

LUSITANIA SUNK
BY SHOT-LOG

(Continued From Page One.)

or powder." Fire broke out and the smoke obscured somewhat the view of the submarine commander.

As the log of the U-20 consists of technical and nautical terms and a translation into American naval language would be mostly unintelligible to the average reader, I will paraphrase parts of it, except those relating to May 6 and May 7. But these were the days when the U-20 sank three large passenger ships including the Lusitania and the reader is given the words of Schwieger as he set them down with his own hand.

The inscription upon the little paper-bound volume containing Schwieger's log follows:

"WAR DIARY."

"H. M. U-boat U-20, for the time from March 18, 1915, to Aug. 31, 1915.

"Commander Capt. Lieut. Schwieger." Schwieger thus tells of the start: "April 30, 1915, 7 a. m.—Put to sea from Emden on long-distance mission to Irish sea. 10:10-8:30 a. m.—Try a test drive, suspected mine fields. Afternoon spent trying to raise supplies and transmitting and receiving messages from H. M. S. Arcona. 8 p. m.—Pass several fishing boats flying Dutch flag on Doggerbank."

Schwieger devotes his log for May 1, 2, 3, 4 and 5 to accounts of the weather and his flights from the quadrants of patrolling with his crew. He tells of efforts to attack merchant ships. On May 4 he was about to open fire against a vessel, which turned out to be a neutral—the Swedish ship Hibernia. On May 5 he sank the Earl of Lathom of Liverpool and turned the crew adrift in small boats.

"DOG STOPS ARREST; SHOT." DES MOINES, March 23.—"Panhandle Percival," a white bulldog prevented officers from arresting his master, William Lanther, who is said to have been drunk. The cops shot the dog.

Way Tea's Prepared
Called Main Point

More tea is being consumed in this country than ever before.

This was the statement today of A. H. Borden, Indianapolis salesman for the "Salada" Tea Company. Medical men point out he said, that good tea possesses a stimulating and restorative effect on the human system.

"It makes all the difference in the world whether a cup of tea is rightly or wrongly made," said Dr. Borden. "There is only one way to make a cup of good tea and that is to scald out a crockery teapot and while it is warm to put in a teaspoonful of tea for every two cups. Pour on fresh boiled water (be sure that it is bubbling) and allow it to steep for five to eight minutes. If you follow these directions you will have delicious tea."

While Salada tea has just recently been introduced to the Indianapolis public, the repeat orders indicate that the product is meeting with great favor, he added.

IN the Claypool Hotel—as in the Wm. H. Block Co., E. W. Steinhart's and hundreds of stores and factories the country over—American Scrubbing Equipment is proving its worth in daily practice.

This Coupon Is the Key
to OWNERSHIP in a
PIONEER Industry

Thousands Converted

The world has learned its lesson. Today, thousands of factories, schools, office buildings, hospitals, hotels and other great structures from coast to coast are using and APPROVING the American Scrubbing Equipment Company's wares. These wares include three types of scrubbing machines and the scouring powders which are sprayed with clear water before the brushes.

Conditions FORCE This Extraordinary Offer

So fast has the demand grown in these nine years that the Company can not meet it on its capitalization. An issue of 20,000 shares of Preferred Stock has been authorized. The price of each share is \$10—and it can be bought on convenient terms! Behind each share stands more than \$16 worth of tangible assets—for the Company is as firmly established as the Rock of Gibraltar. Besides receiving a liberal interest on each share of Preferred Stock the owner of each share is made by agreement PART OWNER IN THE AMERICAN SCRUBBING EQUIPMENT CO., with full rights to share in all its earnings.

Nine years ago the ELECTRICAL SCRUBBING MACHINE was born.

Educating the World

A world, which had known only the mop and the scrub brush and the tired elbow as implements of floor cleaning, at first greeted with indifference, a MACHINE that would save its labors. So with the steamboat. So with the ading machine. So with all the other PIONEERING products. From the reign of Nero—and earlier—a slosh of water and a swirl of the mop had been sufficient unto the day, and the world needed education on the SERVICE-VALUE of a machine that would not only save the labor of armies of scrub-women, but would also perform scrubbing duties more nearly PERFECT than any unaided human agency.

And so it was taught! In the teaching, an electrical scrubbing machine was developed to exert SIXTY STEADY POUNDS continuously upon any kind of a floor service, cutting away with a flexible circular brush MORE surface dirt than ever haunted the dreams of a tired scrub woman. There was developed a machine that could be moved into most any corner and cranny in any kind of a building; that cleaned floors far more thoroughly than any human hand, SAVING not only labor but TIME.

Among the nationally known users of our equipment THESE ARE A FEW:

National Biscuit Company.
National Cash Register Company.
Firestone Tire & Rubber Company.
Bell Telephone Company.

Packard Motor Company.
Remington Arms Company.
Knox Hat Company.
Marshall Field & Company.
