## KEEPING HOUSE WITH THE HOOPERS

(The Hoopers, an average American family of five living in a suburban town, on a limited income, will tell the readers of the Daily Times how the many present-day problems of the home are solved by working on the budget that Mrs. Hooper has evolved and found practical. Follow them daily in an interesting review of their home life and learn to meet the conditions of the high cost of living with them.)

The children trooped through the house with their mother as soon as breakfast was over. Baby Betty seemed to play in the sandbox in the back yard when Helen and Roger were home and seemed to be so much going on in the house.

Roger helped his mother turn the mattresses on all the beds and took the small

"Yes, I do know it, dear, and I've been trying to manage it for a long time," replied Mrs. Hooper softly. "I shall begin it now at any rate, and continue as long as possible."

"Will you use the money you are saving on the laundry, mother?" asked Helen quickly. "I shouldn't want you to do that."

"Oh, not at all, dear," said Mrs. Hooper. "I don't believe in that plan of transferring the few dollars you save on one item in your budget to another one, or even to lump the entire sum that may be saved each month and use it for some special purpose."

"Well, I should think it would be all the same in the end," observed Helen. "Not as far as preserving the equilibrium of your budget is concerned," said

runs out into the yard and shook them before he went off to the cellar to tinker with such things as needed to be repaired, and to clean up the walks and put the yard in order.

Helen dusted the big living room and gave her own room a complete overhauling while Mrs. Hooper busied herself with the sweeping and mopping of the rooms and halls. She usually cleaned one room thoroughly every day so that there was really no accumulation on Saturday and by 11 o'clock she and Helen were in the kitchen preparing vegetables and putting the evening meal and planning the dinner for Sunday.

"When father and I go out for a walk this afternoon, Helen," said Mrs. Hooper, "we will see Miss Brown about your having a dancing lesson each week after this."

"Oh, mother, I am so glad," Helen's eyes were shining. "I've wanted to go to the class so much. All the other girls go, you know."

Mrs. Hooper. "If I save \$3 that was Ellen's salary out of my operating expenses, that balance stays there each week and at the end of a month if I wish to spend the accumulation it must be put into something that comes under the head of operating expenses like house supplies or house furnishings or help or light or heat or telephone, and not be spent for food or clothes—except in case of emergency," added Mrs. Hooper, "and then I should use it, of course—but reluctantly."

"Well, I don't quite see what you mean," remarked Helen.

"I'll explain it to you at the end of this month when I make up my balances in my account book," answered Mrs. Hooper, as she put the children's lunches on the table, "and I'll show you also how we will squeeze the 50 cents a week for your dancing lesson out of our slim little 'advancement budget' that only allows us \$150 a year and has to cover club dues, books and magazines (which we read

## 57 Reasons for Aiding Library's Book Fund Drive

Whenever a holiday season approaches the library finds itself in a serious situation. School planning programs, societies giving plays, hostesses planning parties, ministers preparing sermons, etc., all beseege us for material on Christmas, Thanksgiving, Halloween, Washington's birthday, etc. They come for plans, poems, stories, costume suggestions, history of customs, games, plans for parties and so on. The meager collection of suitable books in the library is soon exhausted and literally scores of persons daily must go away disappointed.

In purchasing new books of fiction the library must buy first the book which will be most in demand by the average

reader, the book of a more entertaining type. As a result the library is constantly embarrassed by calls from club women and other serious readers for the new books by authors of recognized literary merit. It has been forced to delay purchase of this type of book until the demand for it could be estimated. By the time purchase is possible the immediate demand often has passed.

When the library moved into the new building the fiction shelves were crowded. The circulation has so increased and the books have been so rapidly worn out without being replaced that the collection could now occupy a third of the space required in 1917. The collection of detective stories, so popular with men, long ago exhausted its charms with most of its readers, because it has been so impossible to buy the new and old titles in adequate numbers.

Indianapolis, because of its strategic

Industrial location, should have one of the best library magazine subscription lists in the country. As it is, the list is by far the smallest of any library of its size in the country. The list of practical and technical magazines is particularly weak. The library subscribed to no magazine on wireless telegraphy, gas or concrete, to only one on aviation and three on automobiles. A periodical on such specific subjects appearing twelve or fifty-two times a year is often of more help to expert engineers or mechanics than many books along these lines.
