## Hair Curling Troubles Are Over—Read This

Have you heard about the newest way to keep the hair in curl? If not, by all means, cut out these simple directions and try this wonderful method. Procure a new tooth brush and a few ounces of plain liquid salerine from your druggist. Apply enough of the liquid with the brush to moisten the hair from root to tip just before doing it up. You will be quite astonished when you find you have such lovely waves and curls they appear altogether natural. Instead of having been artificially acquired. Best of all, the waviness will last very much longer than it would otherwise. Your hair, of course, will have more "body" and fluffiness than where the drying, singeing, waving iron is used. It will appear glossier and livelier, for salerine has proved equally desirable as a dressing for the hair. You will find it pleasant to use, and it will leave no sticky, greasy or streaky trace.—Advertisement.
