

## OIL INDUSTRY IS THRIVING IN KENTUCKY

THE HILLIS BROTHERS OIL COMPANY, PIONEERS IN THE DEVELOPMENT OF OIL, AND THE DULIN OIL COMPANY ARE TWO OF THE RICHEST AND MOST PRODUCTIVE COMPANIES IN KENTUCKY.

### LOCAL MEN ARE INTERESTED

That Kentucky has forged to the front almost overnight as one of the largest oil producing states in the United States during the season of 1919 is evidenced by the report of the pipe line runs, which show that there has been approximately 6,000,000 barrels of crude oil produced in the state during the last seven months, which is nearly 2,000,000 barrels more than the total production for the entire season of 1918, during which 4,935,950 barrels were reported.

Greencastle can well afford to take great pride in reading such reports as the above given out concerning the great oil production which is taking place in the fields of Kentucky. Through the efforts and financial aid of a number of Greencastle citizens the richest industry of the world has been made possible. Probably the richest oil company in Kentucky is that which is owned by Charles R. Dulin. Mr. Dulin began the oil game in 1913 by leasing four acres in Estill county. He brought in his first well, which was a three-barrel well, in 1914. This was a little encouraging and with renewed determination he drilled his No. 2 well, which proved to be more discouraging than the first one. With more determination than ever he drilled the third well, which proved to be a five-barrel well, and well No. 4 made twenty-five barrels per day. With much perseverance Mr. Dulin has developed 30,000 acres of the richest and choicest gas lands in the state of Kentucky. In referring to the Dulin Oil Company the Lexington (Ky.) Herald says in part:

"Mr. Dulin financed and developed the Maple tract in Estill county and it was Indiana money that drilled the first four wells. Some people have the idea that Mr. Dulin is a native of Kentucky and has only been in the oil game since the opening of this Irvine field. He is a native of West Virginia and his father, Charles Dulin, was a pioneer in the oil development in that state. Mr. Dulin has been brought up in oil fields and has practical knowledge of every phase of the game.

"Mr. Dulin then organized the present Dulin Oil Company, and the new company adopted a policy that reflected the same progressive and enterprising spirit that had so marked the activities of Mr. Dulin since he first entered the industry in Kentucky.

"The present holdings of the company are over thirty thousand acres of the choicest oil and gas lands in the state. Part of this lies in the heart of the valuable territory owned by the Standard Oil Company. Fifteen thousand acres of it is in Clay county. This county is possibly the largest container of gas so far discovered in the state. It holds what is now believed to be the largest gas pool in the country. One well owned by the company is capable with ease of making five million cubic feet of gas per day.

company. The company owns leases on about four thousand acres which they believe to be valuable territory and will prove to be very productive. They expect to start development in the near future. Fred Hillis owns independently of the Hillis Oil Company over four thousand acres on which he expects to start development soon.

gas per day."

### LOCAL NEWS.

Mr. and Mrs. Milford McGaughey and son, of Russellville, are in Greencastle today on business.

Sim Sayers, Jack Bridges and Mrs. J. M. King drove to Indianapolis today in the Sayers car.

Mr. and Mrs. Ben Corwin have returned from a delightful motor trip in the East.

Mr. and Mrs. F. G. Gilmore, who have spent the past several summers at Bay View, Mich., have purchased an attractive cottage there.

Miss Minnie May Bartley has had as her guests for the last week Miss Mayme Pollock and Miss Lucille Pollock, of Roachdale. Mayor and Mrs. Bartley and daughter drove this afternoon to Roachdale, taking with them the Misses Pollock.

The Rev. Banks, of Bedford, took for his text Wednesday at the Bethel Chapel tent meeting: "No room for Christ." The revival meeting was attended by about 700 people. The Rev. W. E. Houghton, of Franklin, Ind., who has charge of the music, is gaining great favor with the people. The meeting is being attended by many Greencastle folks.

Miss Marie Banks, of Bedford, was in Fillmore, Wednesday, visiting her father, the Rev. Banks who is conducting revival services at Bethel Chapel, near Fillmore.

A pretty luncheon was given at noon today by Miss Frances Grose, daughter of Dr. and Mrs. George R. Grose, for Miss Jean Merrikan, of Baltimore, Md., who is visiting Miss Grose. The following guests were present: Miss Margaret Shoptaugh, Miss Helen Kersey, Miss Edith Watson, Miss Helen Gordon, Miss Francis Hester, Miss Mary Fraley, Miss Helen Fraley and Miss Martha Wagner.

Mrs. G. N. Logan has returned to her home in Greencastle after having visited her daughter in Dale, Ind., and relatives in Bloomington and Mitchell, Ind.

### CHAS. MADISON.

Brother and Mrs. McHenry, the evangelists; Mr. and Mrs. Moore and Miss Morris spent Tuesday with Mr. and Mrs. S. H. Talley.

Mrs. Walter Silverthorn and children, Irene and Emmett, from Indianapolis; Mrs. Russell Tulley, from New Augusta, Ind., are visiting their friend, Mrs. Ella Call, and also relatives in West Madison.

Eugene Anderson is on the farm this week doing carpenter work.

Mr. and Mrs. John Quinlisk, Mr. and Mrs. Scott Irwin, Mr. and Mrs. Marion Wright, Mrs. Nannie Cutbirth and Claud Cantonwine all motored to Indianapolis to visit Hoagland Spencer and family and other friends.

Aunt Rebekah Alspaugh is visiting with her nephew, Charles Goddard, at Clinton Falls.

Ivan Ruark and family were called to the home of his father, Saturday. His father suddenly died of heart trouble.

Harold Call and Mr. and Mrs. S. H. Talley attended the Clarence Irwin sale, Monday.

Mr. Mason and family, who have lived on Earl Ellis' farm this summer, have moved to Brazil.

H. W. Burns, of Terre Haute, is in Greencastle today visiting Charles Williams. Mr. Burns resided in Greencastle twenty years, where he conducted a grocery store on the north side of the square. His residence while in Greencastle was on West Washington street. He is now in the drug business in Terre Haute.

The Bainbridge band will give a concert this evening at Bainbridge. The usual large crowd is expected.

## Now For the Threshers

## PROSECUTING ATTORNEY TO INVESTIGATE

PROFITEERING AND ABNORMAL PRICES TO BE PROBED BY FEDERAL AUTHORITIES WITH AID OF ATTORNEYS ALL OVER THE UNITED STATES.

### WISH STAPLE PRICE LIST

One of a number of letters which is being sent out from the office of the attorney general to the prosecuting attorneys of the states urging their assistance during food investigation has been received by F. S. Hamilton. He is urged to render his assistance in gathering local evidence.

To the Prosecuting Attorneys:

Under the present agitation by federal and state authorities to correct the evils of extortion and to reduce the high cost of living, I find very little in our anti-trust laws to give us hope to accomplish the prosecution of profiteers and extortionists.

However, it is the duty of the attorney general and the prosecuting attorneys to institute proceedings to prevent and restrain violations of the provisions of our anti-trust law. The federal government is making an extensive investigation and has unlimited means with which to do it. This department is almost without funds for that purpose at this time. However I am willing to do everything possible.

My idea is to get the people to thinking about the real conditions and to discuss the profits made by the dealers. In other words, if the people will study and discuss the cost of production and the prices the customers are required to pay and make it public, it will do much toward destroying extortion and profiteering. Neither the federal nor our state law provides any penalty for what is commonly known as "profiteering," or charging extortionate prices, especially of staple article and materials that enter into such things. If we cannot use the information ourselves, it may be that we can aid the federal authorities by turning it over to them. I trust you will help to arouse your people to the importance of this movement. It is patriotic. The practice of extortion and profiteering is sure to lead to Bolshevism. No more important matter has been called to the attention of the attorney general's department and the prosecuting attorney's offices than this.

I hope to hear from you and if I get further information that I believe will aid you I will communicate with you.

Very respectfully,  
ELE STANSBURY,  
Attorney General.

will aid you I will communicate with you.

Very respectfully,  
ELE STANSBURY,  
Attorney General.

### OIL IS STRUCK NEAR BLOOMINGTON

Bloomington, Ind., August 14.—Oil was struck today at a depth of 2,300 feet in a well being sunk by George Timberlake and Harry Orchard of this city and E. T. Williams of Caspar, Wyo. Work has been stopped, awaiting the arrival of experts.

