

Ford

THE UNIVERSAL CAR

The Ford Coupe, with electric self starting and lighting system, has a big, broad seat deeply upholstered. Sliding plate glass windows so that the breeze can sweep right through the open car. Or in case of a storm, the Coupe becomes a closed car, snug, rain-proof and dust-proof. Has all the Ford economies in operation and maintenance. A car that lasts and serves satisfactorily as long as it lasts. Demountable rims with 3 1/2 inch tires all around. For the doctor and travelling salesman it is the ideal car.

Remember when the first automobile came to town

TODAY there are more than 7,000,000 of them in the country. Pretty soon nearly everybody in this section will be traveling around in his own automobile.

II

The first thing a man wants to know nowadays, when he starts out to buy a car, is *how much it is going to cost him to keep it running.*

It's all very well to take some dealer's word about a tire—if you know *who he is* and his *object* in selling it to you.

Our object in selling U. S. Tires is to have you *come back* for more—and be glad

that we sold them to you.

III

U. S. Tires have a record behind them.

They are built by the people who perfected the *first* straight side automobile tire, who produced the *first* pneumatic truck tire.

Two of the greatest contributions to *tire* and *motor economy* ever made.

IV

As representatives of the oldest and largest rubber concern in the world, we have a reputation to live up to. We can't afford to substitute "just as good" tires for tires of *standard quality.*
