

## Shifting Axle Balances Your Load in this Trailer

HERE is a light two-wheel trailer—the VanBriggle Adjustable Trailer—which stops the side-sway that wears out your car and tires, and actually gives your car better traction than when running alone. You can haul a full load in the VanBriggle Adjustable Trailer, even at high speed, and hardly know you are pulling it.

The secret of these splendid advantages lies in the fact that the axle of the VanBriggle Adjustable Trailer can be instantly shifted forward or back, and the trailer's wheels thus brought to the correct position under the load—giving it perfect balance. A crank, at the front of the trailer bed, permits you to shift the axle, at will.

No two loads are exactly alike. In a two-wheel trailer with a fixed axle, you may have excess weight—costly and destructive—either front or rear. Then, your tires give way under the stress of side-sway, your car's rear wheels may be lifted and traction lost, the loaded trailer becomes unwieldy and unmanageable—and the tongue is likely to break.

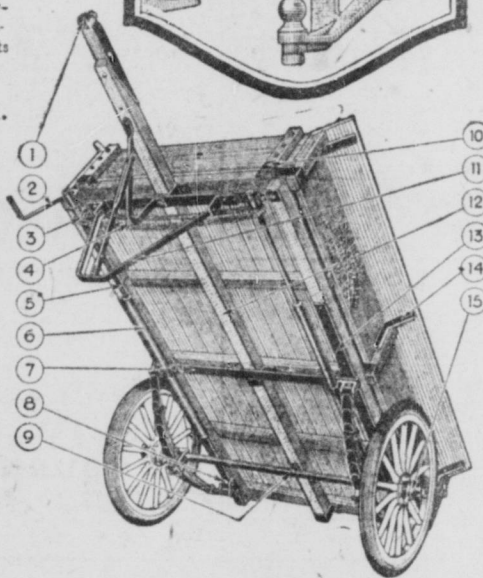

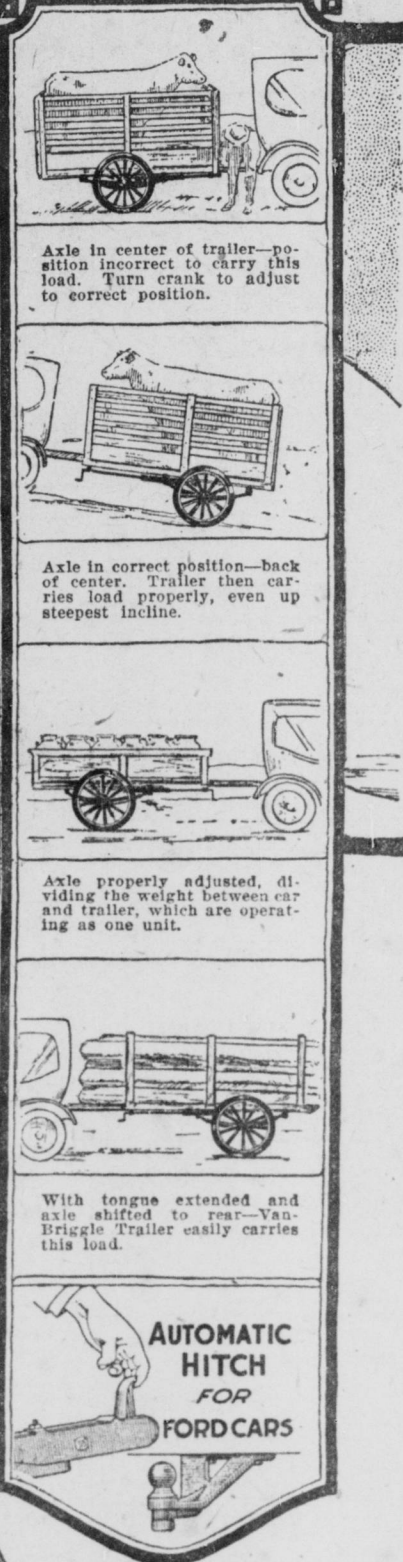

The VanBriggle Adjustable Trailer solves every problem

with its adjustable axle. By adjusting the axle to a correct position before starting, perfect balance is obtained for any load—full traction is assured at all times—tire-destroying side-sway is eliminated—and a speedy, satisfactory journey results.

Note carefully the sketches showing the VanBriggle Adjustable Trailer in use—see the patented, automatic hitch—and study the 15 features as pointed out in the photograph below:

- |                                      |   |
|--------------------------------------|---|
| 1 Brice Automatic Hitch              | 9 Sturdy Steel Axle                     |
| 2 Adjusting Crank                    | 10 New Design Stake                     |
| 3 Sprocket                           | 11 Pocket Stake                         |
| 4 Steel Link Chain                   | 12 Automatic Stand                      |
| 5 Spiral Screw                       | 13 Extension Tongue                     |
| 6 Housing for Spiral Screw           | 14 Steel Crank for Draw Bar and Shackle |
| 7 Draw Bar                           | 15 Angle Iron Brace for Floor Board     |
| 8 Frictionless Roller Spring Shackle | 16 New Design Wheel Hubs                |

Every farmer who owns an automobile needs a VanBriggle Adjustable Trailer. Its rated capacity is 1500 pounds. It is light—it will haul anything from live stock to timber—it is practical, dependable and economical. Two special bodies. Write for illustrated folder giving further facts and complete specifications.

VANBRIGGLE MANUFACTURING COMPANY, INDIANAPOLIS, IND., U.S.A.

# VANBRIGGLE Adjustable TRAILER

This is a reproduction of one of a series of page advertisements which will appear in national publications.

## New Company to Manufacture Automobile Trailers

A NEW company—the VanBriggle Manufacturing Company—recently incorporated for \$1,000,000, has acquired the exclusive manufacturing rights of the Bower Adjustable Trailer of Fowler, Ind., and of Smith's Standard Breeding Crate of Mooresville.

The incorporators of this new company are well-known Indianapolis business men who are identified with other established and successful Indiana business enterprises. (Note again the names listed above.)

### Executive Offices in Indianapolis

The VanBriggle Manufacturing Company will maintain its executive offices in Indianapolis, but its factory will be located in Mooresville, Ind., 16 miles from Indianapolis. A splendid five-acre site, located on the edge of Mooresville and lying along the Pennsylvania railroad, has already been purchased and the erection of a fine, modern, 3-story factory will be started shortly. This factory will have the capacity for turning out daily large numbers of VanBriggle Adjustable Trailers and Smith's Standard Breeding Crates.

An extensive market awaits both the products, which will be manufactured by this company. There already

exists a fine business on each—established with little or no selling effort on the part of the former manufacturers. Backed by the intensive selling and advertising campaign, which the VanBriggle Manufacturing Company has inaugurated, the nation-wide, sales opportunities of these products will be more fully developed.

### The Perfectly Balanced Trailer

The VanBriggle Adjustable Trailer is a superior trailer—the perfectly balanced two-wheel trailer. It is the practical, the economical trailer—it has a vast market among farmers, alone. An inspection of the trailer advertisement reproduced above—one of a series to appear in national publications—will convince you of this product's merits. Smith's Standard Breeding Crate is another product with vast sales opportunities. It is the one recognized breeding crate; used by 22 state agricultural colleges, and used and indorsed by leading breeders throughout the United States, South America and Canada. A national advertising campaign—using page units of space in the leading swine publications—is making this crate known to farmers all over this country.

### FOUR VITAL POINTS

1. Two Necessary Articles
2. Tremendous Market for Each
3. Splendid Management
4. Assured Profits

### Officers and Incorporators of VanBriggle Manufacturing Co.
