

OUTLINE RILEY HOSPITAL WORK

Further Plans for Memorial to Be Made Thursday.

A meeting of the Riley Memorial Association will be held at the University Club Thursday noon to hear the report of the subcommittee that met yesterday with a committee representing the trustees of the Indiana University to work out the mutual relations between the two organizations relative to the building and maintenance of the children's hospital in Indianapolis that will constitute the memorial.

A joint executive committee, consisting of an equal number of representatives of the Riley Memorial Association and Indiana University, is to be selected by their respective bodies and the first meeting of this joint executive committee is to be held at the University Club next Tuesday, at which definite plans will be taken up.

The Riley Memorial Association is now composed of twenty-one members who personally knew James Whitcomb Riley, but it is proposed to increase it to include all those who may be interested in the project and to make it national in scope.

The matter of a suitable Riley memorial was taken up a short time after death, and it finally was determined that a children's hospital was most suitable memorial that could be erected.

An enactment of the State Legislature, at its recent session, \$125,000 will be given by the State toward the erection of the hospital, and \$50,000 a year towards its maintenance. It is the wish to increase the \$125,000 to \$200,000 by means of contributions and also to increase largely the maintenance fund for the hospital.

The plans are for a hospital that will provide for the care of 200 children, as a first unit, and ultimately to increase these facilities by the addition of second unit and also to establish a place for convalescent children, somewhere in the country convenient to Indianapolis.

It is planned to break ground for the first unit of the hospital late in the fall of this year and to have it dedicated and ready for occupancy by October of 1922.

One of the first things to be taken up will be the question of a site and suitable architectural plans. Children's hospitals in other cities, and especially the one in Boston, will be investigated that the most approved methods may be incorporated in the one in this city.

STOLEN PETS SUBJECTED TO MEDICAL KNIFE

(Continued From Page One.)

The operations on them are necessary to the proper instruction of medical students and that regardless of the objections of laymen to the practice, operations on the dogs should be carried on as at present.

CHARGE COLLEGE STEALS DOGS.

Others who have investigated the college methods complain, not against the practice of operating on the dogs, although that is regarded as largely unnecessary, but against the manner in which these things are carried out.

These complaints have been made against the college:

1. That dogs are obtained by surreptitious methods that involve illegal acts and are such that no owner of a pet dog has any assurance that his pet will not be captured, taken to the college and destroyed.

2. That the dogs held in captivity at the college are compelled to live in close quarters, on cement floors without any kind of bedding and frequently spend hours on wet concrete following the flushing with the hose of their quarters.

3. That dogs which survive the knives of the student surgeons are returned to the pens with other dogs, there to suffer the after effects of the operations and recuperate or die, according to their strength.

4. That the same dogs are frequently the victims of several operations and undergo extreme suffering during the period when they are recovering from one operation and awaiting another.

COLLEGE ENTERS GENERAL DENTAL.

As against these charges the college authorities assert:

1. That no dogs are obtained from Indianapolis and that no pets are included among those which are procured for the college.

2. That the dogs are kept in specially constructed kennels, are kept clean and have straw on which to lie.

3. That unless the operation on the dog is of a minor nature the animal is never allowed to come from under the influence of an anesthetic, but is destroyed.

4. That in operations if the dog is permitted to live the best of surgical care is taken of the wounds and the keepers have instructions to destroy the dogs whenever it is apparent that the dogs are suffering extreme pain.

Statements obtained from various sources by the Times in an investigation covering a period of several weeks show conclusively:

1. That the college keeps no definite records of the procurement of dogs and there is nothing to prevent the persons from whom it obtains dogs from delivering family pets that have been stolen or enticed from homes.

2. That last week there were at least three dogs at the college kennels

which had been placed by the Indianapolis Humane Society in the hands of persons who had previously made affidavit to their desire to give the dogs good homes.

2. That three successive inspections of the dogs quarters at the college failed to reveal any evidence of straw or any other bedding for them, and on two of these inspections the dogs were found lying on wet concrete floors in rooms unventilated and cut off from sunlight.

3. That dogs suffering the results of operations are returned to the kennels with other dogs and do die there as a result of the injuries inflicted on them in the surgery.

4. That among the dogs confined at the college are animals that bear the scars of repeated operations of a nature that could not possibly have been without suffering, even though anesthetics were used during the actual operations.

OWNERS OF PETS BARE CHARGE.

From time to time in the last few weeks repeated complaints have been received at The Times office concerning the disappearance of pet dogs whose owners have reason to believe they were stolen. Among these owners of dogs there is a growing belief that the animals have found their way into the college, from which no dog ever escapes alive.

Aquity at the medical college brings no satisfactory information to owners of dogs concerning them.

The college does not permit persons who believe their pets in the kennels to visit them for the purpose, or seeking to identify their dogs.

FORCED TO USE SEARCH WARRANT.

The operations on the dogs are conducted before college classes and the college refuses to permit laymen to attend these classes.

The only assurance that the public has against extreme cruelty in the treatment of these animals or the possible destruction of valued pets is the word of the college authorities that humane methods are used behind the doors that the college has so far seen fit to keep closed.

A search warrant issued in the city court last week was the instrument through which it was ascertained that highly valued pet dogs do find their way to the "death kennels" in spite of the assurances of the college to the contrary.