It will be decided when the experts arrive whether to shoot the well or what future action to take. The company has been drilling on the Koozts land ten miles southwest of this city since May and has been working day and night shifts. Before work was started options were taken on hundreds of acres of land in the same locality. Oil experts from Colorado and geologists made favorable reports on the location as a place where a strike might be made.

### CLINTON CENTER.

Miss Lucille Bettis died at her home Friday afternoon at 3:20 o'clock. Funeral took place Sunday afternoon at the Dunkard church.

Mrs. Opal Conley is visiting her mother, Mrs. Will Davis.

Miss Ruby Mancher, of Indianapolis, is here visiting relatives.

Miss Carrie Henery visited Miss Frances Goddard Sunday afternoon. Mrs. Sadie Burk, who has her limb broken, is improving slowly.

Mrs. Mollie Smalley, of Terre Haute, visited Miss Mary Jane Kent, Sunday.

There was meeting at the Dunkard church Sunday morning and evening by Brother Root.

Mrs. Emily Boswell is here from Brick Chapel visiting her daughter Mrs. Eula Staggs.

Several from around here are attending the Chautauqua at Rockville this week.

Mrs. Rose Hall, of Brazil, visited her mother, Mrs. Sarah Bettis, Saturday night.

John Burk and family and Mr. and Mrs. Jacob Thomas made a business trip to Greencastle one day last week.

Miss Ethel Fulford returned home from Ellettsville, Saturday.

Miss Mary Hood, of Lena, is visiting her aunt, Mrs. Sadie Bettis, this week.

Born to Mr. and Mrs. Dempsey Francis August 10, a daughter, named Edna Alberta.

Charles Miller and Mr. and Mrs. Edward Bettis called on Mrs. Sarah Bettis and son, Clay, one night last week.

Mr. and Mrs. Archie Martin and family, of Vivalia, called on Mr. and Mrs. John Bee, Sunday.

## FORTUNE IS GIVEN STATE BY CARNEGIE

PHILANTHROPIST CONTRIBUTED \$2,614,900 TO INDIANA LIBRARIES WHICH SERVE 165 COMMUNITIES — COLLEGE LIBRARY ERRECTED THROUGH GENEROSITY OF STEEL KING.

### DEPAUW GIFT \$55,000

Andrew Carnegie contributed \$2,614,900 to Indiana libraries, according to William J. Hamilton, secretary of the public library commission. Of the total amount of money distributed in this state through Mr. Carnegie's generosity, \$2,522,000 went to public libraries and \$92,900 was given to the libraries of DePauw University and Earlham College. The gifts were made partly by Mr. Carnegie himself and partly by the Carnegie corporation.

The libraries established in Indiana by Mr. Carnegie serve 165 communities. In addition to the money donated to libraries in Indiana, Mr. Carnegie offered \$55,000 more to five communities in the state and the offers were refused. The amount refused is about 2 per cent of the total amount given to Indiana by the deceased steel king.

Mr. Hamilton said it has been stated recently that the library in Goshen was the first library established in Indiana by Mr. Carnegie. He said that no definite information is available concerning the date of the gift of funds to Goshen, but that the library in that city was not the first to be completed in Indiana as a result of aid from Mr. Carnegie. He pointed out that three other Carnegie libraries were opened in the state before the Goshen library.

The first Carnegie library opened in Indiana was at Crawfordsville, which began library service July 29, 1902, the gift of funds being received March 8, 1901. The Portland library was completed in September, 1902, and the Marion building was opened December 6 of the same year. The Goshen library was not completed until January 15, 1903.

### ANNUAL BROWNING REUNION.

The twenty-second annual Browning reunion will be held Thursday, August 21, at McLean Springs. All interurban cars will be met with autos at Stop 31.

F. M. Lyons is driving a new Ford coupe.

### TROOPS HELD READY IN PEORIA STEEL STRIKE

Peoria, Ill., August 14.—Illinois reserve militia units were ready today to march to the Keystone steel and wire plant in South Bartonville and preserve order in the steel mills, where fighting yesterday between striking employees and deputy sheriffs resulted in the injury of five persons.

A number of shots were fired last night, but today there was no sign of further rioting. Several explosions, believed to be dynamite blasts, shook the works of the plant early today. That the blasts were inside of the guarded works of the Keystone mills was admitted by officials of the company.

The trouble dates back two months when the employees struck for higher wages and a closed shop. The company granted an increase in pay but declined to recognize the union. The plant has been closed several weeks.

### HELD ON FORGERY CHARGE.

Spencer, Ind., August 14.—Acting upon telephone information from Bloomington, a young man giving the name of Frank Hall and also the name of Baxter of Oolitic, Ind., was arrested here this afternoon by Sheriff Fulk and S. E. Yockey. Hall is said to be wanted for alleged forgery at Bloomington and Bedford. He is in jail awaiting the arrival of Monroe county officers.

### PROF. CLEMENT SPEAKS BEFORE PARKE CO. INSTITUTE

Prof. J. A. Clement went to Rockville today, where he will deliver an address this afternoon before the teachers of Parke county on "Mental Measurement." Friday afternoon he will speak on "Junior High Schools in Indiana." Prof. Clement is especially interested in the junior high schools of this state, having secured statistics showing the worth and progress made by these schools during the past year. The Parke county institute is held in connection each year with the Rockville Chautauqua.

### BASKET DINNER SUNDAY AT WESLEY CHAPEL

The revival is still on at Wesley Chapel. Threshing in the immediate community is about done, so the people have a better opportunity to attend the services. Mr. Maxwell, who conducts the music, made a loan to the meetings of two or three hundred song books called "Camp Fire Songs" which have increased the interest in the singing. Under Mr. Maxwell's leadership everybody must sing, whistle or talk. The singing surely has some life in it.

Prof. R. A. Ogg, pastor of the church, made a short talk last night on "What Does Wesley Chapel Need Most?" He said he thought what the chapel needed most was several young men who would consecrate their lives to God and the church for service in that particular neighborhood.

The preacher's subject last night was: "Don't Let Go." He took for his lesson the account of St. Paul's shipwreck when he was on his journey to Rome. He showed how when the ship went to pieces many made their way to land on broken pieces of the vessel. From this he drew and enforced the lesson that though many of us had made shipwreck of our faith and lives there were some things still remaining, some broken pieces of our faith and goodness to which we might cling and make our way to God and heaven.

Sunday will be the closing day. An all-day meeting is planned for, beginning as Mr. Maxwell announced "right after breakfast and holding on till the next morning." Come with your dinner basket filled with "eats" and spend the day at these helpful meetings.

A good chicken story is told on Lum Alspaugh. (Mr. Alspaugh always goes to the Quincy picnic to visit some of his relatives who are known for the fine chicken dinners they serve. This morning as usual in the crowd at the Monon station waiting for the Quincy train was Mr. Alspaugh. He seemed not to notice anyone. One of his friends noticing Mr. Alspaugh's quietness walked behind him and keeping pace with him heard Mr. Alspaugh say these words over and over to himself: "Fried chicken, fried chicken, fried chicken."

## CROWD ATTENDS PICNIC

MONON STATION IS SCENE OF MUCH MERRIMENT AND EXCITEMENT AS THE USUAL HAPPY THROU PATIENTLY WAIT ON TRAIN.

### TRAIN IS A LITTLE LATE

It was one of those happy-go-lucky crowds that boarded the south-bound Monon five-coach train this morning for the Quincy picnic. Everyone had a smile and a little money. A feature of the crowd this morning was the fact that so many people were from Indianapolis, Terre Haute and Brazil. It was estimated that 150 people made the trip from Greencastle either in automobiles or on the train. The train this morning, which should have arrived at 8:25 o'clock, was thirty-five minutes late, but the people didn't seem to care. They knew it would come during the day, so why worry?

