MY HUSBAND'S FAVORITE RECIPE

APPLE SAUCE CAKE. Ingredients—Two cups of sugar, one cup of flour, two cups of milk, one cup of boiling apple sauce, three tablespoonsfuls of soda, two tablespoonsfuls of cocoa, two teaspoonsfuls of cinnamon, one teaspoonful of salt, four cups of sifted flour and one cup of nuts.

Method—Beat the lard and sugar together; dissolve soda in one-half cup of the boiling apple sauce, and dissolve the remaining sugar in the milk while it is boiling hot, and add this to the lard and sugar; then add the cinnamon, salt and flour and beat into the batter.

This makes a four-layer cake.

Mrs. Housewife,
Do You Know?

1. Are dark shelled eggs more nourishing than white shelled eggs?

2. How long vegetables should be cooked for young children?

3. How to keep mice from coming into the house with the coming of cold weather?

(These questions will be answered tomorrow by the HOUSEWIFE.)

ANSWERS TO YESTERDAY'S QUESTIONS

1. The idea that tea drinking kept away pestilence arose in China because it has always been observed that those who drink tea were less likely to be stricken than those who don't. This was and is not due to the tea but to the fact that the water of tea is boiled, and those who quenched their thirst with tea are not likely to drink other in fact, tea.

2. The best way to make ice cream for children is to make milk into jello, allowing it to set before freezing. Only a little cream need be added to this. The result is an ice cream that is appealing, but not rich.

3. A piece of charcoal kept in a refrigerator will absorb odors; after a certain point it becomes saturated and will absorb no more until it has been well baked in the oven. However, the condition of your ice box is not improved in this way. Copyright, 1920.
