

UM—AND AGAIN
UM, TASTE IT?Raw Carrot Salad Just Bit
More Than Toothsome.

"One of the most delicious salads is made from carrots," said Mrs. John Downing Johnson, 20 East Eighteenth street, in discussing her husband's favorite summer dish.

"Now, it is made from raw carrots, which have a most delightful taste of nuttiness."

"We have carrot salad three or four times a week, and Mr. Johnson never becomes tired of it," she declared.

"In making salads it should be remembered that all the ingredients should be very cold."

"Dice the raw carrots in small cubes, place them on lettuce leaves, and serve with salad dressing," she said.

"In making the mayonnaise dressing, the results are always better if all the materials are very cold."

Mr. Johnson's recipe for salad dressing calls for one egg, one tablespoonful of vinegar, one-half teaspoonful of salt, and enough salad oil to make a stiff dressing.

"Beat the yolk and the white of the egg separately, and then mix the two together," explained Mrs. Johnson.

"Add the vinegar and then the salt, and lastly the oil."

"You have to use your own judgment as to the amount of oil, as the quantity will vary according to the kind of oil."

"Beat in the oil very slowly at first, a teaspoonful at a time."

"You can't get good results by beating it with a fork."

Mr. Johnson said the addition of the vinegar insures that the dressing will not separate.

"I have found that substitutes for salad oil can be used with just as good results, making just as good salad," she said.

"The great advantage of a substitute is that it is not so expensive as the oil."

Mrs. Johnson said that she has found the above recipe the only safe way of making salad dressing, and she can always depend on it to come out just right!
