

MAIDEN SEEKER FOR POT O' GOLD GUARDED HERE

Travelers' Aid Society on
Watch for Unsupervised
Girls.

PROPER GUIDES GIVEN

What does Indianapolis do for the girl who reaches here alone?

Of course, we don't mean the competent young woman who has traveled through a dozen or more States on her "hone," but we are referring to the little girl from "down State" who a few short hours ago packed her suitcase so proudly with the elegant appearing dress, the work of the town "seamstress" and, with heart beating high with ambitions to make money, told her folks "goodby," set out for "the big city," where work is supposed to abound in every direction you look.

To some sophisticated metropolitan citizens the problem of the country girl in the city seems to be "ancient history." But it is one of those peculiar economic conditions which does not evolve with the rest of the world and the difficulty of protecting the young who seek work within the gates of the Union Station?

For this purpose the Travelers' Aid Society of Indianapolis has an office in the southwest corner of the Union Station, where Mrs. Edna L. Pearce watches for the strange girl and directs her to a safe place to room.

EASY TO KNOW

STRANGE GIRL

How do you know a girl is strange in the city? That is easy. If she knows what she is doing she will either walk straight through the depot or look around for the person who is to meet her. On the other hand if she is a stranger she usually puts her bag down in the middle of the floor and casts an uncertain glance around the room. This girl usually arrives late in the afternoon. Also she usually is without money, or if she has any, it is a very small amount. She does not know where she is going and does not have any friends in the city. She usually has the opinion she can find a room "right across from the station," and that the next morning she can get a "swell" job at the first place she inquires.

It is the business of the matron of the Travelers' Aid Association or the Y. W. C. A. worker, into whose care she is transferred, to dissuade her as kindly as possible. Perhaps by picturing to her in firm language the hardships she will have to go through may be she can be convinced that "home is the best place after all."

She usually says she came to the city to get work, but she doesn't "know much of anything," but she understood "anybody could get a job." It sometimes takes more than her informant's statement to convince her just "anybody" can't get a job, but trained women only are in demand.

What brings the girl to Indianapolis?

It is generally conceded the stories of high wages paid during the last few years to the cities, but the real answer for all times is "disappointment." Except for "unhappiness" in many instances. Perhaps it is real, but more often it is only fancied. "Home trouble" in its many phases is the title for many, many cases. Sometimes the father or mother has married a second time and discord enters the home. Sometimes the desire to escape the results of poverty brings her to the city, ignorant of the knowledge that she is about to enter a harder life than the one she left.

THE ONE SEEKING A BETTER TIME

Then, there is the girl who, although she is not wilfully "bad," has come to believe that she can have a better time in the city than she had under the eyes of her parents. The matrons say she is the hardest to work with.

"In fact," said Mrs. Pearce, "the girl who needs our help the most is the one who is most difficult to approach. She far more often represents what she terms our 'interference' than does the girl who is not in need of our help."

"But, I do not believe these girls should be blamed for their conduct, because they do not know any better, and

Returns Home Soon

MME. TSAMADOS.

M. Tsamados, minister, resident and counselor of the Greek Legation at Washington, D. C., and his charming wife have just returned to the capital from a trip to Wyoming. They will sail soon for Greece. Tsamados has resigned his post, following the overthrow of the Venizelos government in Greece.

where a person is ignorant he or she should not be blamed."

A number of Travelers' Aid Associations and branches of the Y. W. C. A. have printed pamphlets giving a number of rules to the girl who is about to come to a larger city, where she is a stranger. She is warned not to come without enough money to "tide" her over for a few weeks. She should get in touch with the "Y." She should be prepared to do some particular line of work or to learn one. She is advised to choose her clothes with care, picking out what will make a good appearance, being neat, but not "flashy." "Your clothes will often cost you a job," she is warned.

Low Price on Farms Causes Bank Failure

HOMER, Ill., Nov. 24.—The private bank of Wiggins & Wiggins here closed Tuesday. It is said the bank has failed to the amount of \$250,000. Low prices of farm products, forcing farmers to hold their crops and in turn forcing the bank to hold mortgages is given as the cause of the bank's trouble. The bank was established in 1880.

2 KILLED AT CROSSING.

DETROIT, Mich., Nov. 24.—Two unidentified persons were killed and one injured when a southbound Flint limited interurban car hit an automobile north of Seven-Mile road last night.

