No. 46—Local Freight, 10:00 A.M.

Thanks to Senator Turpie for valuable public documents.

Professor James W. Douthett and Miss Bess were married at the residence of the bride's father, Mr. J. H. Cox, at Rensselaer, Ind., on Wednesday, Nov. 7, 1895.

Monday last, in Rensselaer, Ind., Pettit was fined and costed the amount of \$17.80 for selling cigarettes to boys under 16. And on the following Tuesday, in the same town for the same offense, Bert Kingsbury was fined and costed to the amount of \$19.30.

A young man at Logansport named George Hatton, aged 25, was suddenly prostrated with convulsions last week as a result of long continued cigarette smoking. He afterward fell into a stupor and is now lying at the city hospital. Cigarettes are now commonly known as " coffin nails."

The elections in various states last Tuesday was a republican landslide. The continued efforts of Gorman, Brice and Co. to dictate the policy of the Democratic party has resulted disastrously to the gentlemen named, the party and the country. We are not disheartened, however. There is time enough to recuperate, and press correct democratic principles to a successful issue in 1896.

### WANTED!

A MAN: To sell Canadian Crown Fruit, Trees, Berry Plants, Roses, shrubbery, Seed Potatoes, etc., for the largest growers of high grade stock. Seven hundred acres, hardy profitable varieties that succeed in the coldest climates. No experience required and full treatment guaranteed. Any one not earning \$50.00 per month and expenses should write us at once for particulars. Liberal commissions paid part time men. Apply now and get choice of territory.

LUKE BROTHERS COMPANY,  
Stock Exchange Building,  
Chicago, Ill.

J. H. Cox sells the best coal and wood in town, at the old stand of Dexter & Cox.

French Kitchens Are Unhealthy. The kitchens of houses in Paris, which have often been cited as models, because they are so small and convenient, have been rebelled against by the Society of French Cooks, who employed Dr. Regard to find out the causes of the alarming mortality in their profession. It was found that the kitchens were very damp, poorly lighted, and had very little or no ventilation. As a result their occupants were subject to rheumatism, varicose veins, and scurvy, to throat trouble coming from draughts and intense heat, to dyspepsia, and to alcoholism, resulting from weak constitutions. The remedy proposed is to make the kitchen at least ten feet long, eight feet wide and seven feet high.

The gain of 54,000,000 pounds in the American production of tin plate in the first year of the new tariff is a fact of the greatest possible interest to William McKinley. It shows him that he has not labored in vain. The prayers he made for the preservation of the infant tin plate industry have been answered. The Democratic tariff law abolished the absurd McKinley duty of 4 cents a pound on tin ore, and reduced the duty on tin plate one-half. Two to six new mills, which have begun operations in a single year, will come very near increasing the annual output to an equality with the total annual consumption.

### SECTARIAN NAMES.

The Agnostic is so named because he claims that we can know nothing of the supernatural, of God, or of a future state.

The Macedonians, a sect of Christians in the early centuries, were led by Macedonius, the Patriarch of Constantinople.

The Cameronians, a Scottish sect, were called from their leader, Archibald Cameron, who was put to death in 1688.

The Lollards, a sect of reformers, were named after Walter Lollard, or Lollard, who was burned for heresy in 1322.

The Polytheist took his name from two Greek words signifying many gods. The Polytheist believed in the plurality of deities.

The Sabbatarians were so called from their observing the seventh day as the Sabbath. Their founder was named Braboune.

The Trappists were so called from La Trappe, the French district in which their first monastic establishment was founded.

The Irvingites had their name from Edward Irving, a religious teacher and expounder of prophecies; born 1792, died 1834.

The Adamites, a sect of the fourteenth century, were named from one Picard, who called himself Adam, the Son of God.

The Baptists had their name from John the Baptist, they claiming to perform the rite of baptism in the manner that he did.

The word Atheist comes from two Greek words signifying "no god." An Atheist is a disbeliever in the existence of any deity.

The Redemptorist Fathers, also known as Liguorians, had their name from St. Francis Liguori, who founded the order in 1732.

The Unitarians were thus named because they denied the doctrine of the Trinity. In theory they are opposed to the Trinitarians.

The Arians had their name from Arius, who died A. D. 336. Their main doctrine was a disbelief in the divine nature of Jesus Christ.

### GRAINS OF GOLD.

Envy is the dividend of success. Nothing is so trustworthy as love. The smile that helps others has to begin in the heart.

The earnestness of life is the only passport to the satisfaction of life. Patience is the support of weakness; impatience is the ruin of strength.

Good humor is one of the best articles of dress that one can wear in society.

Be something that will warm aching hearts. Something that will cheer hopeless lives.

While opportunity awaits every man, it does not devote its leisure to blowing a horn.

The man who makes a specialty of looking for flies in the ointment finds plenty to do.

The man who thinks it right to steal is a thief, no matter whether he robs anybody or not.

