

FRIDAY JANUARY 28 1887

Entered at the postoffice at Rensselaer, Ind., as second-class matter.

RENSSELAER TIME TABLE.

PASSENGER TRAINS.

NORTH.	SOUTH.
4:39 A. M.	11:27 A. M.
8:46 A. M.	7:54 P. M.
4:01 P. M.	10:50 P. M.

FOR THIRTY DAYS!

Two first class new, improved light running Sewing Machines for sale, at \$25 and \$30. This offer is only open for thirty days. For particulars call at this office.

Jan. 7. 1887.

The baloting to-day for U. S. Senator resulted the same as heretofore less the pairs:

For Turpie,	72
For Harrison,	68
For Allen,	4

We trust our Democratic Senators will remain firm, to adjournment if need be.

The Republicans are beginning to realize the fact that President of the Senate, Green Smith, is not as "green" as his name might imply.

The Republican should know that Dr. Patton is the peer of Mr. Thompson, and that its insinuations are calculate to promote a comparison of the two men.

The Republican professes to be fully posted with reference to what information may be in possession of the Senate Committee on Elections, but we rather think Mr. Marshall is simply giving his own personal views, under political bias and partizan fidelity to Mr. Thompson. Be that as it may, the committee is composed of men who are at least Mr. Thompson's peers in honesty, intelligence, and good citizenship, and will no doubt do the right thing in the premises. The Senate may properly accept the bounds fixed by the lower house upon which to unseat a member, and if not "an eye for an eye, and a tooth for a tooth," make it a man for a man.

The Rensselaer Republican is "fernest" the compromise which resulted in the holding of joint sessions of the Senate and House of Representatives of Indiana, and wails out what might have been in the absence of the compromise:

"The contest would have been settled in the United States Senate, and probably in General Harrison's favor."

Why in General Harrison's favor? Not upon the merits of the claim, but simply and alone because he is a Republican. And such is the status of the honesty of Republican members of the United States Senate, as fixed by their own partizans and press. Such sentiments are beastly, and is evidence that the authors would wink at and uphold corruption and the misuse of power in high places.

Immediately after the late election, in the interest of the Republican party of Indiana, Dudley assumed the role enacted by Zack Chandler in 1876. Knowing full well that the Legislature was Democratic on joint ballot, he started out claiming the reverse, with a view to cover up their tracks while engaged in gigantic efforts to steal. This policy put Democrats on their guard, and the theft will not be accomplished. Had the Democratic

Commission withdrawn when the rule applied to Louisiana was refused in the case of Oregon, they would have performed a commendable act, and fraud would not have triumphed in the elevation of "Fraud Hayef" to the Presidency. Let the Democratic members of our Legislature continue firm to the end—no compromise; no change of candidate—and all will be well.

Val Seib went to Indianapolis Monday.

Mrs. Wm. B. Austin is visiting at Crawfordsville.

Mr. and Mrs. Abe L. Haens arrived Monday evening.

Noble J. York, of Monon, is perambulating the streets of Rensselaer to-day.

Twindaughters at the home of J. W. Smith, in Barkley township, on Thursday of last week.

Mr. and Mrs. Willis J. Imes, of Monon, passed Sunday with relatives and friends in this place.

Mrs. Jessie Trindle, of Richmond, Ind., is visiting her father, Rev. Geo. Havens, and friends in Rensselaer.

Dr. Loughridge called in to see Mr. John G. Culp, Barkley township, Thursday, and we are pleased to announce reports considerable improvement in his condition.

PROPRIETARY MEDICINES.

A visit to Dr. Green's Laboratory, at Woodbury, N. J., has considerably changed our views, and especially our prejudices in regard to what are generally known as "Standard Patent Medicines." Of course we are getting to that age in life when we are forced to conclude Life itself is a humbug, and naturally distrust anything that has not withstood long and tried experiences. Being a physician I had a curiosity to know how such a sale of two medical preparations could be sustained for so many years. The perfect system upon which the business is conducted, and the pharmaceutical arrangements for the manufacture of the two remedies with which we were made acquainted, are sufficiently convincing to us that the AUGUST FLOWER, for Dyspepsia and Liver Complaints, and BOSCHEE'S GERMAN SYRUP, for Throat and Lung Troubles, were for the complaints they are recommended, most excellent remedies, and only regret that in much of our practice, medical ethics prevent us from prescribing them without making the formulas public. When we were shown the great quantity of voluntary letters having been forwarded to Dr. Green from all parts of the country, and from all classes of people, lawyers, ministers and doctors, giving a description of the ailments, testimonials of their cures, etc., I feel like endorsing Dr. Green's suggestion that the Government accept such valuable formulas, and license them for general use by giving protection to the inventor same as patents generally.—N. Y. Druggists' Circular, Oct. 1885.