The following people were among those who attended the picnic today: Mrs. Henry Smith and children, Dorothy, Ruth and Richard; Mrs. Elva Stewart, Miss Tressa Duncan, Mrs. Edna Murphy, Mrs. V. M. Rawlins and children Donald and Mary, Miss Goldie Tony, Mrs. J. D. Ellis, Mrs. E. Moore, Mrs. May Smith, Mrs. Lydia Poynter and daughters Leota and Dovie Poynter, Mr. and Mrs. Fred O'Rear and family of Terre Haute, Mr. and Mrs. Emory Ross and son, Philip, of Indianapolis; Miss Evelyn Spenser, society reporter of the Indianapolis Star; Arthur Helm of Cloverdale, Miss Hazel Smith, Miss Ann Nelson, Arvel Roach, Jennings Sanford, Miss Mary Albright, Miss Ida Albright, Mr. and Mrs. Walter McCurry, Mr. and Mrs. L. N. Brock and son Eugene, Mr. and Mrs. E. L. Scott and baby, William Oscar, Mrs. Luderia Lambert and son, Marvin Cohen, Mrs. Albert Burgan and two children Oscar Lee and Mary Esther, Mrs. John Scott of Fillmore, Miss Cozetta Meek, Miss Elsie Goodman, Miss Alma Carrington, Clarence Dunn, Albert McCloud of Amo, Thomas Durbin of Terre Haute, Miss Lily Durbin of Terre Haute, Miss Helen Durbin of Terre Haute, Ross Watson, Theodore Querry, Mr. and Mrs. George Marnett, James Crawley, Jefferson Crawley, Earl Paris, Steve Haskett, Arthur Crawley, Bert Grimes, John Smith, Ellis Duncan Georgia Murphy, Glenn McGill, Earl Cricks, James Asher, C. M. Karnes, Morris Reinhold, Orlando Cartwright, Earl Terry, Clifford Myers, Gilbert Orrell of Indianapolis, Galord Nichols of Brazil, Thomas Gillespie of Indianapolis, O. C. Alexander, David Guffington of Brazil, Everett Harris, Harold Seabee, Earl Priest, H. Dunkin, Mr. and Mrs. B. Asher of Indianapolis, Mrs. J. G. Carleton of Indianapolis, Raymond Phillips of Brick Chapel, Clara Flint of Brick Chapel, Laura Phillips of Brick Chapel, Mrs. Abijah Buffington and children Chester and Hester of Brazil, George Leonard, Miss Margaret Nelson, Miss Viva Baldwin, Mrs. Isal Brown, Mr. and Mrs. Locky Hurst of Mt. Pleasant, Mr. and Mrs. Art Raines, Mrs. Paul Coleman Mr. and Mrs. S. E. Farmer of Brazil, Miss Florence Devore and Miss Auburn Devore of Indianapolis; Ray Hartsock of Terre Haute, Earl Abrams, Mr. and Mrs. Alice McGinnis and grandson Paul Smith, Mr. and Mrs. J. E. Bailey of Indianapolis, Mrs. Earl Sears, Mrs. E. L. Burcham and Miss Nancy Poynter.

### HOGS BREAK 75 CENTS; GENERAL SALES, \$22.25

—August 14—

Indianapolis Receipts—Hogs, 8,500; cattle, 1,100; calves, 500; sheep, 800. Increases in shipments of hogs to the large markets of the country were responsible for downturns in prices, and hogs sold at a break of 75 cents in the local yards early today. General sales were at \$22.25.

Cattle were weak and calves and sheep steady.

## Transform Historic Westminster.

Prominent citizens of London are planning to rebuild the district around Westminster abbey as a memorial to those who distinguished themselves in the world war. The improvements include the construction of a great avenue, 120 feet wide, and a new Lambeth bridge. The design for the bridge will be chosen from plans submitted by architects from all over the world. Splendid buildings are projected for the University of London, for a Shakespearean theater, and for arts and science exhibits. The new avenue will contain groups of statues commemorating the heroic deeds of the British, Canadian, New Zealand and Australian forces, as well as those of Britain's allies. It is intended to make this the finest and most impressive monumental avenue in the British empire.—Popular Mechanics Magazine.

## A TRAVELING

## MAN'S EXPERIENCE

You may learn something from the following by W. H. Ireland, a traveling salesman of Louisville, Ky. "In the summer of 1888 I had a severe attack of cholera morbus. I gave the hotel porter fifty cents and told him to buy me a bottle of Chamberlain's Colic and Diarrhoea Remedy and to take no substitute. I took a double dose of it according to the directions and went to sleep. At five o'clock the next morning I was called by my order and took a train for my next stopping place, a well man."

## YOUTH HAS MUSICAL GENIUS

Willy Ferrero, 13 Years Old, and American Born, Is Capable Leader of Orchestra.

Willy Ferrero, 13, who leads 100-piece orchestras in selections of Wagner, Beethoven, Rossini, Grieg and others, is an American and was born in Portland, Me. The child has attracted the attention of Europe since he was 4 years old, but it was only recently that his American birth was revealed by his parents, who are Italians.

The lad was taken to Italy whither his parents were returning to take up their residence in their old home in Turin. When Willy was 4 he began his musical career, leading an orchestra in the Folies Bergere in Paris. A year later he appeared in the Costanza theater, Rome, where for the first time he led an orchestra of 100 pieces.

The child took his orchestra before Emperor Nicholas in 1913 and conducted two concerts for the monarch. In the same year his orchestra was filling an engagement in London, and he was commanded to appear before Queen Alexandra at Marlborough house. He appeared before Pope Benedict XV in 1916. In April, 1915, just before Italy's declaration of war, Willy was presented with the gold medal by the Italian minister of education after he had made a successful appearance in the Augustum, where he had conducted an orchestra and chorus aggregating 500 participants.

## NATIONAL HEROES OF FRANCE

Lazare Hoche and Ferdinand Foch Are Names to Be Forever Held in Grateful Memory.

Marshal Foch is taking a particular satisfaction at this time of the commemoration of a great victory to pay homage to the name of Lazare Hoche, the famous young general who escaped the Revolutionary guillotine eventually to command that army of the Sambre-et-Meuse which, though at first disorganized, badly fed and badly equipped, performed the brilliant seven months' campaign which established the reputation of French arms on both sides of the Rhine. To this day at Weissenburg stands a monument to its memory and that of its brilliant young chief. No wonder Marshal Foch takes pleasure in recalling Lazare Hoche to his countrymen. Of Hoche it is said that he once proudly wrote to the minister for war of his day, "Je suis la patrie." The French of the present century would throw up their hats at such a sentiment as enthusiastically as the contemporaries of Hoche and Rouget de Lisle. With the great mass of them, though they do not perhaps express it so tersely, Foch is "la patrie" in the sense that he certainly stands for them as "la Victoire" personified.

## High Heels Lessen Vitality.

High heels prevail in spite of the promise of something wiser in build coming into popular favor. Yet, to quote a well-known doctor: "No woman pretends that she is comfortable when wearing high heels nor can she hope to be graceful when wearing them, for the body is thrown out of poise and the action of the feet is restricted. More serious than her awkwardness is the eventual injury to her health. For in the effort to preserve her equilibrium the shoulders are thrown forward, depressing the chest; breathing is interfered with, and that means poorer blood and a final decrease in vitality. This comes gradually, but it is inevitable when a woman persists in wearing very high heels. Her heels should conform to the arch of her instep."—Exchange.

## Use for Surplus Munitions.

An interesting suggestion has been made by a prominent Swiss meteorologist and physicist, M. de Quervain, of Zurich, to the effect that the vast stores of munitions collected in the belligerent countries during the last four years be utilized to advance the cause of science instead of being merely fired off to make a Roman holiday, or else sunk in deep waters to avoid the latent dangers which reside in them. By detonating these explosives in definite quantities, at definite places, and at definite times whose dates are announced in advance, a possibility would be presented for the solution of many interesting problems in physics and meteorology. The project might advantageously be carried out in this country.

## Cryptic Cable.

For smartness the following will be hard to beat: A well-known personage in Devonshire, England, received a cable from his soldier son in Mesopotamia containing only three words: "Two John twelve." After much puzzling the meaning dawned upon him. Taking down his Bible he turned up the Second Epistle of St. John and read the twelfth verse, which runs as follows: "Having many things to write unto you, I would not write with paper and ink, but I trust to come unto you and speak face to face, that our joy may be full." His son was on his way home to England.

