The community was dreadfully shocked when the news was given out on Friday evening that Alice had died from the dreaded disease, diphtheria, as very few knew that Alice was sick. She was a very lovable child, very bright in school studies and beginning to be of good help in the home. The little girl will be greatly missed by every one who knew her as she was a great favorite with the people while her

For the Real Xmas Spirit

These days, holiday joys are not confined to candles, wreaths, balls, or even trees. The celebration that is without music lacks real Christmas spirit. On The Brunswick music is reproduced in tones that are exquisite. Music that thrills the very soul.

And why is Brunswick music different? Because it has a distinctly exclusive Method of Reproduction.

The Method of Reproduction

The new Brunswick Method of Reproduction is the most advanced and finest yet devised. In perfecting it all old standards were discarded. Heretofore the instrument you bought determined your range of choice of records. The Brunswick has lifted the ban on the selections of other makers. With it you play all records of whatever make. Moreover, it plays all records at their best. And all this by means of the Ultona and the Tone Amplifier.

The Ultona

The Ultona — a scientific creation — is an all-in-one reproducer. It supplies, at a turn of the hand, the right needle, diaphragm and weight for playing any make record.

The Tone Amplifier

The Tone Amplifier is the all-wood, vibrant throat of The Brunswick. It is oval shaped — moulded to meet musical and acoustical laws. Truer, richer, sweeter tones — those that were hitherto lost in phonographic reproduction — are restored by this great invention.

A Brunswick Recital — Especially for You

Come here today. Tell us what records you like most and we will be glad to arrange a Brunswick concert for you. No obligation whatever. The pleasure is all ours.
