You have the privilege of returning them and get your money back should you not like the shoes.

THE HUB, N. W. Cor. State and Jackson Sts., CHICAGO.

## POPULAR SCIENCE.

Double flowers are unnatural. Petals are sometimes added at the expense of stamens. Completely doubled flowers become sterile and unable to perpetuate their kind.

At a depth of more than one hundred fathoms the Black Sea, it is said, contains so much sulphuretted hydrogen as to be unfit for the support of fishes, and the noxious gas has been traced by a recent observer to a microbe. It is said to be able to decompose mineral sulphates.

The movements of air commonly called winds are due to the heat of the sun. The warm air, being lighter, rises, and the colder air flows in to take its place. This principle is beautifully illustrated at the seashore in summer, where the daily sea breezes are due to the air over the heated land being displaced by a current of cooler air from the sea.

The floors of the hospital wards in Lyons, France, are covered with a solution of paraffine in petroleum, which makes them impervious to everything, and gives them a brown tint. A single application lasts two years. Thus prepared, the floors can be wiped up daily with a damp cloth, moistened with some antiseptic solution. The floors in private houses, when uncarpeted, can be treated in the same manner, as well as those of school-rooms, barracks, etc.

From military and other records a French Engineer has learned that in 1610 the average height of the European was 5 feet 9 inches, in 1820 it was 5 feet 5 inches and a fraction, and at present it is 5 feet 3 3/4 inches. This suggests that a regular and gradual decline is taking place. Calculation from these figures shows that at this rate the average man will have become a dwarf of 15 inches in height by the year 4000.

## FAMOUS NICKNAMES.

Queen Elizabeth was called Good Queen Bess by her friends and Bloody Bess by her enemies. She was also designated the Maiden Queen, the Queen of Virgins, the Untamed Heifer, Fortune's Empress, the Glory of Her Sex, the Miracle of Time, Astraea, Oriana, the True Diana, Gloriana, and other names respectful and the contrary.

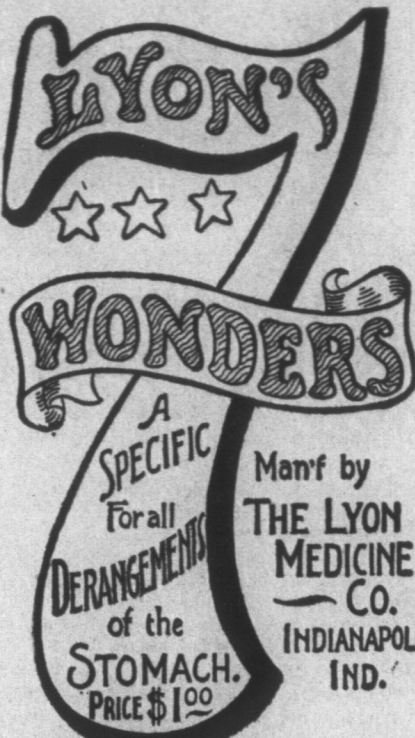

Oliver Cromwell was nicknamed the Copper-nosed Saint, in allusion to his red features. He had numerous other nicknames, among them being Almighty Blasphemer, Brewer, Brother Fountain, His Noseship, Glorious Villain, Great Leviathan, Immortal Rebel, The Impertinent, the Impostor, Man of Sin, Old Noll, the Town Bull, Lord Achon and Suggest of Usurpers.

Washington had innumerable nicknames. He was called the American Fabius, in allusion to the fact that he pursued a cautious policy, and without ever winning a battle managed to harass and worry the enemy; the Atlas of America, the Cincinnati of the West, this name by Byron; the Deliverer of America, the Father of His Country, the Step-father of His Country, the Flower of the Forest, a name given by the Indians, and Lovely Georgius, a name bestowed by the British soldiers engaged in the war.