The Indiana law concerning cruelty to animals reads as follows:

"Whoever overdrives, overloads, drives when overloaded, overworks, tortures, torments, deprives of necessary sustenance, cruelly beats, mutilates or cruelly kills or causes or procures to be so overdriven, overloaded, driven when overloaded, overworked, tortured, tormented, deprived of necessary sustenance, cruelly beaten, mutilated or cruelly killed, any animal; and whoever, having charge or custody of any animal, either as owner or otherwise, inflicts needless cruelty upon the same, or mutilates the same, or deprives it of natural means of defense or protection, or cruelly or unnecessarily fails to provide the same with proper food, drink, shelter or protection from the weather, shall, on conviction, be fined in any sum not more than \$200, to which he shall be added imprisonment in the county jail for any period not exceeding sixty days: PROVIDED, That the provisions of this section shall not apply to the docking of lambs, shearing of cattle, or clipping of horses."

BURGLAR VISITS BRANCH LIBRARY

\$10.15 Loot of Window Thief in Brightwood.

A burglar climbed into the window of the Brightwood branch of the public library, 2456 North Station street, today and Mrs. Augusta Yelky, librarian, told the police that \$10.15 was missing.

Mrs. G. L. Dougherty, 2432 North Illinois street, reports that a purse containing \$78 was stolen from her home.

F. H. Blackey, 1825 North Meridian street, told the police a burglar broke into a garage in the rear of his home and took a 1912 rug valued at \$75.

The Dutton and Garten Company, 425 North Capitol avenue, reported their store entered. Twelve flash lights and \$15 were taken.

C. V. Cavanaugh, 4248 Park avenue, told the police a burglar broke into his garage, but nothing was stolen.

C. R. Ritter's chicken coop in the rear of his home, 1235 West Thirty-fourth street, was entered by thieves who carried away eight hens valued at \$16.

DR. HARRIGAN'S ADVICE TO THIN, NERVOUS PEOPLE

It's worth your while to read what a New York specialist has to say about the nerve and will builder that Hook drug stores and other leading druggists sell so much of these days. He writes:

"After those who are nervous, nervous, anemic or run-down, take natural phosphate substances such as Bitro-Phosphate and you will soon see some astonishing results in the increase of energy and strength of body and mind."

Bitro-Phosphate is a pure organic phosphate such as good physicians prescribe to increase weight and create abundant nerve force.

CAREFUL: Although Bitro-Phosphate is an excellent aid in relieving weak, nervous conditions, its use is not advised unless increased weight is desired. Advertisement.

CAR CO. COSTS FOR THIS YEAR PUT ABOVE 1920

(Continued From Page One.)

pany costs \$3.1 cents a kilowatt hour. The testimony showed that the company purchases about two and one-half times as much current as it produces.

Figures presented by Mr. McGowan showed that the earnings of the company for the first twenty days of March were \$303,035.37, including \$12,022.70 collected from the sale of transfers at 1 cent each.

The figures were compared with earnings of \$24,280.83 for the same period last year. The figures showed that the operation of cars during the month of January cost the company \$147,681.66 and \$130,142.29 in the month of February. Another statement showed the platform cost of running a car for an hour was 79 cents in 1919, 84 cents in 1920 and that it will average 85 cents in 1921.

Taxes are one of the biggest items with which the company has to contend, Mr. McGowan's figures showed.

The total taxes for 1921, including all local taxes, Federal taxes and franchise taxes, are estimated at \$253,340.73. This figure is based on a valuation of \$15,068,770 made for taxes last year and on an estimated rate of \$2.47 for each \$100 of taxable property. The total taxes for 1920 were \$209,471.10, at a rate of \$2.40.

Of this the Federal income tax amounted to \$38,083.92 and franchise taxes amounted to about \$14,000, including the interurban franchise tax.

Samuel Ashby, counsel for the city of Indianapolis, objected to these calculations on the ground that the estimated rate is too high and that the valuation of the company's property probably will be reduced. He declared his belief that a valuation for taxes should be no different from a valuation for rate-making purposes.

Another statement presented in evidence showed that the fixed charges of the company in 1920 were \$28,131.29 and that the estimated fixed charges for 1921 are \$33,988.81. The deficit for 1921, another statement indicated, will be about \$286,230.14. This statement contained a detailed report of the expenses the company must meet each month and of the monthly deficits. He testified that an annual dividend of \$300,000 on the company's preferred stock is considered a fixed charge.

Mr. McGowan presented an estimate showing that the company expects to obtain a total of \$288,065.44 a year from the proposed increase. Of this amount it expects to collect \$144,032.44 from the fare increase and \$144,000 from the proposed increase in the transfer charge. The company estimated that 15 per cent of the passengers would pay cash fare and that the remainder would avail themselves of the company's proposed offer to sell twenty tickets for \$1.

Mr. McGowan presented an estimate showing that the company expects to obtain a total of \$288,065.44 a year from the proposed increase. Of this amount it expects to collect \$144,032.44 from the fare increase and \$144,000 from the proposed increase in the transfer charge. The company estimated that 15 per cent of the passengers would pay cash fare and that the remainder would avail themselves of the company's proposed offer to sell twenty tickets for \$1.
