robert Blackwell, and Blackwell, his wife.

Not appearing by affidavit this day filed in open Court that all of the above named defendants are necessary parties to the above entitled action, the object of which is to enforce a mortgage, and that said defendants J. Calvin Coover, Robert Blackwell, and Blackwell, his wife, are non-residents of the State of Indiana.
Notice of the pendency of such action is therefore given to said defendants to appear and defend at the Court held at the Court House in the Town of Rensselaer, in the County and State aforesaid, on the first Monday in January, 1881.
Witness my hand and the Seal of the Jasper Circuit Court, this 4th day of November, 1880.
CHARLES H. PRICE, Clerk
Merced P. Chilcote, Atty for Plaintiff.
November 12, 1880—80.

A WONDERFUL DISCOVERY!
CARBOLINE
A Deodorized extract of Petroleum,
The Only Article that Will Restore Hair on Bald Heads.
What the World has been Wanting for Centuries.
The greatest discovery of our day, so far as a large portion of humanity is concerned, is CARBOLINE, an article prepared from petroleum, and which effects a complete and radical cure in case of baldness, or where the hair, owing to disease of the scalp, has become thin and tends to fall out. It is also a speedy restorative, and while it secures a luxuriant growth of hair, it also brings back the natural color, and gives the most perfect satisfaction in the use. The falling out of the hair, the accumulations of dandruff, and the premature change in color are all evidences of a diseased condition of the scalp and the glands which nourish the hair. To arrest these causes the article used must possess medicinal as well as chemical virtues, and the change must begin under the scalp to be of permanent and lasting benefit. Such an article is CARBOLINE, and, like many other wonderful discoveries, it is found to consist of elements already in their natural state. Petroleum oil is the article which is made to work such extraordinary results, but it is after it has been chemically treated and completely deodorized that it is in proper condition for the toilet. It was in far-off Russia that the effect of petroleum upon the hair was first observed. A Government official having noticed that a partially bald-headed servant of his, when trimming the lamps, had a habit of wiping his oil-bemastered hands in his scanty locks, and the result was, in a few months a much finer head of black, glossy hair than he ever had before. The oil was tried on horses and cattle that had lost their hair from the cattle plague, and the results were, as rapid as they were marvellous. The manes and even the tails of horses, which had fallen out, were completely restored in a few weeks. These experiments were recorded in the most scientific manner, and were practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. The skill of one of our chemists has overcome this difficulty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing refined petroleum, which renders it susceptible of being handled as cleanly as the famous eau de Cologne. The experiments with the deodorized liquid on the human hair have attended with the most successful results. A few applications, where the hair was thin and falling, gave remarkable tone and vigor to the scalp and hair. Every particle of dandruff disappeared on the first or second dressing, and the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. The skill of one of our chemists has overcome this difficulty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing refined petroleum, which renders it susceptible of being handled as cleanly as the famous eau de Cologne. A few applications, where the hair was thin and falling, gave remarkable tone and vigor to the scalp and hair. Every particle of dandruff disappeared on the first or second dressing, and the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. The skill of one of our chemists has overcome this difficulty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing refined petroleum, which renders it susceptible of being handled as cleanly as the famous eau de Cologne. The experiments with the deodorized liquid on the human hair have attended with the most successful results. A few applications, where the hair was thin and falling, gave remarkable tone and vigor to the scalp and hair.