Even so ultra a protection organ as the New York Tribune is opposed to restoring the McKinley duty on wool. Free wool is already doing its own talking, and the time is not far distant when coal and iron ore shall also be placed on the free list. If free hides and free wool have stimulated manufacturing and at the same time cheapened such necessities as boots and shoes and woollen goods, why should not all kinds of raw material be placed on the free list?

Never in the history of any country were the wages of more than a million wage earners voluntarily increased until this year. This has occurred the first year after the reduction of tariff taxation. It is a well established fact—a fact set forth by James G. Blaine in his "Twenty Years in Congress," and proven by statistics—that the most prosperous times this country ever knew was under a low tariff era, beginning after the passage of the Walker tariff of 1846, the general prosperity of the people has no parallel in our history. It is true that no millionaires developed in that period. The wealth of the nation was fairly well distributed. Under the low tariff epoch the laboring millions were not taxed to support pauper corporations.

It was prophesied by the hirelings of protection that, in case the tariff was reduced, manufacturers would quit doing business in this country; that they would close their shops; that the wages of American workmen would be cut down to the level of the thickly populated countries of the Old World. What false prophets these hirelings have shown themselves to be! Today the iron mills, the steel mills, the woolen mills, the cotton mills, the lumber mills, and other protected industries are running on full time and have more orders than they can fill, and the wages of a million workmen—mostly employed in protected industries—have been increased from 10 to 20 per cent.

FOR SALE BY ALL DRUGGISTS.

## WINONA SUMMER SCHOOL.

The arrangements for the Summer School at Winona are rapidly being perfected. The plan as developed includes the establishment of a College Department, Department of Methods, Department of Music, Elocution, Art and Physical Culture.

The College Department will comprise work in languages, ancient and modern, history, mathematics and social science, and natural and physical sciences.

The Department of Methods will comprise instruction in Psychology, Pedagogy and Kindergarten. In addition to these courses, the Department of Methods will include lectures in school management and supervision.

The Department of Music will be devoted extensively to chorus work, in addition to the work of special piano and voice culture.

The Department of Elocution will be devoted to work in general expression, articulation, voice development and reading.

The Department of Art during the present year will include free hand and perspective drawing, as well as chromatic and composition. It is intended that this work shall be adapted to the individual wants of the pupils.

The Department of Physical Culture will comprise a general course for teachers who are or intend to become teachers of Physical Culture, and will include practical training in the ordinary branches of athletics, such as base ball, tennis, track athletics, bicycling, boating and bathing.

The work of the school will be under the supervision of Prof. John M. Coulter, President of Lake Forest University, and the departments have been placed in charge of specialists in their lines.

The English Department of the school will be in charge of Prof. W. E. Henry, of Franklin College. Special attention is invited to these courses, in view of the fact that the State Teachers Association of

## A Prominent Traveling Salesman.

INDIANAPOLIS, May 10, 1894.

Lyon Medicine Company:

GENTLEMEN—I began taking LYON'S SEVEN WONDERS some time since for a very bad case of nervous dyspepsia and insomnia, and I am glad to state that it is doing for me what all other remedies tried by me failed to do—cure me. I have about finished my third box and I am more than pleased with its results, and I can cheerfully recommend it to all suffering with nervous dyspepsia as a first-class medicine, and one that has merit. You are at liberty to use this letter in any manner you may see fit, as I am anxious indeed to have every one know who suffers with this dreadful disease how to get well.

Very truly yours,

G. R. ROADERS.

885 North Mississippi Street, City.

Indiana and the State College Association have a special committee on the character and the amount of instruction in English for admission to college.

Prof. Henry, who for years was a county superintendent, brings to the work the very latest and best in Rhetoric and General English. Teachers are finding that recreation is not necessarily freedom from work. What teachers need is change rather than absolute rest. As a result, the summer school is becoming a feature of educational work which is demanding more and more attention. The Winona Assembly and Summer School is simply an expression of the general desire of the educational people of the state for recreation of the kind which is most healthful.

