Elections.—We have not yet had official returns of the elections for president from our own or the neighboring states. The marshal meets at Indianapolis on Monday next, to compare the polls, after which we shall be able to give the complete returns by counties. It is however pretty clearly ascertained that the Jackson ticket has succeeded in this state by a majority of about 3000—in Ohio by over 4000—and in Kentucky by over 7000. The majorities in Pennsylvania and Virginia are supposed, from returns received, to be much larger. New Jersey is believed to have gone for the Administration, as also Maine, with the exception of one district. The latest accounts from New Hampshire give to Mr. Adams in 59 towns, or townships, 7800 votes, and to Gen. Jackson 7200. The vote in Boston city was for Adams 8112, for Jackson 839.

Snow Storm.—This place was visited last night and this morning, by a more copious shower of snow, than has been witnessed here for several years past, so early in the season. There has a sufficient quantity already fallen to have covered the ground 3 or 4 inches, had it not been so completely saturated by the rain which had fallen during the past week. We hope it is a prognostication of a more pleasant winter than the last.

An Offer.—The carrier of the Palladium offers to the writer of the best poetical New-Years' Address, for 1829, the fifth volume of the Palladium complete. The piece to contain not more than 150 lines, subject to the decision of the editors on its merits.

The following list of Poils was furnished for publication, by the Auditor of State, Mr. Blythe. Its correctness may therefore be relied on; so far at least as the returns are believed to be accurate.

CINCINNATI, Nov. 14.

The Flour Market.—We congratulate our good and substantial friends, the Farmers, on the prospect of obtaining a remuneration for their labor in raising wheat. Flour has been selling in this city the present week, from the wagons, at \$4 and \$4 12 1-2 per barrel; and we were informed by a dealer in the article that \$4 25 per bbl. had been paid yesterday. Holders ask \$4 37 1-2.

The Baltimore Gazette of the 6th inst. contains the following important intelligence as a postscript:

"An express has arrived in this city, with the information that the British ports have been thrown open for the importation of foreign grain, &c. Four and grain has already consequently taken a great rise in this market."

The same paper quotes from the N. Y. Journal of commerce, of the 4th inst.—"The last price from Liverpool, of 26s. 6d. [per bbl. for flour] in bond, is, with the premium on exchange, equal to six dollars and a half, or a dollar less than the price in New-York."

The information received in Baltimore

by express, must have arrived in New-York, from England, subsequent to the 4th inst.

Wonderful ingenuity.—A few days since we had the gratification of witnessing a striking instance of what human

ingenuity, in conjunction with indefatigable, perseverance, is capable of accomplishing. A young gentleman, a native of this place, has printed several copies—one of which we have perused—of an 18mo work, extending to nearly seventy pages. Our readers, we believe, will be scarcely able to credit the fact, that this ingenious youth made the whole of the types, consisting of various sizes, with his own hand, and with the assistance of no other implement than a penknife. He also constructed the press with which the work was printed, and manufactured his own ink. What is perhaps as singular, is, that he composed, corrected, and printed the whole impression with his own hand without having the slightest direction from any individual, or any idea of a printing establishment, or any thing belonging to it. The quality of the type, & the manner in which the whole work is executed, are really, under all the circumstances of the case calculated to excite the highest astonishment.—[Elgin Courier.]

Improvement in making Paper.—A new engine has recently been invented in Connecticut for cutting rags in paper mills, whereby 3,000 pounds may be disposed of in a single day. A great improvement has also been made in England, called a drying steam machine, which contains four large cylinders, through which a web passes, and obtains by the pressure a surface smooth and even in every part, and is cut to any size. The great improvements that have been made in the printing press within ten or a doz'n years past, in paper making, and the casting of type, together with the great competition which has risen in all these mechanical branches, are the principal causes which have depressed the prices of books. And we have no doubt that the facilities for publishing will yet be greatly enhanced: and knowledge so multiplied that we shall rarely find a village without its public library.

PITTSBURG, Oct. 4.