ARMY ALL SET FOR FIRST TIME IN FIFTY YEARS

General Snow, in Report, Says
U. S. Fully Equipped With
Artillery.

NOTES OFFICER NEED

WASHINGTON, Nov. 24.—For the first time in half a century the United States has on hand sufficient stocks of artillery, left over from the war, to equip a large-sized army, according to the annual report of Maj. Gen. J. J. Snow, chief of field artillery, to the Secretary of War, made public today.

"Should war unfortunately break out in the next few years," said General Snow, "we should be spared the spectacle of artillery drilling with improved wooden guns, home-made telephones, rope harness and similar expedients which characterized the first year of the present war."

General Snow reviews the year's activity of the field artillery as a combination of a great deal of work with small visible results. At no time during the year he says, have there been sufficient regular officers to properly carry on training of troops and recruiting enlisted men has been slow and difficult.

Financial inducements in civil life and unsettled conditions were given as the main causes for resignations of officers and lack of re-enlistments of enlisted men. The result was that during the entire year many regiments have remained at little more than the strength of batteries.

During the year four light regiments have been motorized for experimental purposes. Although a thorough test of the experiment could not be made, due to the shortage of enlisted men, considerable data has been accumulated and the experiments will be continued until sufficient information has been obtained to justify conclusions as to the substitution of motors for horses throughout the field artillery.

One battery of artillery has been equipped with mules instead of horses on the showing of statistics that these animals lost through sickness and injury during the World War was about one-tenth of the number of horses lost.

Lowther and Bryson Seek Postmaster Job

As a reward for his political services through numerous campaigns, Richard Lowther, official stenographer of the Marion County Probate Court, is seeking the appointment as postmaster of Indianapolis to succeed Robert E. Springsteen, the present postmaster, who was appointed by the Wilson administration.

Robert H. Bryson, city controller, is the other candidate, and it is generally understood that Bryson is the favorite among the political powers. Bryson's appointment as postmaster would remove him from the field as a candidate at the primary in the Republican race for mayor. Bryson has been looked upon with favor as the city administration candidate but his desire to become postmaster eliminates him temporarily from the race.

Mrs. McClain Will Accompany Bob on This South Sea Trip

Ex-Marine, Who Inherits Sultan's Forty Dusky Wives,
Writes War Department.

FRANKLIN, Mass., Nov. 24.—Robert A. (Bob) McClain, formerly of San Francisco, ex-marine and soldier of fortune, has written to the War Department for confirmation of the report that he has been willed the empire of the sultan of Liang-Liang and the sultan's harem of forty dusky wives.

The little empire of Liang-Liang is an island in the south seas, washed by tropical waters. The possessions include valuable pearl fisheries. Fifteen hundred subjects dwell in this land of palm trees and sunshine.

McClain once saved the sultan's life and was adopted as the sultan's son. It happened back in 1900 when "Bob," as a member of the 2d Marines, was ordered to the island, at the extreme south end of the Philippines. McClain says he rescued the sultan from some men who were beating him and that the aged sultan finally made him his "son and heir." Now the sultan is dead and McClain is informed unofficially that the title for the empire, harem and all, awaits him.

But McClain was married to Miss Ethel Miller at Wrentham, Mass., last May, so he is going to disband the harem if the War Department confirms the advice from Liang-Liang for Mrs. McClain to go to the South Seas. At present McClain is working as a mechanic.

Sidney S. Miller to Be First Aide to Evans

Sidney S. Miller, 27, 1429 North Alabama street, a member of the firm of Miller, Dalley and Thompson, and son of Samuel D. Miller, has been appointed chief deputy prosecutor to William F. Evans, prosecutor-elect. Mr. Miller was a major, commanding the first battalion of the 150th Field Artillery, serving eighteen months in France. He has been a captain in the Indiana National Guard and has seen service on the Mexican border.

Mr. Miller is a graduate of the Indiana Law School, Hamilton College, at Clinton, N. Y., in 1916, he began practicing law and on July 1, 1919, entered his father's law firm.

Other appointments will be announced soon by Mr. Evans.

TECHNICAL H. S. WORK IS BEGUN

Shop Units and Power Addition Under Way.