The work to be done at Winona during the present year will be probably largely experimental. When the needs of the teachers and the expression of their wants has become definitely known, the arrangements for the educational features will be modified to suit their needs.

It is not intended that the work done shall be general university work, although in certain lines those who are prepared to take instruction in that grade of work will have the privilege of doing so. As a rule the work in all branches will be elementary, with a gradual development into more complicated and extensive lines as occasion demands.

The college classes will convene in Chautauqua Hall, the chorus class in the auditorium, classes in voice culture as announced from the platform, physical culture in the Gymnasium, Kindergarten in Froebel Hall, and physical science in the Laboratory at 9 a. m. Classes in Bible study at 10 a. m. in the Tabernacle.

It is intended that all the school work shall be completed during the forenoon, the afternoon and evening being left free for pleasure seeking, and attendance upon the general lectures of the Assembly.

## Notes.

Foreign Mission Week will begin at Winona Assembly, Eagle Lake, Sunday, August 11, under the general direction of Dr. Thomas Marshall, Field Secretary of the Board of Foreign Missions. Dr. Marshall will preach at 11 o'clock in the morning, taking for his topic "God in the History of our Country."

On Monday, August 12th, Dr. A. F. Frodsburg will lecture upon "The Tramp—His Cause and Cure."

At the Winona Assembly, Eagle Lake, at 8 o'clock the same evening, the Rev. A. D. Darling will deliver an illustrated lecture; subject "Corea."

On Tuesday, 13, at 11 o'clock, Mrs. Wellington White will lecture upon "China." At 8 o'clock the same evening Rev. D. W. Hazlitt will give an illustrated lecture on "South America."

Christian Endeavor Days at the Winona Assembly, Eagle Lake, will be August 16, 17, 18, 19, 20, 21 and 22. J. Willis Baer, Secretary of the United Society of Christian Endeavor, will be present the first two days. This will be a grand week for the Christian Endeavor people.

"There is a conspiracy to suppress the news of improved industrial conditions admits of no doubt," says the New Albany Ledger. "It has been shown by the attitude of the Republican newspapers for some time. But the prophets of woe and the howlers of calamity have not been able to prevent the restoration of prosperity. They have retarded it to a considerable extent and delayed the consummation for six months

or more. But they have at last lost their power to hoodoo the people. Prosperity and increased wages are the order of the day."

Judge McCray, of Indianapolis, decides the Nicholson law constitutional, on the broad ground that the legislature has the right to pass such laws as police regulations. The court does not touch the points raised by the liquor dealers' counsel that the law is not specific in its application and is class legislation.

## Financial Facts.

Judge Hardy is chairman of the Sound Money League of Texas. Recently he delivered a speech on the subject. In it he made some important statements, as follows:

1. The United States today has a greater circulation per capita than any free coinage country ever did have.

2. It has more gold dollars per capita than any free coinage country on earth today has of all kinds of money.

3. It has more silver dollars per capita than any free silver country today.

4. It has more gold than silver, and the volume of its silver circulation is greater per capita than the entire circulation of gold, silver and paper reduced to silver of any free coinage nation.

5. The United States under the gold standard—since 1873—has maintained a greater circulation per capita than it ever did before.

6. There have been five times more silver coined under the gold standard, from 1873 till now, 22 years, than there was under free coinage from 1792 to 1873, 81 yrs.

7. Every nation that has adopted the gold standard (except one or two who are on depreciated paper basis) has increased its circulation.

8. No nation of first-class civilization has the silver standard.

9. Mexico is the highest type of free silver nation on earth, or double standard, so-called, and its per capita circulation is \$4.71.

10. Mexico, the best exemplar of free silver, has no middle class—has millionaires and paupers or pions.

11. The wages of no silver country on earth average a third of those in the United States.

12. No country on earth has in practice a double (gold and silver) standard.

13. No country for 200 years (since commerce became international) ever has in practice had a double standard.

14. The proposition that there can be but one standard is in fact self-evident. (Carlisle and Mr. Ingham secretary of treasury in 1830 under Jackson.)

