

PETERSON'S MAGAZINE for January—the "queen of the lady's books," as it has been called—excels even itself. The beauty of its embellishment and the high character of its original stories are beyond all praise. "Is the Squire In?" the leading steel-plate, is one of the very best we have ever seen; and "First Grief," another steel-plate, is almost as good, if not quite. The colored design for painting on silk or satin, or to be worked in embroidery, would cost at a retail store fifty cents, yet is furnished gratis to subscriber for "Peterson" as a New Year gift.

The fashion-plate is double size, engraved on steel, and colored by hand. "Oh, how lovely!" every woman will exclaim on seeing it. The high character of "Peterson" for its stories is more than maintained, in its number. Mrs. Frances Hodgson Burnett, Mrs. Ann S. Stephens, Edgar Fawcett, Frank Cee Benedict, and the inimitable author of "Josiah Allen's Wife" being among the contributors. In addition there is an unusually interesting article, illustrated, on "The Homes of American Toets." More than fifty wood-cuts of fashion, patterns in embroidery, etc., are also given. All this for only Two Dollars a year, with great deductions to clubs. Thus, four copies are sent for six dollars and forty cents, and an extra copy for getting up the club. For larger clubs, there are still greater premiums. Certainly, every lady, at least of refinement, should take this magazine. Subscribe or join a club at once. Specimens will be sent gratis, to those wishing to get up clubs. Address CHARLES J. PETERSON, 306 Chestnut Street, Philadelphia, Pa.

A CHILD with Two Brains.

A baby about a month old was taken by its mother to a dispensary at the Bellevue hospital for treatment, last week. When the child was born it had a large swelling upon the forehead, which slowly increased in size and firmness. Nothing could be done to reduce the protuberance, which was supposed to be a tumor, except to perform an operation on the child's head and take it out. Before this could be done the little thing died. The consent of the mother being obtained, Dr. Janeway held an autopsy at the morgue, and found that the cause of the swelling was a second brain which was growing on the outside of the skull, independent of the brain inside, save through a connecting substance that passed through a slight fissure in the bone. The anatomical specimen, which is a rare one, was put into alcohol to preserve it.—N.Y. Tribune.