## Bridegroom Grows in Importance.

The war has given the bridegroom a significance he never before possessed. Formerly wedding notices were devoted to the bride, her trousseau, her bridesmaids and her family. The bridegroom was mentioned only incidentally, if at all. By reason of his rank, he has become one of the most important persons in the alliance.—Philadelphia Public Ledger.

## COULDN'T MATCH THAT STORY

Senator Set Altogether Too Fast a Pace for Even Veteran Bore to Follow.

A senator was entertaining some friends with stories about the Arizona desert, when a bore joined the party.

This bore was the kind of a chap that always laughs in the wrong place and spoils a story by trying to guess its climax. The senator undertook to silence him.

"Poor Ferguson!" he said. "That was a close shave he had in the desert last August."

"Sunstroke, of course," said the bore. "No, not exactly," said the senator.

"You see, Ferguson stumbled accidentally on the Caudron—our famous spring, you know, that gushes out of the rock at freezing point and immediately begins to boil from the fierce heat of the sun."

"Of course, of course," said the bore. "And what happened to Ferguson? Did he fall in the cauldron and boil to death? Get on with your story, man."

"Ferguson fell in," said the senator, "but he managed to scramble out again. The peril, however, was not yet over for him. Our Arizona air, you see, is so dry that it absorbs moisture with astonishing rapidity. Well, the boiling water in Ferguson's clothes evaporated so fast that the poor fellow instantly froze stiff."

"I see," said the bore. "He died of cold. Well, that reminds me—"

"No, he didn't die," said the senator. "He almost died, but he had a miraculous escape. In his stiff-frozen state, you understand, he began to shiver with chill, and he shivered so hard that in a few moments he became overheated and would have succumbed to sunstroke if he hadn't providentially broken into a cold sweat."

## Hiding a King's Statue.

The fine equestrian statue of King Charles I, which was hidden in London for protection during the war, has been brought to light again. The statue, which was cast during the reign of the monarch, according to reports has not enjoyed the uneventful career permitted to most works of its kind. It was executed for Sir Richard Weston, afterward earl of Portland, who intended to place it as an ornament in his garden at Rochester. But this function it never fulfilled, for it was seized by parliament during the Civil war and sold to one John Rivett, a brazer, to be broken up. John, however, being a royalist, hid the statue, and, by selling hundreds of bronze knife handles purporting to be made from it, disarmed any parliamentary suspicions in the matter. On the restoration of Charles II in 1660 Rivett produced the statue, which was claimed by Sir Richard's son. The brazer refused to yield it, and after years of dispute it was eventually presented to King Charles II and erected on the spot formerly covered by the original Charing cross.

## Antarctic "Shelf Ice"

From the work of recent explorations, Sir Douglas Mawson concludes that the rock foundation on which the Antarctic ice cap rests is very irregular, partly above sea level and partly below, and that its thickness, which is very variable, may reach a maximum of several thousand feet. Under the thickest portions the static pressure at the base may be as great as one ton per square inch. Under such a covering there may be a considerable accumulation of ground heat, and it is assumed that the under portion of the ice mass is undoubtedly soft and plastic. Where the sea breaks up the ice at a rate faster than the flow, the sea front is substantially the coast line. But elsewhere, as in the Great Ross barrier and the Shackleton shelf, the supply of ice exceeds the rate of erosion at the sea front, and the overflow from the land maintains a thick sheet of "shelf ice" extending far out to sea. The sea front of the ice cap, at the present rate of advance or flowing out, is estimated to have left the center in the seventh century of our era.

## Value of Uncooked Food.

Man cannot digest and assimilate the mineral elements in rock; hence it is necessary for him to get the elements for structural work from fruits and vegetables. In their fresh, uncooked state; for cooking destroys the chemistry—the chemical synthesis with albumin is lost.—J. H. Tilden, M. D.

## Paste for Brown Leather.

An excellent paste for brown leather is made of two ounces of soft soap, four ounces of beeswax, two ounces of turpentine and half an ounce of neat's foot oil. Melt soap, wax and oil together, then remove from fire and add the turpentine. Stir well. When cold apply with a brush.

## Floor Bleach.

If an unfilled or undressed hardwood floor becomes gray apply a solution of two ounces of oxalic acid dissolved in just enough water to wet it well all over. Let stand fifteen or twenty minutes; then rinse in cold water and proceed to wash without suds as usual.

## Confidential Communication.

"I promised Matilda not to mention this to anyone, because she got it in strictest confidence from some one who was pledged to absolute secrecy, so before I tell you you must give me your word of honor you won't even breathe a hint of it."

## First Translation of Bible.

The first translation of any part of the Bible was that by Bede of the Fourth Gospel, in 735. The first complete translation was that of Wycliffe about 1388. Luther was not born until 1483.

## Something to Think About.

"I reckon," said Uncle Eben, "dat a candidate has to be right keeful not to let de handshakin' sociability git to be so much of a habit dat it interferes wif his office work when he gits de job."

## New Labor Saver.

An inventor has patented an electrically driven machine which makes the rough clay boxes in which pottery is subjected to heat in kilns, work heretofore done by hand.

## One Value of Silence.

Silence doesn't mean wisdom, but the fellow who keeps his mouth closed can at least hold in what he doesn't know.

## Outspoken Athenian.

More than twenty-three hundred years ago a young Athenian, speaking of his wife, said to Socrates: "When I saw that she had powder on her face to make it whiter and rouge to make it redder, and that she wore high-heeled shoes to appear taller, I told her it was as dishonorable for her to try to deceive me about her beauty as for me to try to deceive her about my property. I added that, although her arts might impose upon others, they could not impose upon me, who saw her at all times."—Youth's Companion.

## Jolly Little Chipmunk.

The place the chipmunk fills is small and inconspicuous but his sylvan "chirrup" plays a minor strain in the wordless diapason which the mighty blue soul of nature is forever singing in her forests; solemn and consoling to heal earth's scars; jubilant and glad for the free of heart. Intoning ever some clear sweet note of mystic melody for those who listen, to awaken a dreaming bliss or to thrill an untired fiber into quivering life.

## Peruvian Flower Festival.

Peru celebrates a custom which dates from soon after the Spanish conquest. All soldiers' graves alike are decorated, including those of peons and Indians, individuals little regarded in Peru, at all events during life. In the evening the populace gives itself over to feasting and merrymaking. This particular flower festival is held annually on November 1.

## Satisfaction in Doing Right.

Imagination is the father and mother of trouble when we let it run loose in a time of stress. But in the end the will and the heart are what determine our fate. After all, when we do right we have some satisfaction even if we suffer. But if we do nothing but drift along we have not even the satisfaction of knowing we deserve to come out right.

## Battles on Sundays.

The date of the battle of Salamanca was Sunday, July 2, 1812; Vimiero, Fuentes d'Oñor, Oporto, Toulouse and Vittoria were also contested on what were known as "Wellington's Red Sundays." Waterloo was won on a Sunday and the greatest attack on Cronje's trenches at Paardeberg was made on a Sunday—Feb. 18, 1900.

## Waiting in Agony.

At a recent wedding the bride was delayed a little in making her appearance. When at last she did appear she breathlessly ran up to the embarrassed bridegroom, who had been waiting for her in agony and putting her arms around his neck exclaimed: "Oh, John, dear, I am so sorry I am late."

## Antarctic "Shelf Ice"

From the work of recent explorations, Sir Douglas Mawson concludes that the rock foundation on which the Antarctic ice cap rests is very irregular, partly above sea level and partly below, and that its thickness, which is very variable, may reach a maximum of several thousand feet. Under the thickest portions the static pressure at the base may be as great as one ton per square inch. Under such a covering there may be a considerable accumulation of ground heat, and it is assumed that the under portion of the ice mass is undoubtedly soft and plastic. Where the sea breaks up the ice at a rate faster than the flow, the sea front is substantially the coast line. But elsewhere, as in the Great Ross barrier and the Shackleton shelf, the supply of ice exceeds the rate of erosion at the sea front, and the overflow from the land maintains a thick sheet of "shelf ice" extending far out to sea. The sea front of the ice cap, at the present rate of advance or flowing out, is estimated to have left the center in the seventh century of our era.

## Value of Uncooked Food.

Man cannot digest and assimilate the mineral elements in rock; hence it is necessary for him to get the elements for structural work from fruits and vegetables. In their fresh, uncooked state; for cooking destroys the chemistry—the chemical synthesis with albumin is lost.—J. H. Tilden, M. D.