We understand the broken limb of James Welsh is mending as well and rapidly as could be expected.

Mr. Robertson, of Guilford, Ind., visited his aunt, Mrs. James W. Douthit, at this place, last week, remaining over Sunday.

WHAT TRUE MERIT WILL DO.

The unprecedented sale of BOSCHEE'S GERMAN SYRUP within a few years has astonished the world. It is without doubt the safest and best remedy ever discovered for speedy and effectual cure of Colds, Coughs and the severest Lung troubles. It acts on an entirely different principle from the usual prescriptions given by Physicians, as it does not dry up a Cough, and leave the disease still in the system, but on the contrary removes the CAUSE of the trouble, heals the parts affected and leaves them in a purely healthy condition. A bottle kept in the house for use when the diseases make their appearance, will save doctor's bills and a long spell of serious illness. A trial will convince you of these facts. It is positively sold by all druggists and general dealers in the land. Price, 75 cents, large bottles. 1052

Health Hints.

Milk contains all that is required by the body, and the proportion of mineral matters, is less irritating than other foods and better digested.

Everyone should keep a bottle ready of equal parts of strong lime-water and sweet oil shaken together to use on burns and scalds, or for chapped hands.

Frozen oranges are regarded as the cause of some recent sickness at Palatka, Fla. The Herald of that place says the poison in the peel is driven into the orange by the frost.

An experienced vocalist has, it is said, during fourteen years cured any number of cases of obstinate cough, by prescribing the free use of oysters as a diet. The remedy is easily tried.

Distressing palpitation, says the Medical World, may generally be relieved by bending double, the head down and hands hanging so as to produce a congestion of the upper part of the body.

Cures of sciatica are reported as having taken place in Paris after a single application of Dr. Debove's method of freezing the skin above the painful parts with a spray of chloride of methyl. The operation is said to be applicable also to facial neuralgia.—N. Y. Sun.

According to Gen. Morin, the eminent French expert, the proper temperature in well-ventilated places is as follows: Nurseries, asylums and schools, 69 degrees; workshops, barracks and prisons, 59 degrees; hospitals 61 to 64 degrees. In dwellings in this country it has been the custom to keep the temperature at 65 to 70 degrees.—Chicago Journal.

Doctors say that women should be cautious how they call to offer sympathy to neighbors having sick children. Women's clothing offers inducements to fugitive bacteria, and several instances have been recorded lately in which contagious diseases are known to have been brought about by germs carried into the household in the folds of heavy woollen fabrics.

In a study upon the nature of hypnotics, M. Dujardin Beaumetz concludes that opium and its alkaloids do not produce a condition of sleep. They stupefy the faculties and induce torpor, but the brain still remains in a condition of tonic excitement. Chloral will bring about true sleep, but in large doses it has a dangerous action on the heart, and its ingestion often gives rise to gastric disorders.

The Sanitarian gives some sensible advice about the teeth. It says: Tooth-brushes should always be soft and rarely used more than once daily, before breakfast, which is quite often enough to remove the insoluble particles of food which collect at the margin of the teeth. Use the soft brush with water only, or at most, with nothing else but pure soap in addition. Soap is not only more cleansing than anything else, but it leaves a sweeter and pleasanter taste, and is never followed by injurious effects.

A writer in the People's Health Journal tells of a debilitated patient who did not do at all well on beef tea, but was easily restored to health on a diet of bean soup. The only remarkable thing about this is that the patient ever expected to derive strength and nourishment from beef tea alone. Considering that we have upwards of a hundred thousand doctors, and that a very large proportion of them are fully agreed that beef tea is almost valueless, except as a stimulant, it is surprising that people continue to look upon it as a food.

Pork is good for nervous people, but is not easily digested. Wild game is excellent. Fish is good for nervous people. Eggs boiled just enough to harden the white are easily digested. It is a mistake about people eating too much. The majority do not eat enough. Nervous dyspepsia comes from working too hard and not eating enough. When a man begins to suffer from overwork he should eat plenty of good bread and butter, drink two quarts of milk a day, and eat plenty of good meat. When such a person resorts to a vegetable diet he grows weaker and loses his nerve power.

Household Hints.

Whiting wet with aqua ammonia will cleanse brass from stains, and is excellent for polishing faucets and door-knobs of brass or silver.

Ham relish may be made by seasoning highly with cayenne pepper a slice of dressed ham, then broiling it, and adding butter, mustard, and a little lemon juice.

