

COAL FAMINE GRIPS KOKOMO

Diverting of Shipments Cut
Supply—State News.

KOKOMO, Ind., April 20.—Confiscation of coal shipments and the diverting of these to public utilities has brought a serious fuel situation in this city. In some instances industry here is almost entirely without a supply. Many manufacturing firms claim large consignments in transit have been turned over to keep public service plants running. It is reported that there are not more than five carloads in the city.

SPENCER—Plans are being made here for the spring meeting of the Indiana Academy of Science, which convenes May 13 for a three-day session.

LAFAYETTE—Heavy rains have added to the difficulties in clearing up the wreckage of yesterday morning's storm, which swept the vicinity of Danington and East Dunn. At East Dunn the damage was heaviest, several buildings being unroofed.

ANDERSON—Kenneth Horney, 5, was seriously injured last night when a jitney bus, driven by Harry Lawson, struck him. He is in a hospital.

KOKOMO—The board of education and township trustees of Howard county rejected the minimum wage increase adopted recently by the school teachers, ranging from \$10 to \$12.50 for eight months' service, differentiated upon practical experience and college or normal preparation for work. The trustees held that they could not bind themselves to such an agreement which made no distinction between an able and mediocre teacher.

WHITING—John D. Rockefeller and his son, John D. Rockefeller Jr., have presented the community service with a gift of \$450,000 for the erection of a memorial community house here. It was announced today. Col. R. W. Stewart, chairman of the board, and William Barton, president of the Standard Oil Company of Indiana, through whom the gift was made, made the presentation.

RICHMOND—The Richmond Commercial club today is no more. After a debate lasting nearly three hours the club members decided to disband, but not, however, until the majority had pledged their support to a new community club which is in the making, to "make Richmond a better place to live in."

RICHMOND—There was music in the air here today. The forty-third annual convention of the Indiana Music Teachers' association opened and in connection with it were meetings of the Indiana Federation of Music Clubs and the American Guild of Organists.

EVANSVILLE—A. C. Rosenkrantz, a major in the Union army during the civil war and head of a large plow company here, died today after being in poor health for the past year. Rosenkrantz was born in Prussia in 1842 and entered the civil war as a private. He was a member of the local legion and founder of the Evansville manual training school and the Young Men's Christian Association. He is survived by a widow and two children.

Traction Petition for Increase Heard

Hearing of the Union Traction Company's petition for authority to increase commutation rates was begun by the state public service commission today. The company now sells commutation books good for forty rides at the rate of twenty-five first-class fares, and it is proposed to increase that price to the equivalent of thirty first-class fares.

HOW A SICK DOCTOR REGAINED HIS HEALTH

Young doctor 27 years old was told by several eminent physicians that he could not live, but discovered a remarkable formula that restored his health.

In 1898 Dr. A. L. Reusing of Akron, Ohio, had just completed his course at medical college. He had paid his way through medical college by working nights as a telegrapher. Overwork and overstudy had undermined his health, and he consulted many specialists, but they all pronounced him incurable and said that he could live only a few months.

But Dr. Reusing determined that if he must die, he would find the cause, since none of the physicians could diagnose his disease positively.

Knowing that without oxygen the body dies, he began a thorough investigation of the effect of oxygen on the blood. He studied Prof. Virchow's famous "Cell Theory" which proves that the body is only a collection of cells and that there are twelve cell-salts that nourish and maintain the cells of the body. Just as a flower droops and dies for lack of water, so the cells wither and die for lack of their natural cell-salts.

He knew that the red blood cells carry the iron in the blood and that iron attracts oxygen just as a magnet attracts steel. He learned that by increasing the amount of iron in the blood, the iron attracted the oxygen from the air in the lungs into the blood exactly as the magnet attracts steel. He found that oxygen oxidizes or burns up the impurities, germs, and torn-down cells that are found in the blood.

Through careful research he learned the cell-salts that nature requires to feed the cells and maintain health. This led to the discovery that the health of the body is governed entirely by the health of the blood and that if the blood is rich in oxygen, plasma and iron, and supplied with the natural cell-salts that nourish and maintain the health, vigor and vitality of the cells, the whole body glows with health, strength and energy.

Gives Winners on Army School Essays

A telegram announcing winners of the army national school essay contest has been received by Col. George L. Converse, recruiting officer for the Indianapolis district.

Awards of prizes were made on completion of Gen. John J. Pershing, Gen. Peyton C. March and the secretary of war. Prize winners were Donald L. Campbell, Clinton (La.) high school, first; Marjorie Sheets, Chillicothe (Mo.) high school, second; and Bette Bowen Eason, Desoto county high school, Olive Branch, Miss., third.

Many others received honorable mention. Thousands of Indiana school children took part in the contest.

STRIKE AND COAL EXPORTS BLAMED

Gas Co. Official Tells Reason
of Low Supply Here.

The miners' strike of last year and heavy exporting of coal is blamed for the necessity of reducing the gas pressure here by Alfred F. Potts, vice president of the Citizens Gas Company.

In answer to a suggestion made by George Lemaitre, president of the board of works, to the effect that the company use Indiana coal for making gas, Mr. Potts said coal from Indiana and Illinois is being used, mixed with the limited supply of Pocahontas coal on hand.

