

U F O ?

UFO.

These three letters are seen and heard frequently now as many reports of Unidentified Flying Objects have been pouring in, in the midwest. This is not new, it happens quite frequently in streaks. When they are reported in one spot, all of a sudden the reports blossom out over a wide area.

A few such reports have come in from our immediate area. Many stemmed from an area around Ann Arbor, Michigan. Sightings have been reported around Valparaiso, in Ohio and in Illinois.

Just what is behind this flood of reports is not certain. It seems rather hard to believe that groups of people could imagine such things. A single person reporting such a sighting, could make one think little of the matter. However, a group sighting such things has to carry some weight.

Common sense tells us it is not space ships from another planet or earth. However, it also is not impossible that another civilization could be located somewhere and have conquered space to such a degree that interplanetary travel is possible.

Just stop and think how far

the people of the earth have come in a few years time. Our space probes are such now that everyone feels that a safe trip to the moon is possible, maybe even now, even though the United States won't attempt such a thing until they have made every phase as safe as they can.

Jules Verne predicted such things in a realistic state many years ago. His writings are being made more fact than fiction every day. Some other civilization much older than ours could be further along through their advanced age. The many things Verne wrote about years back weren't out of the question, but something he was putting on paper that now we are witnessing.

Despite the many reports of the UFO's, one would be wasting time to set and look for such things. However, if one should imagine they see such a thing, just remember it isn't impossible, but highly improbable other than our own people could be doing such as this. The fact that our own people could be testing new devices or aircraft is highly possible, but until more is said along these lines, UFO reports will continue.

Memories From . .

YEAR OF 1965

Taxidermy Course Completed At Tyner School

Recently the biology classes at Tyner School finished a unit on Taxidermy taught by Miss Frank N. L. Students Place In South Bend Science Fair

Mike Hiatt, fifth, with his light and color project; Kenny Sprunger, fourth, with his computer number changer; Shelly Patinella, third, with a rat maze; and Jim Donathen third, with a radio.
