Deaf Man Designs Tiny Hearing Aid

OFFERS FREE MODEL

A remarkable tiny hearing aid has been perfected by a man who has been hard of hearing for nearly ten years.

This small device has no dangling cords or separate transmitting units and is worn completely in your ear.

It was developed especially for those persons who can hear but can't understand. This new hearing instrument provides "ear-level" hearing with the wearer picking up speech, sounds, television and radio at his ear. Due to the use of transistors, the user cost is extremely low.

A true life actual size replica of one of the smallest all-in-the-ear hearing aid ever made will be given absolutely free to anyone sending in this advertisement while supply lasts. So we suggest you write for yours now. No obligation whatsoever. Write to Hear, Box 360, Garrett, IN 46738.

PRICING BULLETIN

From
Ray's
Supermarket

We have been following a store policy for quite some time that we would like to point out to our customers.

That is the practice of raising prices on merchandise that is already on our shelf when our supplier raises the price to us. We do not raise prices on merchandise already on our shelf — we simply pull the old lower priced merchandise forward and rotate the new product to the back.

We feel this is the fairest way we can treat our customers.

We know some stores raise prices on stock already on the shelf and feel it is not fair to take the added profit by doing this. For this reason you may sometimes find two different prices on our stock of the same item. We charge whatever is marked on the can.

We thank you for your patronage and hope you appreciate our goodwill in this policy. Thank you.