15. Both metals under free coinage have never circulated currently and indiscriminately in any country where there are banks and money dealers. (Select committee of house under Jackson in 1832.)

16. The over-valued metal under free coinage drives out the other. (Beaton, 1834.)

In conclusion Judge Hardy said: "Believing, with Jefferson, when he was discussing a cheap money future, that honesty is the first chapter in the book of wisdom for nations. I am for the maintenance of a stable currency, and the payment of an honest dollar in satisfaction of debts and wages."

## A Record Breaking Year.

In an article on the "Taming of the Tide," in trade, printed in the North American Review. Mr. Worthington C. Ford, chief of the Federal Bureau of Statistics, points out that our exports of iron for 1895 have broken the record, as in the case of copper. In 1894 they reached \$30,000,000, and in 1895 have exceeded that figure by \$1,000,000, while in 1892, a year which had not since been exceeded, they amounted to only \$20,000,000. These exports consist largely of manufactures of iron and steel, the most desirable goods to sell abroad, as they represent the product of the highest class of skilled labor.

There is no doubt at all that with due diligence our record of manufactured exports in any line of production might easily be broken within the next twelve months. But even if we do not at once realize all our opportunities, it is something to have made in a single year such great gains in the exports of the two leading metals.

Two cargoes of iron have been shipped from Ohio to England during the last few months. Our heaviest exports of copper previous to 1894 were 56,000,000 pounds. For the fiscal year ending July 1st, 1895, 146,000,000 pounds were exported.

Thos. Davis to Wm. Murfit, Aug. 1, und. 1/2 of above, \$1,380.

## Local Medley.

Dr. Newman, "The Wonder Worker," is at the Makeever House for two weeks only. Those afflicted in any way should not fail to see this eminent physician.

Consultation free. Grandmother Kannal is taking treatment at Indiana Mineral Springs. Phegley Bros. are now proprietors of the Canbe livery stables. Mrs. Michael Schneider, Cleveland, Ohio, is visiting Jasper county relatives and friends. Emma and Will Mackay are visiting relatives in Attica.

C. W. Dvull has pressed a new dray into service. Misses Dora and Anna Cragan, Logansport, are visiting Miss Eva Kline.

A. J. Knight and Mrs. Geo. Spittler have gone to Flint, Mich., to appear as witnesses against C. Cordry on charge of bigamy.

Don't fail to call on Dr. Newman, at the Makeever House. He is acknowledged the "Wizard of the Medical Profession."

Herman Glade, a Lake county boy, received the appointment to West Point. Ruth, infant daughter of Mr. and Mrs. A. K. Yeoman, Pleasant Ridge died last Saturday, aged 11 months and 14 days.

Funeral services were held at the residence, Sunday, by Rev. B. F. Ferguson. Interment in Weston cemetery. Fritz Zard, whose illness we mentioned last week died Sunday morning at 6 o'clock, aged 61 years, 3 months and 15 days. Funeral services were held at the residence, Monday, by Rev. B. F. Ferguson. Interment in Crockett cemetery.

George Strickland gives notice in the Republican that he will apply to the Board of Commissioners of Jasper county, Indiana, at their September term, 1895, (commencing Monday, Sept. 2, '95) for a license to sell and barter spirituous, vinous, malt and all other intoxicating liquors in a less quantity than a quart at a time, with the privilege of allowing the same to be drank on the premises described; also for the grant of a privilege to establish, maintain and run a lunch counter and supply those desiring with a full meal of all kinds of edibles in the same room, and for the privilege of selling tobacco and cigars in connection therewith.

Harry Zimmerman, Meadville, Pennsylvania, is visiting his parents and friends in Rensselaer. Alf Hopkins returned Saturday from an extended cycling trip east.