## Paste for Brown Leather.

An excellent paste for brown leather is made of two ounces of soft soap, four ounces of beeswax, two ounces of turpentine and half an ounce of neat's foot oil. Melt soap, wax and oil together, then remove from fire and add the turpentine. Stir well. When cold apply with a brush.

## Floor Bleach.

If an unfilled or undressed hardwood floor becomes gray apply a solution of two ounces of oxalic acid dissolved in just enough water to wet it well all over. Let stand fifteen or twenty minutes; then rinse in cold water and proceed to wash without suds as usual.

## Confidential Communication.

"I promised Matilda not to mention this to anyone, because she got it in strictest confidence from some one who was pledged to absolute secrecy, so before I tell you you must give me your word of honor you won't even breathe a hint of it."

## First Translation of Bible.

The first translation of any part of the Bible was that by Bede of the Fourth Gospel, in 735. The first complete translation was that of Wycliffe about 1388. Luther was not born until 1483.

## Something to Think About.

"I reckon," said Uncle Eben, "dat a candidate has to be right keeful not to let de handshakin' sociability git to be so much of a habit dat it interferes wif his office work when he gits de job."

## New Labor Saver.

An inventor has patented an electrically driven machine which makes the rough clay boxes in which pottery is subjected to heat in kilns, work heretofore done by hand.

## One Value of Silence.

Silence doesn't mean wisdom, but the fellow who keeps his mouth closed can at least hold in what he doesn't know.

#### LOCAL NEWS.

The Rev. A. M. Hootman is in Greencastle today visiting Mrs. Hootman. The Rev. Hootman has business interests in Indianapolis which take most of his time there.

Frank Wallace went to Indianapolis this morning on a "hunt" for teachers. Several county schools are without teachers and the vacancies must be filled before the beginning of school in September.

Fred Masten is attending the Quincy picnic today.

Howard Rockhill, who has been in service one year, has received his discharge from Camp Taylor and returned to his home here.

Mr. and Mrs. Estes Duncan, of Cloverdale who have been ill of typhoid fever, are reported much improved today. Mr. Duncan is able to be out and Mrs. Duncan's fever is gradually becoming lower.

Mr. and Mrs. Otho Estep, of Knightsville, were visitors in town today.

The Co-workers of the Baptist church will meet with Mrs. Howard Harris Friday afternoon at 2:30 o'clock.

The King's Builders will meet with Miss Minnie May Bartley Friday afternoon at 3 o'clock.

Mrs. Earl Ellis has gone to Bethany Park for a visit.

Earl Ellis and father are in Bedford on business.

Lawrence Paris went to Louisville today.

Merle Bee and W. E. Thrasher went to Louisville today on business.

Jack Rothberg of the Rothberg Brothers' poultry company, has returned from a two weeks' vacation trip in northern Michigan. While at Charlevoix he reports some splendid fishing. Hamlin Buchman of the same company will go to Mackinac, Monday, where he will spend several weeks' vacation.

Clifford Whelan attended the Quincy picnic today.

Paul Wright spent Wednesday with relatives in Bainbridge.

Miss Leota Cochran, of Louisville, Ky., is in Greencastle visiting her aunt Mrs. Margaret Godwin.

Mrs. R. H. Lank went to Cloverdale today to visit her parents.

Mr. and Mrs. Joe Ketter and baby are visiting Mrs. Ves Miller.

Jack Lynch, of California, a former Greencastle high school boy, is in Greencastle visiting friends and relatives.

Miss Emma Stanger of this city has filed a paternity suit in Squire Philip Frank's court against Joyce Cummings, residing east of this city. On failure to provide bond, Cummings was brought to the county jail, where he awaits trial. Constable Charles Pickett made the arrest Wednesday evening.

Drs. W. W. and C. C. Tucker are having built a new drug room at the back of their office on Vine street. This new addition gives both physicians a consultation room.

The Greencastle band will hold its rehearsal Friday evening in the Commercial Club rooms. The members of the organization met Wednesday evening for a practice but found that Director Henry Werneke had left the music in the safe at his jewelry store, and since he had not returned from a motor trip to Cincinnati the rehearsal was postponed until Friday night. The members are getting ready for their part in the day's program at the farmers' picnic to be held August 20 at Hazelett's grove one-half mile east of this city.

Mr. and Mrs. O. H. Bowen and daughter, Mrs. Donald Munson, and Thomas Chenoweth, drove to Indianapolis today in the Bowen car.

Forest Cooper is in Indianapolis today on business.

H. E. Burkhalter is in Indianapolis today.

Justin Godwin attended the Quincy picnic this afternoon.

J. G. Martin, manager of the Greencastle Gas Company, will be in this city on business, Friday.

J. W. O'Daniels and son, William, are removing from their home on East Seminary street to their former home in Cloverdale.

George A. Dobbs has purchased of Eugene Light the residence property at the corner of Jackson and Poplar streets.

Miss Gertrude Lewis, who is visiting friends in Greencastle, will return to her home in Lafayette, Friday.

James Dale of Boone, Iowa, is visiting James H. C. Nelson. Mr. Dale formerly resided in Putnam county about forty years ago on the farm owned now by Harry M. Randel in Monroe township.

Newton Nelson, of Indianapolis, is visiting his brother, James H. C. Nelson. Mr. Dale formerly resided in Putnam county about forty years ago on the farm owned now by Harry M. Randel in Monroe township.

Captain W. T. Wimmer, of Bainbridge, is in Greencastle today on business.

John McCabe and John Wysong attended the Quincy picnic today. While there they distributed leaflets boosting the farmers' and business men's Putnam county picnic to be held Wednesday, August 20, at Hazelett's grove one-half mile east of Greencastle.

Mr. and Mrs. W. W. Steele and daughter, of Lafayette, who have been visiting relatives in Bloomington, Ind., visited Charles Zeis and family while motoring back to Lafayette today.

Mrs. John F. Cross, of Brazil, and Miss Mattie Beck of Holton, Kans., visited Harry Maxwell and family today.

Mr. and Mrs. A. R. Sutliff, formerly of Indianapolis, are making their home at the Grand Central Hotel. Mr. Sutliff is employed in the Ford garage.

James Hamilton is in Indianapolis today on business.

Charles Perkins, of Morton, is in Greencastle today on business.

A truck load of furniture from Indianapolis was taken to the home of Dr. and Mrs. C. C. Tucker at the Campbell Flats on East Seminary street this morning.

Harry Larue of the Star Barber Shop is attending the Quincy picnic today.

A new Dalton adding machine costing near \$250 has been installed in the postoffice.

#### AN OLD FAULT FINDER.

An irritable and fault finding disposition is often caused by indigestion. A man with good digestion and bowels that act regularly is usually good natured. When troubled with indigestion or constipation take Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. They also cause a gentle movement of the bowels.

## New Chemical Kills Bed Bugs P. D. Q.

The new golden colored chemical Pesky Devils Quiescent, P. D. Q. can now be had at any drug store, as arrangements have been made whereby the retailer can get it from his wholesaler.

The new chemical, P. D. Q., is very powerful. A couple of ounces can be procured for a few cents and you will have enough to kill a million bed bugs if you could get that many together. P. D. Q. does not rot or burn the springs or clothing. It leaves a coating on their eggs and prevents hatching. A patent spot free in every package of P. D. Q. enabling you to get the pesky insects in the hard-to-get at places.

Sold by R. P. Mullins  
and all leading druggists.

## NO TIME LIKE THE PRESENT to Open a SAVINGS ACCOUNT

## Too Busy for Gratitude.

The quality for which we most frequently criticize the Japanese is one in which, with curious inconsistency, we particularly pride ourselves. That is their determination to be independent. If an American has something to teach a Japanese, the Japanese observes him very carefully while he performs the trick. Then, with a polite "Thank you, Goodbye," the Japanese leaves the American and thenceforth performs the trick for himself—with improvements. He is far too busy to sit at anybody's feet in gratitude.

## Get All the Rest Possible.

Remember always to relax when no activity is required of you. When you sit down, rest all over—do not choose a rocker and waste your energy propelling it to an invisible destination; nor tap your fingers on the chair-arm, nor flap the back of your waist or the chain about your throat; nor tie your feet up in bow-knots, when they should rest easily on the floor. If you think about it you will be amazed to find how much real rest time you have always wasted.

