

SCHOOL SURVEY BEFORE BOARD FOR APPROVAL

New Buildings and Additions
Recommended for Sixteen
Indianapolis Schools.

REPORT BASIS FOR WORK

Recommendations for new buildings, additions to present structures or repairs at fourteen elementary and two high schools are made in a report of a survey of public school construction needs for 1920-21. The report, made by a committee of commissioners in a special committee. The survey, results of which were given to the board at its regular meeting last night, will be considered at a special meeting to be held next Tuesday evening. It is planned to complete the 1920 building program from the special meeting.

The committee, composed of Superintendent of Schools E. U. Graff, Commissioner Bert S. Gadd and Building Adviser L. A. Snifer, says it has been impossible to make estimates of the cost of the proposed improvements, but that such figures will be available before the special meeting.

In addition to the special committee's report, the board received recommendations for the replacement of a new structure of the Sherridale High School building, based on an enrollment of 2,500 pupils, as outlined by Principal George H. Buck and heads of various departments in the school.

ASK AUTHORITY TO MEET LOANS.

The board adopted a resolution requesting authority from the State Board of Tax Commissioners and State Board of Accounts to transfer from the building bond fund \$150,000 to the special school fund and \$80,000 to the local tuition fund for the new temporary loans, totaling \$80,000 due this Saturday. The temporary loans were made for the purpose of meeting teachers' pay rolls last semester, \$267,800 of the total amount being due to the increased salaries paid last May and June. Authority for the transfers was to be asked of the State authorities today.

The conclusions arrived at by the special committee which surveyed the building situation are based upon the recommendations of buildings and improvements prepared by Superintendent Gran in October, which report furnished data as to the number of half-day classes now being operated in the various schools, the report states. Recommendations of April 1, 1919, also were considered for the reason that many improvements then recommended have not been made.

"The committee has determined upon what would be the best plan for the construction of new buildings and of additions to the present buildings, without consideration of the cost of such construction," the report states. "It being the purpose of the committee to analyze the situation and determine the real need for buildings or additions so that the board might give due consideration to all of such needs in all of the school districts and so that the board would find itself in the position of having neglected any district."

RECOMMENDATIONS FOR BUILDINGS.

The recommendations for each building, in condensed form, are as follows:

School No. 9, East Vermont and Davison—New classroom addition with combination auditorium and gymnasium and departmental rooms for manual training and domestic science to be erected in place of the present old eight-room building forming the south portion of the present school.

School No. 10, West Market and Banning—New eight-classroom addition with combination auditorium and gymnasium and manual training and domestic science rooms to be built to the west of the present structure upon ground recently purchased by the board. This school is to be counted upon to relieve congestion at Schools Nos. 4 and 5 if the addition is built.

School No. 17, West and Eleventh streets—Ten-classroom addition with combination auditorium and gymnasium. Recommended also that the board purchase some adjoining property on which to locate part of the addition, which would relieve congestion in colored Schools Nos. 23, 24 and 40.

School No. 27, Park Avenue and Seventeenth Street—New building of twelve classrooms, combination auditorium and gymnasium and manual training and domestic science department, for special purposes, to be in accordance with the board's standardized requirements.

School No. 35, Madison Avenue and Raymond Street—Four-classroom addition, built in such a way as to provide for the easy construction in the future of a combination auditorium and gymnasium.

**PROVISIONS FOR
SCHOOL NO. 36.**

School No. 36, Capitol Avenue and Twenty-Eighth Street—Eight-classroom addition, combination auditorium and gymnasium and manual training and domestic science departments.

School No. 42, Twenty-Sixth and Rader Streets—New eight-classroom building, so constructed that other classrooms and an auditorium can be added in the future, built upon additional ground to be acquired or upon an entirely new site somewhere in the neighborhood.

School No. 49, Morris and Morris Streets—Eight-room addition, in place of the present old building, some of the large and comparatively new building.

School No. 58, Twenty-Fourth Street and Martindale Avenue—Eight-room new building with provision for future classrooms and auditorium additions on ground which the board already owns.