Salt will curdle milk, therefore in preparing milk toast, sauce, scrambled eggs or anything of which milk is the foundation, do not add the salt till the pan has left the fire.

Try this recipe for a pie: The pulp of one lemon, chopped fine, with half a cup of raisins; add two tablespoonfuls of flour, one cup of sugar and one or water. Bake between two thin crusts.

Baking powder and soda biscuits should be put into warm pans, and baked in a quick oven; a little warm water rubbed over them just before putting into the oven will give them a nice color.

To remove fruit stains from a cambric handkerchief or other white goods, dip the stain in boiling milk; if this is not effectual, apply a very weak solution of chloride of lime, being careful to boil the handkerchief afterward.

Typhus fever is marked by short, delirious, broken dreams. Scarlet fever by realistic dreams, excited by surroundings. Remittent fever by long, delirious, painful dreams. Herein are suggested some suitable points in diagnosis.

The fat of chickens is said by a cake maker of great experience to be superior to the finest butter for making the most delicate cake. If the fat of boiled chickens is to be used, cook them with

out salt, and there will not be the slightest flavor of fowl.

Keep a pin-cushion in the kitchen. If none is at hand, a pin picked up is laid on the window-sill, or stuck in the dress, to fall, perhaps, into the next batch of bread kneaded. Each child should be taught to pick up every pin it sees and put it in its proper place.

Potato Souffle.—Bake the potatoes, cut off one end, take the inside out, leaving the skin; mash the potatoes with grated Parmesan cheese, butter, salt, pepper and mustard, and replace in the skin and bake, standing them upright in a dish. A capital savory for after dinner.

An excellent and simple disinfectant for sinks and waste pipes is made by mixing one large tablespoonful of copperas with one quart of boiling water. This solution is odorless and deodorizes instantly. The copperas may be bought at any druggist's for eight or ten cents a pound.

The lunch and meals, gotten up by Antrim are attracting a patronage 'o that establishment highly appreciated by the proprietor thereof. Antrim says his aim will be to deserve it.

We call attention of our readers to an advertisement of the Chicago Cottage Organ Company in another column, and we take pleasure in recommending to the general public a company whose Organs have attained a popular reputation for their superior musical qualities, artistic beauty, and general excellence. This company ranks among the largest and best in the United States, having capacity for manufacturing 1200 Organs per month, and its organs are shipped into nearly every inhabitable portion of the globe. The members composing the firm of the Chicago Cottage Organ Company are men of experience, integrity, skilled in their line, conduct their business on an equitable basis, and their future is destined to be a bright one.

Buy overcoats for your boys at Ralph Fendig's. He has a splendid stock, good goods, at the lowest figures.

SOMETHING NEW. WORLD RENOWNED. CENTRE DRAFT PLOW.

The Special Features of this Celebrated Plow are, that it

- 1st. NEVER CLOGS.
- 2d. ALWAYS SCOURS.
- 3d. TURNS A PERFECT FURROW.

The Beam is not bolted to the landside, but by means of a steel frog—is set directly in the Centre of the Line of Draft, making a steady light running plow, and one that cannot be clogged. See one before you buy.

If your Agent has none write us for price. MANUFACTURED ONLY BY J. I. CASE PLOW WORKS, RACINE, WIS.

CHICAGO COTTAGE ORGAN

Has attained a standard of excellence which admits of no superior. It contains every improvement that inventive genius, skill and money can produce.

OUR AIM IS TO EXCEL.

EVERY ORGAN WARRANTED FOR FIVE YEARS.

These Organs are celebrated for volume, quality of tone, quick response, artistic design, beauty in finish, perfect construction, making them the most desirable organs for homes, schools, churches, lodges, societies, etc.

THE PATENTS

After Fort years' experience in the preparation of more than One Hundred drawings, and in the United States and foreign countries, the members of the Scientific American Patent Office, as selectors for patents, are now in possession of the most complete and up-to-date information in the world. Their experience is unequalled and their facilities are unsurpassed. Drawings and specifications prepared and filed in the Patent Office on short notice. Terms very reasonable. Application for examination of models or drawings. Advice by mail free. Patents obtained through Munroe & Co. are noticed in the SCIENTIFIC AMERICAN, which has the largest circulation and is the most influential newspaper of its kind published in the world. The advantages of such a notice every patentee understands. This large and splendidly illustrated newspaper is published WEEKLY at \$3.00 a year, and is admitted to be the best paper devoted to science, mechanics, invention, engineering works, and other departments of human progress, published in any country. It contains the names of all patentees and lists of every invention patented each week. Try it four months for one dollar. Sold by all news-dealers. If you have an invention to patent write to Munroe & Co., publishers of Scientific American, 371 Broadway, New York.