He said 137 carloads of coal from mines in the middle west have been purchased during the last week. Mr. Potts said during the miners' strike the company was forced to draw on a reserve supply of 150,000 tons of coal, which was practically depleted and which the company has been unable to restore since.

J. D. Forrest, manager of the company, is in Cincinnati endeavoring to get large shipments of coal released from a freight embargo, according to Mr. Potts, who added that it will be necessary to continue to restrict the supply of gas for several days.

HOW AND WHEN TO TAKE ASPIRIN

First see that tablets you take
are marked with the
"Bayer Cross."

To get quick relief follow carefully the safe and proper directions in each unbroken package of "Bayer Tablets of Aspirin." This package is plainly stamped with the safety "Bayer Cross." The "Bayer Cross" means the genuine, world-famous Aspirin, prescribed by physicians for over eighteen years. "Bayer Tablets of Aspirin" can be taken safely for Colds, Headache, Toothache, Rheumatism, Neuritis, Lumbago, Rheumatism, Joint Pains, Neuritis, and Pain generally. Handy tin boxes of 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacturing of Monoaceticacidester of Salicylicacid. WANTS POLICE TO LEARN TO SHOOT

Board of Works Asks City
Dads for Target Fund.

The board of public safety wants Indianapolis policemen to be able to shoot straight.

An ordinance is now before the city council, having been introduced at the council meeting last night, providing for an appropriation of \$2,500 for the "police department target and ammunition fund."

The board of safety's attitude was explained in a letter addressed to the council, stating that plans were being considered to establish regular target practice.

MINISTERS CALLS ON COUNCILMEN.
Councilmen were urged by a committee of Methodist ministers, who visited the city hall, to adopt the two-platoon

system for the fire department.

Under this system firemen would be on duty twelve hours each day instead of twenty-four.

An ordinance appropriating \$25,000 to defray expenses of the centennial celebration to be held here in June was passed.

The council also passed an ordinance amending the police and firemen ordinance to include policemen, raising the salary of the officer assigned to the board of children's guardians and increasing the salary of an electrical engineer in charge of the Gamewell system from \$3,000 to \$3,200 per year.

AMEND ORDINANCE ON TAXICABS.
The council passed ordinances appropriating \$3,000 to the department of law for the payment of judgments, compromises and costs and amending general ordinance 23 governing taxicabs to define all vehicles operating in the city for hire as taxicabs.

A remonstrance against the removal of an esplanade and paving Northwestern avenue between Fifteenth and Nineteenth streets was upheld by the council and an ordinance requesting an order for the improvement was not passed.

Famous Wash Heals Skin

D. D. D., the standard skin remedy, will remove those skin afflictions, and that intolerable itching, burning, and discomfort will disappear under the magic of this remedy. Hundreds testify it has healed cases pronounced incurable. The first bottle is guaranteed to bring you relief. Try D. D. D. 25c, 50c and \$1.00.

Milk and the School An Experiment at Columbus, Ind.

The real food value of milk was never better shown than in an experiment tried out in a town of 10,000 inhabitants.

The school physician observed that many children were under weight. Numbers of them were suffering from malnutrition. This condition was due, not to lack of food, but solely to improper feeding.

A simple remedy was tried---one-half pint of milk and a bread and butter sandwich at 10:15 A. M. each day.

After three months' trial the average gain in weight has been 12.2 ounces per month per child, twice the normal average gain for children the country over.

These facts should make you pause, should cause you to ask yourself, "Do my children drink enough milk?"

According to the most eminent authorities, a quart of milk a day for each child is the minimum.

Children need the protein and minerals of milk, and, above all, the life-giving vitamins.

If your children are not getting a quart of milk a day, it's up to you to see that they do. You owe it to them. Order a quart a day for each child in your family.

Facts about school experiment taken from an article by C. A. Palmer in *the Saturday Evening Post*, April 19, 1920.

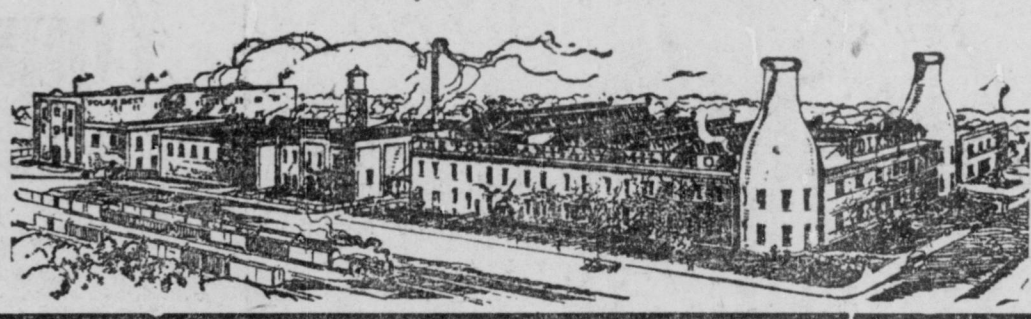

Return your empty milk bottles promptly. Without bottles we can not make deliveries to you.
