WARREN & IRWIN.

An exchange says: On the summit of a high hill in central Potter county Pa., are four springs, so near together that a person may carry water in the hollow of his hand from any one of them and drop some of it in the other three. In one of these springs the Allegheny river has its source. Another is the fountain head of the Genesee river. In the third the Sinnemahoning creek rises, and the fourth sends forth Pine creek. The waters thus started from one spring have their origin in the Gulf of Mexico, those of another in the Gulf of St. Lawrence and those of the other two in the Chesapeake Bay.

Terms of the Bible.

A day's journey was about twenty-three and one-fifth miles.
A Sabbath day's journey was about an English mile.
A cubit was nearly twenty-two inches.
A hand's breadth is equal to three and five-eighths inches.
A finger's breadth is equal to one inch.
A shekel of silver was about 50 cents.
A shekel of gold was \$8.
A talent of silver was \$538.30.
A talent of gold was \$13,809.
A piece of silver, or a penny, was thirteen cents.
A farthing was three cents.
A mite was less than a quarter of a cent.
A gerah was one cent.
An ephah or bath contained seven gallons and five pints.
A firkin was about eight and seven-eighths gallons.
An omer was six pints.
A cab was three pints.

An Object Lesson in Tin-Plate.

The growth of the tin-plate industry in the United States during the last two years emphasizes the superiority of increasing manufacturing prosperity. While the McKinley schedule of duties was in existence the American tin plate company at Elwood, Ind., was a four-mill plant, employing 300 men, with a payroll of \$3,000. After an experience of a little over a year of the Wilson bill the same concern has been enlarged to a sixteen-mill, twenty-one-stock plant, employing 1,300 men, making 15,000 boxes per week, and its payroll is increased to \$55,000. The other day the stockholders ordered its facilities to be expanded 15 per cent. Other tin plate mills throughout the country show a similar growth. On the other hand, as a result of the 160 tin plate mills now successfully operating in the United States, 250 mills are idle in South Wales from which this country formerly received all its supply.—St. Louis Post-Dispatch.

Dishes Made from Rabbits' Hair.

Bowls, dishes and plates are made from the hair of rabbits and other animals in Russia. The articles are felted and afterward varnished. These utensils have the appearance of paper-mache, or varnished leather, and possess the properties of being strong, durable and exceedingly light.

Would Benefit No One.

"I have a notion to turn you over to the police," said the prosperous citizen. "I don't see no sense in that," answered the begging gentleman. "It wouldn't do you no good; it wouldn't do me no good, and it wouldn't do the police no good, 'cause I ain't took in a cent to-day."

Get Your Vouchers.

The new pension law goes into effect at the next drawing, May 4, and it involves a condition that should be known beforehand to every veteran, that he may have no difficulty nor delay in getting his money. The purport of the law is that every veteran shall draw his money by mail. None can go to Indianapolis and draw. To draw by mail every veteran must send his voucher in. Those who have been drawing by mail will have these vouchers, but those who have not, will have to send in previous to the draw a'd get them. It is anticipated that a great number over the state will not understand this previous to their attempt to make their draw and will consequently be delayed for ten days or more.

The Republicans are quarreling among themselves over the authorship of the reciprocity clause in the McKinley tariff. It was known at the time who the author was.—Blaine was the man and he said that without reciprocity, the McKinley law would not provide a market for another bushel of wheat or barrel of pork. Reciprocity is nothing more than free trade in spots, and the more reciprocal trade we can have with the nations of the earth the greater and richer will our own nation become.

The more goods we can sell abroad the more work for the millions of people coming to our shores. We now produce of farm products 25 per cent more than our own people can use. In many lines of manufacturing our facilities for production are ample to produce a year's supply in six months. The more reciprocity the more markets for our surplus productions.

If the Republicans keep on as they are going now it will only be a few years until they will be quarreling among themselves as to who among them was the first to advocate free trade.—Logansport Pharos.

What Democratic Dissension Means.

The fact that McKinleyism has been thoroughly beaten since will not check a republican retreat to it if democratic dissension over 16 to 1 enable the republican party to win with McKinley as a standard bearer. The victory will be hailed as a popular indication of protective policy, tariff plundering will be renewed and the battle for the interests of the plain people will have to be fought over again.—St. Louis Republic.