School No. 62, Tenth and Wallace Street—New eight-classroom building with provisions for future classroom and auditorium additions on ground now owned.

School No. 67, Walnut and Rochester

Streets—Eight-classroom addition with auditorium and manual training and domestic science departments to complete the present building which was outgrown shortly after it was built a few years ago.

School No. 70, Central Avenue and Forty-Sixth street—New eight-room building with provisions for future classroom and auditorium additions. This is expected to relieve congestion at School No. 66 also.

School No. 74—An entirely new school.

Four-class room building recommended to be built so that additions may be made in units of four rooms until sixteen rooms have been attained.

**NEW FRESH
AIR SCHOOL.**

Potter Fresh Air School—"It is recommended that a new Potter Fresh Air School be constructed at Arsenal Technical High School to take the place of the present disreputable and unsatisfactory Fresh Air School." Building would be of "most modern cottage type."

"The construction of additional classrooms and the remodeling of the present building in accordance with the general scheme which was prepared by Adolf Scherer, architect, previous to the awarding of contracts for the building now being constructed. The purpose of the building is to dispense with the present auditorium, gymnasium and manual training, it was the intent of the architect that the new building was to provide a means of accomplishing the above remodeling and addition and the construction now going on is the first step in this general scheme. As soon as the new auditorium and lunchroom is ready for use the auditorium in the old building can be dispensed with and the remodeling made possible. It is the thought of the architect that the new building will be ready for use by the middle of next summer, the contracts for the future improvement of the school should be let early in the spring, say not later than April 1, so that the remodeling in the present building could be finished by the following September, otherwise, it would be necessary to postpone the opening for another year. Inasmuch as the present situation is not relieved to any great extent by the construction of the new auditorium and gymnasium building which was only a means to an end, it is thought that the work should be completed in regular order as originally planned."

North Side High School—"The North Side High School is a building that must come as soon as practical or possible and the committee recommends that continuous progress be made toward this end by the preparation of the educational requirements to care for 2,500 pupils and the selection of an architect and preparation of plans with a view to construction in the near future."

The committee pointed out that for financial reasons it may not be possible to accomplish all of these improvements next year.

**123 ROOMS FOR
SHERRIDALE.**

Requirements set down for the new Sherridale High School building by Principal Buck and his staff indicate such a structure must be a vast one. If all of the rooms requested are provided there will be more than 125, not including the gymnasium and auditorium.

Superintendent Graff was directed to cooperate with the Indianapolis Lodge of Elks in obtaining tickets for the men who are to be invited to the lodge's annual Christmas celebration and to cooperate with Myron R. Green, chairman of the membership committee of the Red

Make Your Own Gray Hair Remedy

**The quick way is to use
Dr. King's New
Discovery**

Mrs. A. Dixon, a well-known Brooklyn trained nurse, made the following statement regarding gray hair: "Streaked, faded or gray hair can be quickly turned black, brown or light brown, by the use of the following remedy that you can make at home: "Merely get a box of Oxley powder at any drug store. It costs very little and no extras to buy. Dissolve it in 2 oz. of distilled water and add it through the hair. Full directions for use and a gold bond guarantee come in each box. One box will last you for months."

"It is safe, it does not rub off, it is not sticky or gummy, and leaves the hair fluffy. It will make a gray-haired person look twenty years younger."—Advertisement.

GRANDMOTHER KNEW

There Was Nothing So Good
for Congestion and Colds
as Mustard

But the old-fashioned mustard-plaster burned and blistered while it acted. Get the relief and help that mustard plasters gave, without the plaster and without the blister.

Mustard does it. It is a clean, white ointment, made with oil of mustard. It is scientifically prepared, so that it works wonders, and yet does not blister the tenderest skin.

Genial mustard Musterole is with the first. See how quickly it brings relief—how speedily it puts disappears.

Use Musterole for sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosty feet, colds of the chest (it often prevents—)