## Pulque Trains in Mexico.

Pulque, the national drink of Mexico, is made from the juice of the maguey plant, large tracts of which are cultivated outside the City of Mexico. As a rule there are about eight hundred plants to the acre. The juice is extracted by the peons. It is shipped into town in long trains much like our milk trains here. The white liquid tastes like yeast and the consumption is so great that it is equivalent to two quarts a day for each person.

## Silverite a New Metal.

A new development in the alloying of aluminum with other metals has just been accomplished by the production of "silverite." This metal is something entirely new and is composed of a mixture of aluminum and copper, zinc and steel in varying proportions, according to requirements. The alloying of steel with aluminum is somewhat startling and at first thought seems to be impossible, yet it is successful.

## Ports on Chilean Coast Line.

Chile has a long coast line which extends from about 18 degrees to 56 degrees south latitude. The so-called continental section of Chile extends from approximately the eighteenth to the forty-second parallel, while the insular or archipelago section extends from the forty-second to the fifty-sixth parallel. In this long stretch of coast there are numerous ports.

## Excels the Nightingale.

The hermit thrush is declared to be the most talented and brilliant singer in the world, not even excepting the nightingale, says the American Forestry association. The tail of this little bird is of a reddish brown, much brighter than the back and head, while the breast is quite heavily spotted with black. It winters in the Gulf states.

## The Sea.

Shakespeare tells us there is a tide in the affairs of men. Certainly there is a tide in the minds of men. He must be very observant of himself who does not know that the mind rises and falls, that it swells into fullness and strength and then fades into emotions and weakness. We know not how, we know not why.—Theophilus Parsons.

## Little Helen's Idea.

Helen had a good imagination. One day, when playing blind man's buff, she was seen crawling on all fours. The "blind man" stumbled over her and when she uncovered her eyes and asked why Helen was down on her knees, Helen replied: "I thought you would think it was a dog."

## Grease on Wallpaper.

To remove grease spots from wallpaper, sprinkle a piece of blotting paper with carbonate of soda and press it against the wall with a moderately hot iron. The blotting paper will absorb the grease, while the soda preserves the color of the paper.

## Punishment.

The whole of life and experience goes to show, that right or wrong doing, whether as to the physical or the spiritual nature, is sure in the end to meet its appropriate reward or punishment. Penalties may be delayed, but they are sure to come.

## Have Points in Common.

It is the general understanding that there are all kinds of people in the world, but at times we get the notion that they are all exactly alike, at that. —Wilmington News.

## Were All There.

"It wasn't fair to mark me down on that word in spelling," said Jane as she came in from school. "I had all its letters in but I didn't arrange them right."

## One's Too Many Sometimes.

"If we had two heads," remarked the man on the car, "we'd have more trouble getting them to track than we have with our feet."—Toledo Blade.

## Optimistic Thought.

A common armchair is a more com-

## Lacemaking in China.

Foreign missionaries in Chefoo, Shanghai, Foochow, Amoy and Swatow have introduced lacemaking among the Chinese women, and considerable lace has been exported from time to time. Silk, linen and cotton thread is used in Chefoo, and linen and cotton in the other places. The lace is made more cheaply than is possible elsewhere because of the low wages paid in China, but a lack of enterprise in changing patterns to meet changing fashions abroad prevents the industry from assuming larger proportions.

## St. Botolph's Town.

Boston or St. Botolph's Town is a seaport in Lincolnshire, England, on the River Witham, and four miles from its mouth, with a wharfrage of 2,330 feet. In the days of the Plantagenets it was one of the chief British seaports, but the silting in of the river has been an obstacle to its growth of late years, almost continual dredging being necessary to keep a passage to the sea, even for small vessels. Its church tower, St. Botolph's, is a well-known conspicuous landmark, depended upon also by mariners at sea.

## Issuing an "Extra" in Bano.

The editor of the Bano Daily News (Africa) does not have to trouble over such matters as circulation or the high cost of paper. When he gets a piece of news, he smooths off some slabs of wood, writes up the story in his best editorial style, and then gives the slabs to his office boy, who runs off with them and hangs them in conspicuous places so that he who runs may read.

## Good Taste.

Good taste is the conscience of the mind. Lowell's definition is compact of thought and is worth dwelling upon. Good taste is a trait we all agree in valuing, though its meaning as a rule is rather vaguely felt; we urge its cultivation and admire its exercise but the quality itself is generally less analyzed than desired.—Hartley Alexander.

## Floor-Crack Filler.

This is made from one pound of flour rubbed smoothly in a little water. Add three quarts of boiling water and set on stove. Stir in one tablespoonful of powdered alum, together with bits of torn newspaper, and cook until the mass is smooth and thick as putty. Use to fill the gaping cracks between the boards of old floors.

## "What's in a Name?"

The French island of Reunion has changed its name four times in 50 years. In 1703 it was Bourbon, as it had been for a century and a half, but the convention changed it to Reunion. Under the empire it became Isle Bonaparte; at the Restoration it reverted to Bourbon. Finally, in 1848, it became Reunion once more.

## History and Material Wealth.

It is time we remembered that history does not concern herself about material wealth—that the life-blood of a nation is not that yellow tide which fluctuates in the arteries of trade—that its true revenues are religion, justice, sobriety, magnanimity, and the fair amenities of art.—Lowell.

## Got It Printed.

"So, you got your poem printed?" "Yes," replied the author. "I sent the first stanza to the editor of the Correspondence Column with the inquiry, 'Can any one give me the rest of this poem?' Then I sent in the complete poem over another name!"

## Practice Cheerfulness.

A sunny, cheerful view of life, resting on truth and fact, co-existing with practical aspiration over to make things men and self better than they are—this is the true, healthful poetry of existence.—Robertson.

## Really a Cut Price.

Charles had just been vaccinated, and as a reward for his bravery the doctor gave him a quarter. "Thank you for the quarter," said Charles, winking back his tears, "but it was worth a dollar."

## Honesty First Requisite.

It would be an unspeakable advantage, both to the public and private; if men would consider that great truth, that no man is wise or safe but he that is honest.—Sir Walter Raleigh.

## For Hoarseness.

Hoarseness can be relieved by mixing one teaspoonful of glycerin to the well-beaten white of an egg, the juice of one lemon and enough sugar to make it palatable.

## Most Valuable Diamonds.

Diamonds are found with a wide variety of coloring but those that are virtually colorless but which are spoken of as being blue-white are most valuable.

## Simple Duty.

What does a man more than his simple duty in coming out for the right? Besides is it any sacrifice to be in the right?—Lowell.

## Optimistic Thought.

One sad grain of time is worth a

## Japanese Gala Day.

Of all floral festivities, Japan's Feast of the Cherry Blossom is the most generally observed. Practically every town and village throughout the land has its own particular cherry tree for honoring at this great occasion, but the most famous of them all is that at Kyoto. Here early in April is to be seen such a sight as can be witnessed nowhere else in all the world. There are seldom fewer than 1,000,000 persons present, who gather from all parts of the empire. Everywhere is feasting, dancing and merry-making. —"Flaunet," in Indianapolis Star.

## Centipede a Fly Killer.

The centipede is found pretty much all over the world. The species common in the United States, *Scutigero* forceps, was reported over twenty years ago as devoting the nights to killing house flies. Later an observer detected one in the act of capturing a butterfly much larger than itself. The insect remains concealed during the day under doorsteps or window frames, or in any crevice sufficiently large to hide its numerous appendages.

## Honor Is John Wesley's.

The term "Methodist" was first applied to Charles Wesley, and not to John Wesley, the real founder of Methodism. And it was applied as a term of ridicule, or as an epithet. Charles Wesley was a student at Oxford, where, as he says, he began "to observe the method of study prescribed by the university." He must have been a stickler for "method," for he was always using the word. "This gained me the nickname of Methodist," he says in one of his letters.

## First Safety Bicycles.

The first of the safety bicycles was put on the market in 1880. In this the high front wheel was reduced and the rear wheel was about two-thirds the height of the front one. The machines with wheels of the same size appeared in 1885. Bicycling began to be popular about 1891, and the "craze" reached its height about 1895, when wheels had become low enough in price to be within the means of the multitude.

