

POLY MAN WILL BOSS INDIA IRON CONCERN.

D. O. Shaver Signs Contract to Go to Sachki—Brazil Student to Post Graduate.

D. R. Shover, Rose Polytechnic class '96, recently received an offer from a British firm of the position of the general manager of the famous Tata iron and steel works at Sachki, India. This works employs about five thousand men and is where a large part of the ore from the mines throughout India is refined. Mr. Shover was formerly superintendent of the Brier Hill Steel company at Youngstown, Ohio. He will leave this month for his new position.

According to a letter received from A. d'Amorin '06, a student from Brazil, South America, he will return to take a post-graduate course at the local school. d'Amorin is at present connected with a large electric railway concern in Brazil. He states in his letter, however, that times are very bad in South American countries on account of the European trouble, and that many large concerns have been forced to close down. His own company has been idle for more than a month and will not begin work again for some time. Mr. d'Amorin hopes to take advantage of his enforced idleness by attending school at Rose and specializing in electrical subjects.

John Scott, '14, left recently for Hammond, Ind., where he is employed by the Indiana Laboratories companies.

The members of the M. E. P. fraternity are very proud over their new billiard room, which they have fitted up in the basement of their new house on North Eighth street. The tables were received last week and the room has been fitted up very comfortably.

The members of the Rose Symphony club met Friday and elected officers for the coming year. Those chosen are: R. A. Weinhardt, president; J. M. Sanford, vice president; F. E. Bundy, second vice president; R. E. Flinley, third vice president; and S. C. Liebing, secretary-treasurer. A committee of Sanford, Liebing and Rissler was appointed to make arrangements for a concert to be held some time after the midterm examinations. This will be sometime near Thanksgiving.

The Glee club held its first rehearsal Thursday evening and will meet again next Wednesday. The prospects for the year are encouraging, and concerts are to be arranged for at Paris, Sullivan and Marshall. The Glee club will also take part in the Symphony club concert. Freshmen especially are invited to attend the rehearsals of the club.

Rose Polytechnic is to possess a fifteen-piece orchestra this year, according to reports. The first rehearsal was held last week and an exceptional number was in attendance. The freshman class possesses good material. L. E. Amour is a clever violinist and Dan Howard plays the clarinet. Marilyn Evans will aid the orchestra with the double bass. Both Howard and Evans were formerly members of the Washington avenue symphony orchestra.

The first of a series of lectures to be given to the Rose students by different graduates of the school will be delivered October 15 by D. Kranichfeld, '07. Mr. Kranichfeld is now assistant to the chairman of the committee on accident prevention and workmen's compensations of the National Association of Manufacturers. Kranichfeld, an engineer, has made a specialty of accident prevention, and it is upon this subject that he will talk. The lecture is to be illustrated with stereopticon views and will be open to the general public.

A. L. Brennan was a guest at the M. E. P. house for the week-end. Mr. Brennan is at present located with the Prest-O-Lite company, of Indianapolis.

Ernest L. Rae, of Marshall, Ill., returned to school last week. Rae is taking the course in architecture.

The M. E. P. smoker will be held Friday, October 16, at 8 o'clock.

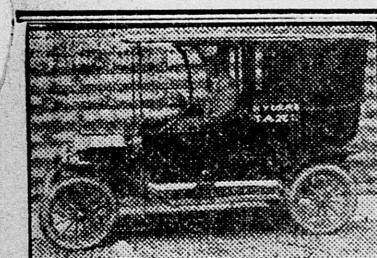

The marriage of H. M. Leathers, '14, to Miss Fern Weekly has just been announced. Leathers is connected with the Cutler Hammer company, of Milwaukee, and after the marriage the couple left for Chicago. They will take a trip through the northern states and lower Canada on their honeymoon and then return to Milwaukee.

The Alpha Chi Sigma fraternity will hold a smoker next Tuesday evening.

Gordon Eshelman and Frank A. Rogers, both of last year's graduating class, spent the week-end at the Sigma Nu house. Eshelman is at present dealing in automobiles and is located at Lawrenceville, Ind.

HIGHWAYMAN FOILED WHEN VICTIM RESISTS

Old Man Fights Assailant on Bridge Near Clinton, and Survives the Attack.

By Special Correspondent.