A big hole in the Technical High School grounds, and the equipment and men engaged in making it, is attracting much attention; for it's a very large hole and a very busy place.

It is the beginning of the shop units and power house that, like the academic building, will form an essential part of the proposed general plan of building for the school.

The building will be about 210 by 400 feet—the shop units to be two stories in height and that part devoted to the laboratories to be three stories.

On the first floor of the building there will be two machine shops, an automobile shop, a temporary gymnasium, and receiving rooms for material for the building and for general storage purposes. Through the center of the building will be a driveway through which each of the shops may be reached.

The gymnasium, which will be two stories in height, will be equipped with bleachers and with a balcony on three sides for additional seats and will have windows on three sides.

The second floor will have a lecture room, three demonstration rooms and two general physical and one electrical laboratories.

The third floor will be arranged in a very similar manner, but will be for chemical laboratories, containing three big laboratories, a lecture room and a demonstration room.

The exterior of the building will be of brick, and the interior of steel and concrete.

There will be six general stairways, and the second floor of the building, to the east, will be on a level with the hill.

The power house will be fitted with equipment that could be used for demonstration and is designed to be sufficiently large to take care of the proposed building program.

The power house will be 133 by 85 feet, and the height of the boiler room will be fifty-seven feet.

An especially good and effective system of ventilating, it is explained, will be employed in the shops.

Piles Cured in 6 to 14 Days.

Druggists refund money if PAZO OINTMENT fails to cure itching, blind, bleeding or protruding piles. Instantly relieves itching piles, and you can get restful sleep after first application. 60c. Advertisement.

Spiral Puttee Fad for Girls Has Real Reason Back of It

'Keeps Our Legs Warm, Silly—Tee-Hee'—and So, There You Are.

WHEELING, W. Va., Nov. 23.—Spiral puttees, just like brother used to wear, A. E. F. have displaced flimsy silk hose among the high school girls here.

The girls say the puttee is both fashionable and utilitarian and the fad is spreading rapidly to their older sisters. The spiral puttee, fished from a brother's war trophies, was introduced when the thermometer slid to a new low mark for the season.

A large number of puttees soon made their appearance and now nearly every high school girl is wearing "em." Stores report an increasing demand for puttees. "They keep our legs warm, silly!" said one of the faddists blantly when asked for the why of the new fashion.

80 PER CENT MUST REACH TREASURY

Ruling in Stock Sales Means
Cut in Commissions.

Not less than 80 per cent of the money derived from the sale of stock must reach the treasury of the company uninspired, according to an order of the Indiana Securities Commission, issued at a meeting held late Tuesday. According to this order, corporations issuing stock for sale must dispose of the securities at a total cost of not more than 20 per cent, including commissions, advertising and every other expense entailed in the sale of the stock.

The expense allotment of 20 per cent, however, will not be allowed in all cases. It will rest with the commission to state what proportion of the stock shall be allowed for expense in its sale.

The ruling of the commission will bring a radical change in methods of selling stock, since commissions as high as 35 and 50 per cent were formerly allowed in stock selling.

The Obenchain-Boyer Company of Logansport has been granted the first issuer's license. Dealer's licenses were granted Charles C. Bowker, South Bend; Bankers' Investment Company, Indianapolis; and Taylor & Taylor of Indianapolis.

FOUR NEW FELLOWSHIPS.
NEW HAVEN, Conn., Nov. 24.—Four fellowships to be known as the Bishop Museum fellowships for study in anthropology, botany, zoology, geology and geography, have been established by the Yale Corporation. It is officially announced.

A NASTY COLD EASED AT ONCE

"Pape's Cold Compound" then
breaks up a cold in a
few hours.

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a severe cold and ends all gripe misery.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, contains no quinine—insist upon Pape's!—Advertisement.

STOP ITCHING ECZEMA

Penetrating, Antiseptic Zemo
Will Help You

Never mind how often you have tried and failed, you can stop burning, itching eczema quickly by applying Zemo, furnished by any druggist for 35c. Extra large bottle, \$1.00. Healing begins the moment Zemo is applied. In a short time usually every trace of eczema, tetter, pimples, rash, blackheads and similar skin diseases will be removed.

For clearing the skin and making it vigorously healthy, always use Zemo, the penetrating, antiseptic liquid. It is not greasy, and it does not stain. When others fail it is the one dependable treatment for skin troubles of all kinds.

