Pursuant to a call, memorial services will be held by the friends of O. P. Morton, Sunday afternoon at the court house, in Rensselaer. We suppose the movement is stimulated by the annual memorial services held in respect to the memory of Thomas A. Hendricks, whose moral and christian character, as well as his statesmanship, was of a high order. The most that can be said of Gov. Morton is that he was an extreme partisan.

"Seeing is Believing."

And a good lamp must be simple; when it is not simple it is not good. Simple, Beautiful, Good—these words mean much, but to see "The Rochester" will impress the truth more forcibly. All metal, tough and seamless, and made in three pieces only, it is absolutely safe and unbreakable. Like Aladdin's of old, it is indeed a "wonderful lamp," for its marvelous light is purer and brighter than gas light, softer than electric light and more cheerful than either.

Look for this stamp—THE ROCHESTER. If the lamp dealer has not the genuine Rochester, and the style you want, send to us for our new illustrated catalogue, and we will send you a lamp safely by express—your choice of over 2,000 varieties from the Largest Lamp Store in the World.

A FIGHT FOR LIFE.

SHALL WE DRIVE SLOW POISON FROM OUR BREAKFAST TABLE?

ALUM AND AMMONIA IN OUR BREAD.

A nuisance that troubled England fifty years ago is now rapidly spreading in this country, that is putting alum in the bread we eat. This question is causing a great deal of discussion at the present moment, as it is well known that alum is being used as a substitute for cream of tartar in baking powders. A story is told that a very large percentage of the baking powders sold on the market contain either alum or ammonia, and many of them contain both these pernicious drugs. Much timely alum is felt at the whole sale use of alum in bread, biscuit and pastry. To young children, growing girls, persons of weakly frame, alum bread eaten morning, noon and evening is the most harmful. It is the small quantities taken at every meal that do the mischief. Alum is cheap, costing but two or three cents a pound while cream of tartar costs 30c, and the high price of cream of tartar has led cheap baking powder to be made of alum. If the reader wants to know something of the corrosive qualities of alum let him touch a piece to his tongue then reflect how it acts on the tender delicate coats of the stomach.

Following is a list compiled by the Scientific American, of the alum and ammonia baking powders that have already been tested.

Four doctors gave me up, saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my absent ones above.