## Wise Relaxation.

The wise know that a judicious amount of wasting is, in the end, not wasting at all; for those who have learned to relax and to forget at the right moment, to lay aside care and thought and time completely, when they do labor do it with a fresh and mighty power that the weary slaves of time service never know. To lose time profitably is an exquisite art.

## Water and the Human Body.

The specific gravity of water and the human body is virtually the same. A body in the water is supported by equal pressure at all points. It is more likely to be at ease than under other circumstances. It is, therefore, more likely that it may move without pain. So cripples are often given their exercise in the water.

## No Race Suicide There.

Jenn, who had always lived in the city, was going to the country for the summer. As she sat gazing out of the car window a flock of blackbirds frightened by the train, rose from the ground and flew away. "O, aunt," exclaimed Jenn excitedly, "look what a large family those birds have."

## New York's First Railroad.

The first railroad in New York state and one of the first passenger railroads in the United States was constructed of wooden rails from Albany to Schenectady, a distance of 17 miles, in 1831. Ten years later the Erie railroad was opened from Piermont to Goshen.

## Most Valuable Plant.

No plant renders man greater service than does the wheat, because it supplies to the greater part—and the better part, too—of the western world its staff of life. From wheat the leading nations of the earth obtain their bread.

## Some Grownups Have Same Idea.

Miriam had been over to a neighbor's to see the new baby, and on her return I asked her what she thought of it. She replied: "Oh, I don't like 'em so fresh; I like 'em better afterward."

## Life's Little Peeves.

Life is just one thing after another, but chiefly it is getting up to do something you have forgotten after being comfortably settled in your chair for work or reading.

## For Social Success.

Whenever you see a man who is successful in society, try to discover what makes him pleasing and, if possible, adopt his system.—Baconfield.

## The Meanest Man.

The meanest man in the world put fishhooks in his change pocket when he took off his trousers at night.

## Q. E. D.

It wouldn't be difficult to convince the average man that greenbacks are printed on typewriter.

## Daily Thought.

He hears but half who hears one

## COAST OVER COBBLE STONES

Sport in Madeira Has Many Advantages Over That to Which Northerners Are Accustomed.

Cobble stones may not appeal to the uninitiated as ideal for coasting purposes, but they admirably serve the purpose. It all depends on how steep is the hill the cobbles pave. In other words, it isn't the material that makes the "slide," but the pitch of the slope. Those of us who are accustomed to sliding down snow-clad hills, or tiny ascents made slippery by ice know little of the thrill a slide may possess. For some measure of the delight in the sport is frequently minimized by the frigid air that rushes past our tingling ears and some measure of the enjoyment is entirely lost by the chills that grip our shivering bodies.

Imagine—if you can—the thrill of coasting down a hill so steep that your "sled" flies over the cobbles much as a would speed over crusted snow or an ice glare. Instead of icy air that almost chills you to the marrow at the thought, picture yourself in springtime garments and fanned by summer breezes.

If you can imagine such a picture you will have enjoyed at least some part of the sport of coasting in an island where there is no snow or ice. Down the cobble-paved road the "sled" flies. For ten minutes you flash along in breath-taking rush, then you begin to grow accustomed to the speed and the novelty of the sport and you take time to look about you. But—like most other enjoyments—just as you're beginning really to enjoy it to the utmost your coasting ends.

Where is this extraordinary slide? On the island of Madeira, which belongs to Portugal, and lies in the Atlantic ocean, off the coast of Morocco.

## How a Hero Died.

A dramatic incident in which a heroic young officer faced death in soldierly manner is the climax of a true story that recently appeared in *Stars and Stripes*, the official newspaper of the American expeditionary forces.

He was Francis M. Leahy of Lawrence, Massachusetts, and he had served in the ranks before he won his commission. He used to tell of the days when he was orderly to Captain Pershing in the Philippines. One day while he was resting with his men by the wayside a German shell came whizzing out of space just as the order arrived that the regiment fall in and move on.

The shell plowed up the earth and stretched on the ground several men who were just getting to their feet. It hit the tree against which Captain Leahy was leaning and snapped it off like a stalk of asparagus. A piece of shell struck him in the back and tore its way through his chest.

"Good-by, boys!" he said, and his head sagged forward.

Then it was as if, somewhere in the universe, an invisible commander had called, "Attention!" Captain Leahy raised his head. With clearing voice he called the name of the officer next in command.

"Lieutenant Hansen," he said, "the command is 'Forward!' See the boys through!" Then he died.

## Recipient of Old Honor.

Prince Ferdinand Radziwill, who recently presided at the opening of the new Polish parliament, is a distant relative of the Hohenzollerns and one of the pillars of the old Polish nobility. The honor accorded Prince Radziwill was declared to be absolutely without political significance, but entirely a matter of custom. The prince came into the temporary presidency by reason of seniority only. He is eighty-five years old and is the oldest member of the floor of parliament. By virtue of a similar custom the youngest two members of the house, a socialist and a Catholic priest, neither of them more than twenty-five years old, acted as vice presidents and sat to left and right of the old nobleman all through the first session, assisting him in the carrying on of his duties.

## Ships and Their Names.

Peace has brought with it the incidental discussion in a section of the English press of the meaning of and reason for the names of certain ships in the British navy. Truly my lords of the admiralty, acting as sponsors, have gone to some strange sources for the nomenclature. Not merely countries and cities have been drawn upon, but many of the creatures figuring in a menagerie have been freely utilized. Then there are the vessels named after the public schools and institutions of England, such as Uppingham, Tonbridge, Westminster, Rugby, Cheltenham, Epsom and so on. If Eron should feel jealous over the matter of its neglect it can take a kind of reflected comfort in the fact that there is a destroyer called Windsor.

## Weights a Locomotive Hauls.

How much more weight does the average passenger locomotive have to haul than in the days before the advent of the steel car? I asked an expert Philadelphia locomotive builder.

"The old wooden passenger car weighed 40,000 to 60,000 pounds," he answered.

"The steel suburban car weighs 90,000 pounds.

"The larger steel car weighs 110,000 pounds.

"A parlor car weighs 115,000 pounds and the sleeping car 140,000."

"As for the locomotive itself, the heavy Pacific type for passenger traffic weighs 280,000 to 300,000 pounds. The freight locomotives, of course, go

## Most Famous Chinese Dish.

What has been considered by Oriental epicures as the daintiest dish in China, the birds' nest, is the product of the sea swallow, which constructs its nest of a gelatinous substance taken from sea moss. The Chinese method of preparing the nests for the table is to soak them and boil them in milk until they are very tender. Then they are placed in clear soup and are ready for use. On his trip to China, General Grant was much feted, and one of the dishes set before him was the birds' nest.

## Keeping Even Temper.

Weariness, tired nerves, poor digestion, sudden demands, an overdose of perspiration and a dozen other things will unbalance the temper. You can't always regulate yourself, but you can do a great deal toward keeping the body in trim. You can see to it that the poor old back does not get a load too heavy to be borne. You can also try to guard against surprises that unbalance the mental mechanism and send the mercury skipping skyward. It's the best way to keep an even temper.

## Deadly Enemy of Mosquito.

The so-called "water dog" of the Pacific coast of the United States is a new five to eight inches long. Though quite impure to natural enemies itself, it destroys all mosquitoes within its range, and in the experiments of Prof. A. C. Chandler, of the Oregon Agricultural college, a single individual may devour 200 mosquito larvae in 4 hours, besides killing as many more. This harmless creature may be placed in pools and streams where no fishes could exist.

## Wheat in History.

The Romans introduced wheat into Great Britain. They did not have to carry it far, because before they invaded Britain they had conquered Gaul, the cradle of modern times, and the Gauls were growing large crops of wheat when the Romans crossed to the western islands. The Britons began to grow wheat, and the Saxons continued the work. Still, through the Middle Ages the bread of the poorer classes was made of flour from the coarser grains.

## To Be of Influence.

If you can't swing things your way in life the sensible thing is to swing with things the way they are going. To be sure you can just abruptly cut away, but that leaves you out of touch with things. It may be a relief to your conscience to be beyond the reach of compromise. But you are also beyond the reach of influence. You can not hope to be able to mold character or even contribute anything toward bending it.

