A WONDERFUL WATCH.

The Intricate Mechanism of a Cleveland Man's Timepiece.

W. T. R. Huntington, of Cleveland, is the owner of a unique watch presented to him by his father, John Huntington, a watch that is one of two, Mr. Huntington, Sr., carrying the duplicate. For both of these, it is said, the latter paid \$5,000 in gold to the makers, Messrs. J. Badollet & Co. of Geneva. The case of the one described is of pure gold, four-ounce, while the works are of the most delicate and intricate character and number 400 pieces. On the larger dial appear four smaller dials. The one at the top shows by a diagram of the sky the changes of the moon, the firmament being of inlaid lazuli, studded with golden stars. The next dial to the right shows the leap year, the tiny hand moving around the circle once in four years, and an auxiliary hand shows each month. On the dial at the bottom is a hand marking the quarter seconds and one showing the day of the month. At the left, on the fourth miniature dial, is a hand pointing out the day of the week, and another the tide as it ebbs and flows. Around the large dial, besides the usual hour and minute hand, moves a second hand and an extra horse-timer so arranged that the distance between two horses at the finish is accurately noted in quarter seconds. By pressing a button the past-hour is struck on a deep-toned bell, one of a fairy chime; the quarters are a more silvery note, and a rapidly tinkling companion gives the minutes. The watch is a stem winder and one spring furnishes the motive power.

Ceylon cats are a curious instance of what evolution has accomplished in the way of adapting creatures to environments. They have no tails, and are able, by lack of that appendage, to imitate rabbits and get them in their clutches. They are great catchers, and as such are valuable beyond all other cats in Australia. They have been introduced into this country, but whether for their hunting propensities or not is not stated. The cat family has never been utilized by man as it might be. Rat and mice catchers can also be developed into good hunters in many other directions.

New Style in Trunks.

Trunkmakers say that the gigantic Saratogas are "out of style," and that women of good sense are preferring to buy two moderate sized trunks, about forty inches long, with flat tops and iron bands and oak tips. Wicker trunks are also popular—both with women and expressmen.

In School.

Teacher—"Can you tell me the population of Wurtemburg?"

First scholar—"1,881,506."

Teacher—"Very good; still not quite correct. Does any one else know?"

Second scholar—"1,881,505."

The Atlantic-Pacific Railway Tunnel, the great project of "Brick" Pomeroy, is really being cut through the main range of the Rocky Mountains, sixty miles due west from Denver. It will shorten railway distance 250 miles between Denver and Lake City. More than 4,600 persons are now financially interested in the enterprise. The Tunnel will be five miles long and 4,400 feet below the top of Gray's peak. The company enters the year 1890 entirely free from floating debt all its bills paid and work going ahead night and day in both ends of the Tunnel. By the use of modern machinery from six to ten feet headway is gained every day. More than 250 veins of gold and silver will be crossed by the Tunnel, and its mineral rights alone will be worth millions. At the late election Pomeroy was elected to represent, and given the entire management for ten years. The company have money sufficient to carry on its work, and is taking rank among the greatest enterprises of the century. To those who care to know of it, a large descriptive illustrated pamphlet will be sent free. Address, Mark M. Pomeroy, President, 234 Broadway, New York City.