ONE WOMAN'S EXPERIENCE

Of Interest to Expectant
Mothers.

Goshen, Ind.—"I took Lydia E. Pinkham's Vegetable Compound with good results after I had suffered for some time with female trouble. Some years ago I had twin boys and took your Vegetable Compound before they came, also before my four-year-old boy was born, and afterwards, and think it fine for such cases. I tell others what it did for me and you may publish my testimonial."—Mrs. Geo. A. Foss, 711 S. 9th St., Goshen, Ind.

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong and this good old-fashioned root and herb remedy contains no narcotics or harmful drugs.

Don't cough

THE violent paroxysms of coughing soon eased by Dr. King's New Discovery. Fifty years a standard remedy for colds. Children like it. No harmful drugs, but just good medicine. At your druggists 60c and \$1.20 a bottle.

For colds and coughs
Dr. King's
New Discovery

Lazy People, Lazy Bowels
So many folks neglect the serious condition of constipation. It undermines the health, takes all vim out of you. Dr. King's Pills will in a gentle manner invigorate the system, stir up the liver, move the bowels. Same old price, 25c., all druggists.

"I FEEL AS THO' I COULD NOT DRAG THRU THE DAY'S WORK"

is the complaint of many a woman in the household, office or factory After suffering pain, feeling nervous, dizzy, weak and dragged-down by weaknesses of her sex—with eyes sunken, black circles and pale cheeks—such a woman is quickly restored to health by the Favorite Prescription of Dr. Pierce.

Changed, too, in looks, for after taking Doctor Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. It is purely vegetable and contains no alcohol.

Druggists sell it in tablets or liquid, or send Dr. Pierce, at Invalids' Hotel in Buffalo, N. Y., 10 cts. for trial package. After taking this well-known remedy you will feel strong and healthy. Such a change in feelings, too—there's sparkle in the eyes, a rose tint in the cheeks, for one has rich, red blood. There's elasticity in every movement and a spring in the step. Love comes to every woman who has bounding health—but when she is pallid, dull-eyed, languid, she has no magnetism, nor does she appeal to any man.

Detroit, Mich.—"Dr. Pierce's Favorite Prescription did me a world of good. I had become all run down, was weak and extremely nervous. I could not sleep and my appetite was poor. I had a tired and worn out feeling—no ambition to do anything. My whole nervous system seemed to be affected. A friend advised me to try the Favorite Prescription and by the time I had taken two bottles I felt like a new woman. My health and strength had fully returned and I had no discomfort of any sort. Dr. Pierce's Favorite Prescription is an excellent tonic to build up a nervous and run down system."—MRS. CHAS. CLARK, 183 Porter St.

THE number of motor miles traveled by the average American has been increasing steadily for a decade. During 1921 this mileage again will be vastly increased.

It is estimated that 10 million automobiles and trucks will be in operation by the end of 1921. The estimate for 1920 is 7,523,000.

The most intensive use of all kinds of automotive machinery is in the 10 Middle Western states served by the Standard Oil Company (Indiana), and the major problem confronting this company is to keep its patrons supplied with all the gasoline and lubricating oils they require.

The Standard Oil Company (Indiana) is acknowledged to be the largest individual producer of gasoline in the world, and its efficient system of distribution makes it possible for the remotest citizen in the 10 states served to get his requirements of petroleum products with a minimum of effort and expense.

Advanced methods of refining, originated in the Standard Oil Company (Indiana) laboratories, have vastly increased the percentage of gasoline recoverable from crude oil.

The Company is striving to increase the yield of gasoline, and every effort is concentrated to the accomplishment of this result without sacrifice of gasoline quality. The efficiency of Red Crown Gasoline is an illustration of what has been accomplished.

The entire petroleum industry is working to multiply the motor miles which shall be available during 1921, and the Standard Oil Company (Indiana) is leading in this effort.

Prospectors are seeking to discover new fields to drill. Producers are insisting on maximum output from wells already drilled.

Waste of oil in transportation is practically eliminated, and the Standard Oil Company (Indiana) efficiency in refining has vastly increased the average recovery of motor fuel from the crude available.

The Standard Oil Company (Indiana) is co-operating in every way with the automobile industry and the American motorist to multiply motor miles in 1921.
