PUSS IN BOOTS JR.

By David Cory.

Well, as soon as the little Gnome Bakers had left, as the Gnome King had commanded them to do in the last story, he turned to Puss and said: "Be careful, my cat, eat too much. Gnome cake is more filling than that of mortal make." But Puss paid no heed. Already he had eaten a great hole in the cake, and finding the inside warm and flaky, he had squeezed himself through the openings. It was much easier to eat the inside, as it was softer, and the crust had already grown quite hard.

He was so busy eating he did not no-

ties that as he ate away the inside of the sponge cake the outside grew tighter, and pretty soon the opening through which he had crawled became smaller and smaller. Finally, closed altogether, he could not move.

When Puss found this out he was indeed frightened. He pounded on the walls of the his sponge cake prison and called loudly to the Gnome King.

Finally, he thought he heard the voice of his small friend. He pressed his ear

close to the wall and listened. Sure enough, he could just hear the words, "Hold tight to one side and brace your feet and in the next moment the cake ball will roll out." Puss was too terrified to speak. The crust of the cake ball broke into a thousand pieces, and Puss landed safely some distance away, still clinging to a huge piece of sponge cake, which acted like a cushion between him and the ground.

The crust of the cake ball broke into a thousand pieces, and Puss landed safely round as a ball.

Men and women, the world over, are irresistibly attracted to the Cadillac, first, last, and most of all, because of its everlasting and unvarying dependability.