Small Pox.—We feel no longer justified in withholding the information that this loathsome and fatal disease is in our city. The infection was introduced by a negro slave from Canada, whose master left him here and proceeded westward. We had hopes that by the removal of the slave, and the use of other precautionary measures, the spread of the infection might have been prevented. This expectation has been disappointed. The slave was permitted to remain from him the infection spread, and already have at least four human beings fallen victims to this scourge of our race, and from twenty to thirty others are infected with the disease. Our physicians are engaged in vaccinating all who present themselves, and all exposed to infection should be admonished immediately to avail themselves of the mild means of safety thus put within their reach.

The American Convention for promoting the Abolition of Slavery, is now in session at the Baltimore Atheneum. Delegates from the states of N. York, Pennsylvania, Delaware, Maryland, N. Carolina, Tennessee, and the District of Columbia take part in its deliberations. The Convention sits with open doors.

RECEIPT.

On looking over your valuable paper of Wednesday last, my attention was arrested by the observations of a person recommending to farmers and housekeepers how to cure their meat; but fearing it is not definite enough in one important particular (the time the meat should remain in the pickle) I am induced to recommend a pickle that have been in the practice of using and recommending to others for a quarter of a century, with complete success, viz;

Receipt for curing 100 lbs. of Ham or Beef.

Take 7 lbs. of coarse salt
2 lbs. of brown sugar
2 ozs. of salt petre
1-2 oz. of pearl ash
4 gallons of water
Boil all together, and skim the pickle well, when cold put it on the meat.

Hams to remain in pickle eight weeks, beef four weeks.

To cure Pork—Cut up the meat the

same day the hog is killed, if practicable, and pack it well in a cask, with plenty of the best coarse salt; when the cask is full have a strong pickle, that will bear an egg, ready, and immediately put it on the meat, so as to fill up the vacancies and exclude the air.

[U. S. Gazette.]

New York Canal Revenue.—It is stated in the Albany Daily Advertiser, that the amount of toll paid this year, up to the 1st of November, to the collector at Albany, is one hundred and forty two thousand eight hundred and twenty-three dollars.

At an election lately held in Bartholomew county, to elect a representative to fill the place of Col. Jones, dec'd., P. SWEETSER Esq. was elected.

Punctuality among mechanics, is a great desideratum. Show us a mechanic who will get our work done by the time specified, and we will cherish him as the apple of our eye. But to the mechanic who makes us call twice, (fire and sickness excepted) we bid farewell—"a long farewell"—he is not the man for our money. The mechanic gains nothing by false promises, except a bad name. In order to grasp at all the work in the neighborhood, many a mechanic will promise, when he knows it is not in his power to perform. What is such a man but a liar? To say nothing of the vice of lying, than which there is nothing more low and contemptible, the mechanic in the end, gets far less work by false promises, than he would by a strict adherence to the truth. Punctuality in a mechanic is the soul of business, the foundation of prosperity, and the security of good reputation.

I never saw a person (says a modern writer) do another a kindness with a view of ultimately benefiting himself, without thinking of the way people fetch dry pump. They pour a little water down in order to pump a large quantity up.

LOOK OUT DELINQUENTS.

THOSE indebted to me for taxes, fees, notes, and accounts, are specially requested to call and pay the same on or before the 1st day of December 1828, as no longer indulgence will be given. I have called time and again, by advertisement and otherwise, to little effect; but now the time has come when my situation requires immediate payment from all indebted to me. It is impossible for me to pay off the amount of the duplicates of taxes and my other debts, without recovering the same of those from whom it is due. I am at a loss to know the reason why those charged with taxes neglect to pay; from the negligence of many it would seem that they think the money is mine, or that I have funds to discharge the taxes due the state, and that I can wait with them until it suits their convenience to pay. The money is not mine; neither have I the funds to settle the amount of the duplicate. My only resort is to collect; in doing so, I should be sorry to have to resort to the authority given me by law for the recovery of the same. It should be the first object of every good citizen to pay his taxes, for it is in that way government is supported. Why are taxes assessed unless they are collected? Depend upon it I shall proceed to collect agreeably to law—so govern yourselves accordingly.

John Spencer,

Shif & collector, D.

N. B. On Thursday the 27th inst. A. St. Clair & Geo. H. Dunn, esqrs. depart for Indianapolis; I wish as many as can pay to do so, to enable me to forward as much as possible, to save the 21 per cent. that will be charged against me after the 8th of December next.