Let your light shine in the home. Don't be turning it down all the time, as you do the gas.

The hypocrite holds up his head a little higher every time he sees a good man make a stumbling step.

A man of grumbling spirit may eat a very poor dinner from silver plate, while one with a grateful heart may feast upon a crust.

A Persian philosopher, being asked by what method he had acquired so much knowledge, answered: "By not being prevented by shame from asking questions when I was ignorant."

Don't try to see how much you can get, and how little you can do, but consider the day lost on which you have not done something to make somebody glad that you have lived.

### OUR NATIONAL WEALTH.

Our savings banks, being supported mostly by the middle and poorer classes of people, furnish perhaps the best indication of the prosperity or adversity of the masses.

Gold and silver are much more extensively used in the West than in the East. On the Pacific coast the gold and silver almost supplant the paper money as a circulating medium.

According to the eleventh census the wealth of the country was distributed very unevenly, the Northern and Western States being far heavier in proportion to population than the Southern.

The greatest difficulty in estimating the wealth of the United States lies in ascertaining the value of the personal property, which constitutes a very considerable item of our national wealth.

In wealth, Pennsylvania ranks next to New York, having an assessed valuation of \$1,683,459,016, owing largely to the enormous manufactures carried on within the limits of this commonwealth.

An authority on clothing estimates that every man, woman and child in this country has at least \$10 worth of clothes. This would make the value of our national garments exceed \$600,000,000.

The total amount of gold coined at our mints from 1793 to 1892 was \$1,682,000,000; of silver, during the same period, there have been \$637,000,000; and of subsidiary coinage of all denominations, \$24,000,000.

In the year 1891 there were circulating in the United States \$1,175,000,000. The gold, silver and currency held in the United States treasury at the same time would increase the nominal sum to over \$2,000,000,000.

Austin, Hollingsworth & Co. are now the proprietors of the only complete set of Abstract Books in Jasper county, and are prepared to furnish Abstracts of Title on short notice and reasonable terms.

## POPULAR SCIENCE.

Surveys and examinations of the bituminous coal beds of Pennsylvania have led the Government experts to announce that at the present rate of consumption the supply will not be exhausted for 800 years to come.

Mr. J. W. Spencer, who has been examining the evidence that the West Indies were once a part of a great continent, concludes that it existed, and that these islands were once connected with what is now the mainland of North America.

The extent to which a chimney can poison the atmosphere has been scientifically determined by a test made in Berlin. The soot which comes out of the chimney of a single sugar refinery was gathered for six days and found to weigh 6,800 pounds.

To the moisture in the air we are indebted for the maintenance of an even degree of temperature. But for it might be colder than Greenland, even at the tropics. It is the water in the air that holds the sun's heat and keeps the earth warm where direct sunlight fails to fall upon bodies.

It is said that there is no better or simpler way of testing suspected water than the following: Fill a clean pint bottle nearly full of the water to be tested, and dissolve in it half a teaspoonful of loaf or granulated sugar. Cork the bottle and keep in a warm place two days. If the water becomes cloudy or milky within forty-eight hours it is unfit for domestic use.

Prof. Russell, who has made scientific inquiry into nearly 100 instances of rain and snow falls from the clear sky, says that he has found that in the majority of such instances the fall took place on the southwest side of an area of low barometer at a distance of about 500 miles from its center. Two noted instances of the kind under consideration, one of snow and the other of rain, have received much attention from the meteorologists. The first was a snow storm from a clear sky at Bloomington, Ill., March 15, 1855, in which the ground was covered to the depth of an inch; the second, a heavy shower of rain at Vevay, Ind., on the afternoon of June 30, 1877. In neither case was there a single cloud visible.

### OUR NATIONAL WEALTH.

Between 1860 and 1870 the abolition of slavery destroyed a nominal wealth of a quarter of a billion of dollars; during the same period the Northern States gained enormously in wealth, by the establishment of many new industries.

In 1880, according to the returns of the tenth census, the United States was the wealthiest of all nations, Great Britain being second; and there is no doubt that the last fifteen years have greatly widened the gap between us and the English.

When the last census was taken the value of the railroad property of this country was considered to be equal to the cost of construction and equipment, as reported by the railroad companies. No account was taken of the increase of stock.

The difference in valuation of property at the last census was very remarkable. In some States the assessment was no more than 25 per cent of the real value of the property, while in other cases it is believed to have been as high as the selling price.

The decade between 1870 and 1880 does not show as much progress as might be expected, owing to the fact that through over-production, stimulated by the war, there was an immense shrinkage in apparent values, and also in assessed valuation.

Our coinage has mainly been executed at the Philadelphia mint, established in 1793. There are three other mints, one at San Francisco, established in 1854; one at New Orleans, established in 1838, and one at Carson City, Nev., established in 1870.

The last census made no account of notes, bonds, or other promises to pay, whether public or private, and these were not included in the estimated wealth for the reason that, while they are owned by one individual or corporation, they are owed by another.