CLINTON, Ind., Oct. 10.—A bold attempt at daylight robbery was made this forenoon, when a man seized Harry Gosnell, aged 62 years, on the wagon bridge and attempted to make him disgorge what money he had. Mr. Gosnell, came here seeking work, Friday, and is a cousin of Fred Gosnell, a saloon man. The thief grappled with the old man and told him that if he did not give up his money, he "would knock him in the head and throw him in the river." The old man fought back and finally escaped toward the city. He at once reported the matter to the police but by the time an officer arrived the robber had made good his escape. The victim says he could identify the man if he should see him, although he could not give a very accurate description.

Organ Recital.

CLINTON, Ind., Oct. 10.—The ticket sale for the sacred concert and pipe organ recital, to be held at the Catholic church Sunday night, in which a number of Terre Haute people will participate, indicates that the edifice will be crowded to capacity. The pipe organ has been installed and given a tryout and the results are very gratifying. This is the first pipe organ in Clinton.

New Theatre Opens.

CLINTON, Ind., Oct. 10.—The new Orpheum theatre, owned by Othor Stone and Joe Moore, two of Clinton's well known business men, was opened to the public last night and was crowded to capacity from the time that it was opened until the closing hour. The house has been entirely remodeled and redecorated and is one of the best picture houses in the city.

Plan "Discovery Day."

CLINTON, Ind., Oct. 10.—Clinton's Italian lodges have been making great preparations for the celebrating of "Discovery day," Monday. The celebration will start off with a big parade, followed by an address, at which Roy Shattuck, of Brazil, will be the principal speaker. All the mines will be idle on that day.

IMMUNE FROM BULLETS, BUT HAD TO HAVE THE AIR

CLEVELAND, Oct. 10.—Sherlock Holmes was badly needed for a time out on West Fifty-fourth street while Patrolman Dinnen, with his guests, two Pennsylvania railroad detectives from Cambria county, Pennsylvania, pre-spired and searched in vain an hour for Harry E. Filler, twenty-eight years old, wanted on a larceny charge.

And when they found "their man," Dr. Watson, Sherlock's friend, was needed to revive the prisoner, who had been hiding for an hour in an open boiler containing four feet of water, ducking his head when his pursuers looked his way.

Filler, arrested at his home, ran down West Fifty-fourth street, dodged nine bullets fired by his pursuers, and disappeared as though by magic in the American Shipbuilding company yards on the lake shore.

The visiting detectives enlisted Dinnen, and the search was on. It was only when Filler was forced to bob to the surface for air that he was seen.

The annual diamond medal contest was held this evening at the First

Calgary, Alta., Oct. 10.—Representing an investment of nearly \$700,000 and a reclaimed area of over 30,000,000 acres, the international irrigation congress met here for its twenty-first annual session. This is the first time this congress has met outside the United States for its annual session in its history. Formed in 1891, in Salt Lake City, the irrigation congress has a record of achievement not equalled by any of the other various congresses held annually in the United States. Largely through its efforts, not only has the vast area of over 30,000,000 acres been reclaimed to agriculture in the United States and Canada, but its efforts to conserve the nation's forests were among the first on the continent.

This year's session was undoubtedly the most important yet held by the congress. Last year has witnessed the completion of several huge reclamation and irrigation projects and today irrigation is conceded to be one of the prime reasons of the wonderful development of North America's mighty west.

To the United States this session has a special significance. For the first time will the American irrigationists be able to see with their own eyes the progress made by Canada on lines which still perplex many of the states and, incidentally, learn how Canada has been able to draw large numbers of wealthy American farmers to its side of the line every year.

To the people of the world this twenty-first meeting of a great international organization will prove a clearing house of information, experience, practices and results of irrigation developed throughout the vast range of arid and semi-arid lands which have been brought under subjugation by man and which are adding daily to nations' wealth at a prodigious pace.

A feature of the year's session will be the opportunity to see and review the largest single irrigation project in the world, only a few miles from Calgary.

This project is the Canadian Pacific railway company's irrigation block containing altogether some 8,000,000 acres. How large this project really is, one has only to compare this acreage with that of some of the states. The area of this irrigation block is five times as large as the irrigated area of Utah; greater than the irrigated area of California, and greater than one-fifth of the total irrigated area of the United States. Nearly one million acres have already been brought under ditch and the total length of canals and ditches of this vast undertaking exceeds 5,100 miles.

THE OLD FASHIONED S.

Sort of like those letters queer prints used in days of yore.

Kind of fills me up with cheer.

As I sit and look them o'er.

Take the "I" they used for "s"—

Don't you see it makes a "sun."

Look like nothing more nor less.

Than a glorious bit of "fun."

Yes—the "fun" that I am after.

Fills the world with light and laughter.

Judge.