Rev. Brady is spending vacation at his old home in Clinton county, Pa.

Dr. J. H. Loughridge is still living, but very low. The Dr. has long been an enterprising citizen of the town and county, and a tender sympathy for him and his family pervades the entire community.

Rev. M. R. Paradis and wife expect to return to Rensselaer next week. Those afflicted with rheumatism, deafness, or

catarrh, should call on Dr. Newman, at the Makeever House, and receive instant relief. He will be in the city just two weeks, commencing Monday, August 12th. Office hours—9 a. m. to 4 p. m.

## Willows in Ditches.

The willow craves the water's edge and grows very rapidly. The drains of the country are injured greatly by the rank growth of willows in the bottom and along the banks. Pulling or peeling in August is death to the water-loving plant.

The statute under which the Lakin and Wheatfield ditches were made requires the land owners to prevent the growth of willows in and on the banks.

If the land owner fails to look after the young willows the county auditor appoints a man to destroy them and tax up the costs to the land.

It will be well for the owners of the land on which these ditches are located to take notice of the duty; and all others whose lands were assessed to see that it is performed in due time.

The fourth Quarterly Meeting of the Rensselaer circuit, will be held at Rose Bud church, Saturday and Sunday the 17th and 18th insts. Everybody invited.

OLIVER LOUTHER, Pastor.

## Sunday Half Fare Rates.

Commencing Sunday, July 28th, and continuing every Sunday thereafter until further notice, Round trip excursion tickets will be sold between any two stations on the L. N. A. & C. R'y., when the regular one way rate is not less than 25 cents or more than \$3.50 at a rate of one fare for the round trip. Tickets sold only on Sunday; good going and returning on date of sale. Half of this rate for children between five and twelve years of age. W. H. BEAM, Ag't.

G. A. R. Encampment Rates. For the Encampment of the Grand Army of the Republic at Louisville, Sept. 11th to 14th, '95. Tickets will be sold Sept. 8th to 11th inclusive, good to return up to and including Oct. 5th, at \$4.40 for the round trip.

W. H. BEAM, Ag't.

## ROBERT RANDLE.

At the old stand of Collins & Randle, has all the 1895 improvements in Farming Implements.

The leading goods of all manufacturers in full assortment, but because of special excellence, the John Deere and the Oliver goods are the most prominently offered again this year, as the most perfect machinery made. These makes are fully up to the high standard that has made them popular so long, and considering their superiority, they are the cheapest implements sold.

The latest proven success, the wonderful DISK CULTIVATOR, tried last year, guaranteed in every particular; more durable than other kinds; a perfect tool for either level or deep cultivation; see them before buying.

A first class cultivator at \$14.00. A genuine first class top buggy, \$41.50.

Special prices on corn planters. Steel frame check row, hand drop and chain drill combined, with automatic take-up. This is an entirely new production and has only to be seen to be appreciated.

A full line of the latest patterns in stylish Buggies, Surreys, Gen. Clements' Driving Waggon, etc. Give me a call.

Jasper County Maps on Sale at Long's

## GLAD TIDINGS!

Did you ever see the New Adjustable Reclining Chair Swing? If not, you have yet to behold one of the most enjoyable inventions ever introduced. Everybody has it, the balance seat, the remainder are engaged in making it, while the sum total are employed in sounding its praise. It has been said, and that most truthfully, "It is the Parents' Comfort, the Children's Consolation, and a Perfect Delight to all."

It does not take your breath or make you dizzy, as does the long, sweeping swing; neither does it convert you into a counterfeiter of the Bow of Promise as does the Hammock, but it can be adjusted so as to be a comfort for all.

"Yes, 'tis for the children small, Or the giant, like Goliath tall; And best of all, the fat as well as lean, May enjoy its benefits most serene."

As a swing it is unexcelled; is truly the "Monarch of all we survey." We use only first-class material in making, and guarantee satisfaction. Prices as follows: Single chair,