## Use Life's Powers Properly.

There is no wealth but life; life, including all its powers of love, of joy and of admiration. That country is the richest which nourishes the greatest number of noble and happy human beings; that man is the richest who, having perfected the functions of his own life to the utmost, has also the widest helpful influence, both personal and by means of his possessions, over the lives of others.—Ruskin.

## Opposed Brothers' Church.

There were three of the Wesleys, although only two of them had anything to do with founding the Methodist church. Sons of an English clergyman, and well educated, they were all pious men, but the older brother, Samuel, took no stock in "Methodism." In fact, he combated it, and wrote of it upon one occasion as "a spreading delusion."

## Life Not All Chance.

Events are shapeless except as personality shapes them. Birth and death and changing fortunes are common to humanity, but what different individuals make of them is a forever varying story. We cannot know what experiences await us, but may know tolerably well, by what we are making of ourselves, how we shall pass through them.

## Saved in Nick of Time.

Many wonderful bargains are recorded in connection with old books. The priceless Coverdale Bible in the British Museum library, for instance, was bought by an amateur book collector from a butcher who was delighted and astonished on being offered ten shillings for it. He was about to use its valuable leaves to wrap up his meat.

## "Inventor" of Pork and Beans.

An eccentric Englishman, Daniel Day Good, is accredited with the invention of pork and beans. The first Friday in each July he would assemble a party of friends under an oak in the forest and feast them on bacon and beans. From this festival grew the popularity of the dish.

## Concerning Names.

Said the observing cuss, "When an actress starts out to make a name for herself she has to think up a good one to start with before she makes it."

## English Surgeon in Civil War.

Sir Charles Wyndham, the famous English actor, served as a surgeon in the American Civil war.

## Optimistic Thought.

There is no such thing as a free lunch.

## NEEDED IN BUSINESS WORLD

Urgent Reasons for Transplanting Returned Soldiers From Army to Civil Life Without Delay.

Your cosmopolitan doughboy who has shaken hands with the king of England, danced with the princess of Roumania, learned the slang of a dozen nations and cocked a knowing eye at all the choicest sights of the Continent, may sound extremely sophisticated by cable, but wait until he strikes the United States and see what furrrin travel has done for him! It has made him love, not Europe less, but home more, and he hardly tries to conceal his grand passion under a poker face, either. For he has been homesick and weary for months, and the Goddess of Liberty looks like an angel, and New York harbor like heaven, to his fond eyes.

As a national asset, then, the soldier is perhaps our best citizen, and because the A. E. F. as a whole is rampantly enthusiastic about its homeland and her interests, America may look to her soldiers for real inspiration in citizenship. These are the men to put into our business life as rapidly as they can be transplanted from army to civil jobs.

To make the transposition more simple and effective, the war department through Col. Arthur Woods, assistant to the secretary of war, has set up the wheels of a giant machine, which is working night and day to co-operate with all employment agencies for the sake of the returned soldier who has no job. But more than that, this great employment system operates for the good of America. Colonel Woods and his thousands of assisting committees believe in the doughboy and in his power of real achievement in the future national life of the United States.

## Fine Memorial to Edith Cavell.

In a quarry, midway between Bodmin and Camelford, on the moors of North Cornwall, England, a memorial is being fashioned out of granite in memory of Nurse Cavell. One of the huge pieces is nearing completion under the guidance of Sir George Frampton, who is giving his services free. This figure represents a woman with arms half upraised, holding a little child on her lap, while underneath, on the base of the monument, is carved a cross. The group is symbolical of the stronger nations protecting the smaller and weaker ones, while the cross is the emblem of mercy. The whole group is carved in the form of a cross, giving special significance to the order to which Nurse Cavell belonged. Another huge block of granite near by has a big lion carved on it, with head erect and mane bristling. Trampled beneath its feet is a serpent, writhing, but defeated. The total weight of the memorial, when finished, will be about 170 tons, with a height of about 40 feet. The group probably will be erected near the British National gallery.

## Tasting With the Nose.

The sensation of taste, while of common and constant experience, is highly complicated in its nature. What is commonly called taste is not a simple sensation at all, but rather a complex. In addition to the actual functioning of the apparatus properly pertaining to the sense of taste, the tongue receives impressions of various other sorts, all of which go to make up this complex. As finally recorded in the consciousness, the taste of any substance has to do with its heat or coolness, perhaps with a mild amount of pain, certainly with astingency or acidity—which are in themselves further complexes of thermal and tactile sensations—and above all with smell. The reader will probably agree that ice cream and coffee are entirely different from their true selves when served at inappropriate temperatures; and it is a matter of record that a person of the keenest taste may make the most ludicrous errors if asked, blindfolded and with his nose stopped to identify substances placed in his mouth.

## Famed Rest of Noted Men.

The Diamond bar, famous for nearly 50 years as a part of the old Auzeais house, of San Jose, Cal., is being fitted up for a grocery store. The Auzeais house, on West Santa Clara street, housed five presidents of the United States and was for a time the abode of a king. It was built in 1863, according to John E. Auzeais of San Jose, and the barroom was the meeting place for many of the men whose names have been written into the history of California.

President Grant was entertained at a banquet in the Auzeais house in 1879. The following spring King Kalakaua of Hawaii was a guest, and in September of the same year President Hayes delivered an address from the balcony. President Harrison was a guest in 1891 and both McKinley and Roosevelt visited the famous old hotel on their tours of the United States.

## Her Part.

The physician had diagnosed the young woman's case and was compounding for her a bottle of medicine. He put two or three drugs into the bottle and then took up a jar of peppermint. The jar was almost empty and there was not enough peppermint to finish filling the patient's bottle. The physician looked around for another jar. He didn't find one, however. For a minute he was frankly perplexed, and then came sudden relief. He turned to the faucet and finished filling the bottle with water.

"Oh," the young woman's voice was

## PURPLE AND GOLD

Adorned Armies Which Persian Kings Led to War.

Spectacular indeed must have been the March of Mighty Hosts Before the Days of Business-like Fighting.

Warfare was a spectacular, as well as a bloody enterprise, in the days of antiquity. Plain khaki and simple businesslike accoutrements would never have suited the ancient Persian soldiers.

Silver altars, surrounded by priests, chanting sacred songs, were first in line of march. They were followed by 365 youths dressed in purple garments. A chariot dedicated to the sun was drawn by snow-white horses, led by grooms wearing white garments and carrying golden wands.

Ten chariots embossed with gold and silver preceded the cavalry of 12 nations, dressed in their various costumes and carrying their peculiar arms.

Then came the Persian immortals, 10,000 in number, wearing golden chains and robes embroidered with gold and glittering with precious stones. Following at a short distance came 15,000 nobles, relatives of the king, dressed in garments wonderfully wrought.

A company of spearmen preceded the king. He rode in an imposing chariot, and wore robes of surpassing magnificence, and a costly mitre on his head. By his side walked 200 of his most noble kinsmen. Ten thousand warriors, bearing spears with shafts of silver tipped by heads of gold, followed the royal chariot of Xerxes. The king's horses, 40 in number, with 30,000 footmen, ended the procession.

At some distance followed the mother and wife of the king in chariots, accompanied by their ladies on horseback. Fifteen cars carried the king's children, their tutors and nurses, and 600 camels, guarded by archers, bore the royal treasury. The friends and relatives of the ladies followed with the cooks and servants. Light-armed troops brought up the rear.

When a king in those days looked upon his troops and saw their strength and splendor, it is no wonder he felt proud and wished to lead them to battle. Such an army was not meant to stay at home, where only their countrymen could see them. Other nations would know how powerful a king he was. So he and his followers marched away, and wars for conquest began.

Peoples were forced to give themselves up to a life of war, either for conquest or defense, and the great highways, which peace would have dedicated to commerce and prosperity, became military roads over which war took its cruel way.

## Details Carried to Absurdity.

Trivial details not infrequently become the pivot of momentous decisions, in which cases an element of absurdity is supplied by the breadth of the contrast. A case in point arises in the discussion among English literateurs concerning Shakespeare's alleged "hand" in the play of "Sir Thomas More," in which one expert occupies almost a column of small type in the literary supplement of the Times
